John J. Kenney Here 50 Years; Three Others Receive 40-Year Pins

Scovill President L. P. Sperry recently presented one 50-year continuous service award and three 40-year service awards.

1) John J. Kenney, Purveyor in B & F Class, accepts the 50-year gold pin with three diamonds. B & F Sales Manager E. D. Janes, B & F Production Manager R. A. Schneider and Mfg. Div. Vice-Pres. H. W. Wild look on.

2) A 40-year gold pin with one diamond is presented to Class A Production Supervisor Thomas R. Crose. Vice-President Wild smiles his approval.

3) Nicola Meola, Drawing Room toolsetter, receives his 40-year award. On hand for the presentation were Mfg. Superintendent J. G. Wolff (partly hidden) Gen. Foreman L. H. Maysbaw and Drawing Room Foreman M. J. Wall.

4) Waterville Division Vice-President and General Manager S. G. Gaillard, Jr., and Manager (General Sales) A. H. Goepel look on as Mr. Sperry presents the 40-year award to H. D. Clemmons, Methods & Design Engineer of Waterville's Plumbing Fittings Division.

Suggestion Awards

The Industrial Improvement Committee has announced the presentation of eight cash awards as follows:

\$75.00 Award

Carl L. Wester, Press 2 Tool.

\$50.00 Award

Edward Vance, Lipstick.

\$25.00 Award

Peter Tartaglia, Slide Fastener.

John Bartolini, Slide Fastener Tool.

Frank Yurksaitis, Slide Fastener Tool.

Edward Hogan, Slide Fastener Tool.

D. L. Wyant, Chucking.

\$15.00 Award

Carl Hellendrung, Slide Fastener Tool.

Taxes

The taxes of Federal, State and Municipal Governments take more than 30% of the National Income. This is serious. In fact, many able economists appear to agree that taxation beyond 25% of our National Income will bring disaster.

Our tax trouble is not so much in the direct taxes we pay as in those we pay without knowing it. The problem of hidden taxes is complex. It is difficult to trace them all. However, it has been stated by competent authority that there are 151 taxes hidden in the price of a loaf of bread, and 100 or more in the price of an egg.

Most of us want a car. They are high priced. It has been estimated that from \$355.00 to \$466.00 in taxes, most of it hidden, is in the price of a car in the \$1,600. to \$2,000. price range.

Some of us have the idea that all or most of taxes should be paid by corporations. We don't follow that thought through, however. A corporation can pay out only such money as it takes in. When a corporation pays a tax, it must come from the price it gets for its products and services. That puts it right back on us, the consumers.

This excess taxation can be reduced. But it means we must stop asking Government to do this, that and the other thing for us. It means that we must tell our elected Representatives, in no uncertain terms, that we want efficient Government.

William C. Curtis
Vice-President

New Assignments

Manufacturing Div.

Notice of appointment issued by Mr. H. W. Wild, Vice-President:

Effective April 10, 1950, Milton A. Bristol has been appointed Assistant General Superintendent of the Slide Fastener Division. He will report to Mr. C. A. Burnett.

Purchasing Dept.

Notice of appointment issued by Mr. A. P. Hickcox, Vice-President and Director of Purchases:

Effective April 10, 1950, Philip R. Bergstrom has been appointed Buyer in the Purchasing Office. He will be responsible for the purchase of our production steel items.

Waterville Division

Notice of appointment issued by Vice-President and General Manager S. G. Gaillard, Jr.:

Effective April 1, 1950, E. L. Hunt has been appointed Assistant Manager of Plumbing Sales. He will report to Mr. A. H. Goepel, Manager, General Sales.

Daylight Saving Time

Daylight Saving Time will be resumed in the State of Connecticut at 12:01 a.m. on Sunday, April 30.

At about that time, all clocks in the Main Plant will be advanced one hour. Outside clocks will be marked "D.S.T."

Plant schedules and appointments will be on Daylight Saving Time.

It's Your Federal Government

No. 7—Agriculture—An Overgrown Department

By Robert L. Johnson

President, Temple University and Chairman Citizens Committee
 For The Hoover Report

The American farmer has much for which to thank his government. His lot has greatly improved in recent years. His prices are upheld by government subsidy; he receives scientific advice, is greatly aided by irrigation and electricity, and is restrained from upsetting the market by extravagant and unwise plantings.

Nevertheless, it happens that some of his troubles result from well-meant but misdirected efforts by the Dept. of Agriculture to assist him.

Like several other departments of our government, in its 87 years of existence it has outgrown itself and split up into 20 bureaus and agencies, some of which are competitive and, in some areas, it has become almost a burden, rather than a help, to the farmer. The report of the bipartisan Hoover Commission states:

"The department has grown to its present size without sufficient attention being given to its parts as a whole. It is in many ways a loose confederation of autonomous bureaus with a strong tendency to develop independent, overlapping and duplicating programs."

Many of these instances of duplication are costly and seem to me to be indefensible. For example:

The Commission's task force found that in one cotton producing county in Georgia 47 employees of seven separate field services of the department were advising 1500 farmers.

A Missouri farmer, who asked the department for information about fertilizer, received conflicting advice from five different field services.

In Maryland, 88 employees of seven different services were giving advice to less than 3400 farmers.

How can the farmer be blamed for being confused? He is bewildered by the ministrations of these agencies:—Soil Conservation Service, Farmers Home Administration, Farm Credit Association, Production and Marketing Administration, Rural Electrification Association, Federal-State Farm Management Advisers, Bureau of Animal Industry and the Bureau of Entomology and Plant Quarantine. There are also numerous county advisory committees of farmers, which cost the government about \$5 millions a year.

The task force has suggested one committee for each county, with a saving of about \$4.5 millions annually.

In the matter of finance, the government is pretty deeply involved in this Department.

In the past 20 years its expenditures increased from \$25 millions annually to \$834 millions in 1948. It has an investment of \$2 billions in several credit agencies created for the farmer.

The Commission asserts that at least \$35 millions could be saved in the cost of their administration and even greater savings would follow better organization of lending activities.

The Department is greatly hampered by the interference of other agencies of the government, particularly the Dept. of Interior, in the planning and operation of irrigation projects. This is despite the fact that certain irrigation programs are solely the concern of Agriculture. But it has happened that such programs have been submitted to Congress before Agriculture knew about them.

There is also confusion in the setups of bureaus which regulate food and drug products for the protection of the consumer. The Dept. of Agriculture has the authority to grade agricultural products and to inspect meat, animal viruses, toxins, insecticides and seeds. But the Federal Security Agency, under the Food and Drug Acts, regulates the adulteration of foods, the standards of containers and various milk requirements. The Federal Trade Commission regulates false advertising of foods and the Bureau of Internal Revenue administers the taxes on oleo and renovated butter.

Most of these authorities were originally held by the Dept. of Agriculture and the Commission recommends that they be restored.

The effects of this dilution of authority is confusing and troublesome to all concerned, especially as they vary. The standards for grading fruits and vegetables set up by the Dept. of Agriculture are different than those developed for consumer protection by the Federal Security Agency.

There is great confusion and duplication in the management of forest and range lands of the public domain in the western states. Two government agencies are involved and have different standards.

In the mountain regions of Ogden County, Utah, the ranchers own the valley land and the Forest Service manages the high altitude forests and

grazing lands. The Bureau of Land Management administers the lands between. The two services impose different fees and have different standards regarding the numbers of livestock acceptable for a given area.

The Commission concluded that these problems of duplication and overlapping call for basic organization changes.

It recommends streamlining the department, with the Secretary of Agriculture in charge and with the return of those agencies which have strayed away into other departments or an independent existence.

The Department would handle its own finances and accounting and duplication of effort would be abolished with great saving and increase of efficiency.

Rod & Gun Club News

Everyone who attended the annual banquet seemed to enjoy himself. After dinner Club President ED DEBISSCHOP introduced the guests.

Tom Egan, well known columnist, gave a short but interesting talk on hunting, fishing and politics.

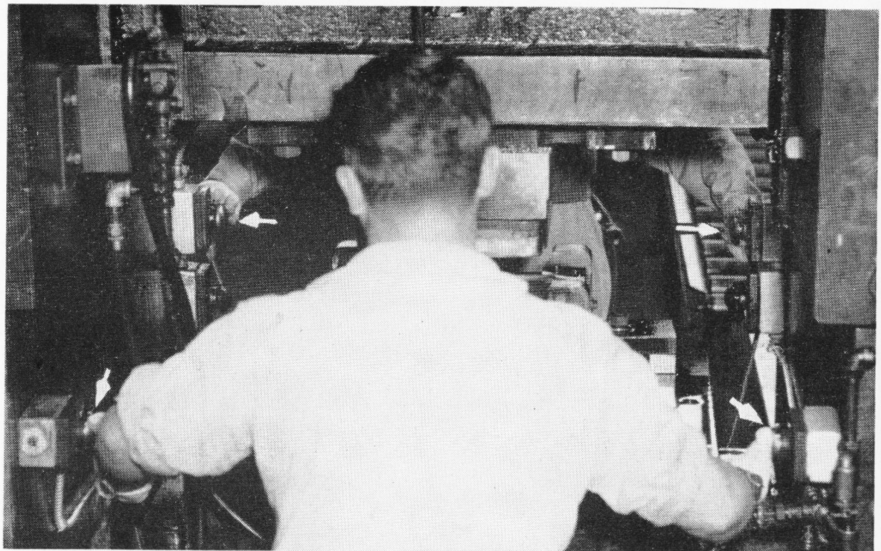

Attorney Ed Sweeney, skeet enthusiast, came up with a couple of new yarns.

Bob Snyder, another skeet shooter, greeted the boys with a few words.

A surprise guest, Ray Famechon of France, European featherweight champion, was introduced to the boys. With him were his manager and several friends. Ray was kept busy autographing place cards until the movie started.

The movies, five reels of the latest fishing and hunting pictures from the library of Field & Stream Magazine, were enthusiastically received by all the boys and furnished a fine ending for a perfect evening's entertainment.

Unusual Job--Unusual Protection

Here are two men operating an 800-ton press. One man feeds the work into the press and, on the other side, another takes it out. Because of their positions on opposite sides, neither man can see the other.

An unusual safety arrangement for the protection of these operators has been worked out by the Shell Department and installed by West Machine.

There are four starting buttons (see arrows) on the press. These buttons make it necessary for each man to place both hands on the buttons and hold them there to start the press. Unless each of the four buttons is pressed and held at the same time, the press will not operate.

Sportsmen Hold Annual Banquet

The Rod & Gun Club held its annual banquet at Doolittle Hall on Thursday, March 23. Sixty members and guests enjoyed a delicious turkey dinner. Ray Famechon, European featherweight champion, (top photo), bows to the sportsmen after being introduced by Club President Ed DeBisschop, (right).

Pinochle Tournament

The pinochle men wound up the season with a banquet at the SERA Clubhouse on Saturday, April 1. Prizes for the first and second rounds were awarded to the following teams:

Erv Honyotski's team won both the first and second rounds with 345,210 and 347,280 points respectively. Bill Mancini's boys took second place with 343,610 and 345,315. John March's lads were third with 341,045 and 336,900 points respectively.

Individual five high men of the tournament for round one were as follows: Erv Honyotski—45,555, Peter Arots—45,220, Nelson Thomas—45,180, Neil Granoth—44,905 and John Carolan—44,430.

For the second round, individual five high men were: Peter Arots—45,515, Erv Honyotski—45,400, Bill Mancini—45,380, Leo Belliveau—45,185 and Neil Granoth—45,110.

Trim & Knurl

By Betty Young

FRANKIE and CHICK MARINARO'S mother came back from New Orleans. While at the Mardi Gras, she was agreeably surprised to meet Waterbury's Mayor Raymond Snyder.

PHIL COLELLA and her husband spent Easter weekend in Scranton, Pa.

Birthday wishes to ANN HOWARD and ART PICARD!

The CARMINE MELCHIONNAS have a new baby boy, second son. Best wishes!

GIULIO CORDELLI joined the ranks of new grandfathers. Congratulations! The proud father is WILLIAM CORDELLI of Press No. 2.

Rod Mill Topics

By Dom Polo

Guess that FRANK SABIS, formerly of the Rod Mill, is determined to make a golfer out of his young son. Why — only last week, there was Junior getting in a bit of early practice on the lawn!

Congratulations to ERV "HONEY" HONYOTSKI whose team took first and second round honors in the pinochle tournament. HONEY also took individual high score for the first round and came in second in the second round.

WALTER HAYRE had a very sad experience recently. He was notified that there was a check at the Post Office for him. He immediately boarded a bus and dashed down to get the check. He opened the envelope. It was a check for 10¢—a refund from the Internal Revenue. WALTER didn't think the trip was worth it as his bus fare was 20¢!

The "Know-How" Of Proper Tire Inflation

The importance of a compact Tire Inflation Procedure in the Service Field is the basis for this special package designed and offered by Schrader. Since surveys among dealers have discovered too many of them with inaccurate air service equipment, "on the button" accuracy of tire pressures, which the car owner needs, is not obtainable. This new package is an excellent "get started" unit for checking and modernizing this vital need.

Comparative Air Loss System

Surveys and careful tests have revealed that over 90% of all roadside flats can be prevented. The Comparative Air Loss System, which requires only seconds of time and no special equipment, eliminates waste of time, needless destruction and premature wear of millions of tires and tubes.

The fact that sudden flats have been just slow leaks for days, weeks or months before they lead to serious trouble is the basis of life-saving, tire-saving Comparative Air Loss System. The system calls for four important factors which, when followed faithfully, will save the driver not only money but possibly his life:

1. Gauging of tires when they are cool, once each week before adding air.
2. Careful comparison and recording of the pressures. (If the pressure of one tire is 3 lbs. below its running mate, there may be a leak in the tube. The cause should be immediately determined and the condition corrected, thus avoiding a roadside flat.)
3. Tires to be inflated only when they are cool, and air-sealing Valve Caps to be firmly applied at all times. A positive seal at the mouth of the valve eliminates guess-work in locating a source of leakage.
4. Every time the car is lubricated, have foreign objects removed from tire tread surface. This includes objects that have caused punctures or that may cause punctures or serious damage to the tire if not removed.

Ten Year Awards

JOSEPH GIATTINO, Casting, April 4; JULIUS SHURKUS, Hydro Press, April 6; BENJAMIN GASPARI, Casting, April 7; ELIZABETH HOUE, Lacquer Wash, April 10.

MARY ST. PIERRE, Connector, April 14; HENRY MILLER, Engineering, and HARVEY STACKMAN, JR., Emp. Relations, April 15; WILLIAM MOORE, No. Mill Rolls, April 17.

Schrader Introduces New Service Kit To Dealers

The A. Schrader's Son Division is introducing to dealers a new, modern Tire-Air Service Procedure package (#4471) which is designed to be of great value to car owners as well.

The package has the basic tools and the "know-how" for prevention of bleeding of hot tires — an industry-wide objective. The 3 lb.-5 lb. new air service formula, which allows for normal heat build-up in passenger car tires, is described in a folder. In the package are included:—

- 1) #8106B Trutest Special Gauge (the finest Schrader makes) for checking all air-service gauging equipment.
- 2) A sign to notify people that dealer has Certified Air Service.
- 3) 10 Passenger, Car Glove Compartment Gauges (Schrader #5050) in two display packages so that a customer can have the facts himself and know, instead of guessing, when he needs to come in for air service.
- 4) 200 Standard Sealing Caps (Schrader #880).
- 5) 200 Pressur-tel buttons, the newest idea in "on the button" service reminders of the right cool pressure.

While being advertised as "A Good Deal for the Dealer", the Schrader #4471 Package will mean, also, a "good deal" for individual car owners.

Maintaining correct tire pressures will not only provide increased tire and gasoline mileage — ease of steering — a more comfortable ride — lower maintenance cost in general and longer vehicle life, but will help to prevent tire bruising—breaking of the cord fabrics, and the weakening of the tire structure that may ultimately lead to roadside flats or serious blowouts.

**Driver's License
Due May 1, 1950**

Waterville Division

Our heartiest congratulations to **Bert Clemmons** on the completion of 40 years of Scovill service.

Mr. H. D. Clemmons, better known as **BERT CLEMMONS**, has been connected with the plumbers' brass goods line for 50 years. He came to the Morency-Van Buren Company in Sturgis, Michigan, in 1909 and joined the Scovill force in 1925 when M-VB became one of our divisions.

While with M-VB, **BERT** served as Factory Superintendent and Assistant Manager. When that company was merged with the Waterville Division about three years ago, **BERT** came along as Methods and Design Engineer for Plumbing Fittings.

During his career with M-VB, he had developed all but one of the plumbing fittings manufactured by that company. Their success and popularity on the market has been attributed to **BERT'S** mechanical as well as artistic design of the fittings. His latest development, known as the "Scovill M-VB #16 Float Valve", has been developed since his coming to the Waterville Division.

In addition to his regular duties at M-VB, and developing his inventions, **BERT** was able to find time to serve as City Commissioner for 12 years, two of which he served as Mayor. He also was Chairman of the Municipal Light and Power Dept. Committee for 12 years.

The new "Scovill M-VB #16 Float Valve" is being introduced to the trade through sales promotion kits to plumbing jobbers, advertising in trade magazines and the announcing of a Cash Prize Name Award.

The qualities that make the #16 Float Valve outstanding—Quiet, Fast and Fully Adjustable—are important to all in the plumbing field . . . to the jobbers in greater sales and better service to customers; to dealers in terms of installation ease and simplified stocking; and to customers in increased satisfaction.

Life Out East

By Harry Shewbridge

Just like the stove in the country store, No. 18 elevator is the center of life Out East. The latest is that some of the sixth floor girls have been losing umbrellas, pocketbooks, etc. because of other light fingered passengers (yours truly being no exception!). They eventually get them back but in the meantime, the mental strain is terrific. As **ANGIE** would say, "Who's got it?"

And now for the hearts and flowers for the third floor (Slide Fastener). **GEORGE McKENNA** is prepared to take the big step into matrimony, so the boys held a stag for him at St. Joseph's School basement on Thursday, March 30 . . . **ANN KROSS** took the leap and became a married woman on Saturday, March 25 . . . And, last but not least, on April 3, **Wayne Allen**, (weight 7 lbs., 12 oz.) became the proud son of two happy parents, **TOMMY** and **BESSIE ASTON**.

One floor up in that beehive of activity—the Chucking Department. One day last week, we spied **EMILE ROCHON** puffing on a pipe small enough to be a sample. Now ain't that something! I can remember back in the good old days when he smoked cigarettes.

Finally, to prove that we don't forget. I would like to extend Easter greetings to **HELEN LOY** from her many friends on the fifth and sixth floors. The same goes for you, too, **ART LUSHER**. They tell me that you're really enjoying this retirement business.

Fishing Season Opened April 15—Ready?

Fishing season officially opened Saturday, April 15, but all families with ardent fishermen will tell you it's been going on for some time. As witness Mrs. Tom Kaukas. Tom, Blacksmith Shop, and their two sons Richard (left) and Bruce (right) have their tackle all set and the boat newly painted. Mother will do her part when her menfolk bring in the "mess".

Four Men Succumb

Banadiktas Zukauskas

BANADIKTAS (BEN) ZUKAUSKAS, retired, died on April 1, 1950.

Mr. Zukauskas first came to Scovill in 1909 but, due to several periods away from the plant, his continuous service record started in 1913. All of his years here were spent in the mills. At his retirement in 1949, he was an inspector on the overhauling machine in the North Mill Rolls.

Severino Vacca

SEVERINO (SAM) VACCA, Waterville, died on April 4, 1950.

Mr. Vacca was hired on April 3, 1923. He worked intermittently until 1933 when his continuous service record started. In November, 1948, he was forced to leave because of illness. He had served as a janitor in the Waterville Division.

Lampert Binder

LAMPERT BINDER, Press No. 2, died on April 7, 1950.

Mr. Binder had over twenty-five years of continuous Company service. Except for a short period in Stores, he had always been in Press No. 2 where he was serving as head toolsetter when illness forced him to leave on March 17, 1950.

Michael Devine

MICHAEL DEVINE, retired, died on April 7, 1950.

Mr. Devine had almost fifty-four years of continuous Company service when he was retired on December 29, 1945. A mill man throughout his years here, Mr. Devine was serving as a bandmaker in the North Mill at the time of his retirement.

FOR SALE

1938 Pontiac, 4-door, \$100; safe, good condition. Call 4-7765 after 6 p.m.

Mahogany dining room set, 9 pieces; white tabletop four-jet gas stove; good condition. Call 4-7765, 11 a.m. to 1 p.m.

9 irons, 3 woods, golf bag, used a year, \$50. See Andy on the Planer, General Training Room No. 1.

Boy's 28" two-wheel bicycle; folding cot, double bed size; four chairs, chrome body, leather seats. Call 5-3701.

Gray Premier kitchen range with oil burner, \$35; Call 5-2418.

Carpenter's tools, 3 saws, chisels, screw drivers, level, plane, square and others in tool chest. Can be seen at 24 Fort Hill Ave., Waterville, or call 3-6511.

Four bed pillows can be made from good featherbed, \$2. Call 3-6961 evenings.

Child's large doll carriage, English Tram style, \$10; wrought iron fireplace bench, mohair top; 6 cubic foot Hot Point refrigerator. Call 3-6346.

Firestone twin outboard motor, 7 1/2 HP, 1949 model, used less than 30 hours. Call 3-1212 after 6 p.m.

Underwood upright typewriter, \$15. Call 3-3611.

Five passenger rubber boat, pump, oars, outboard rig, \$25; 7 x 15 German binoculars, \$25; Call at 44 Seeley St., Apartment B.

Large Whitney crib, without mattress, practically new. Call 5-3440.

"Folboat" complete with sail, 1 1/2 HP outboard, all equipment, like new, \$140. Call Naugatuck 6350.

Washing machine, very good condition, \$10. Call 5-3955 between 5-7 p.m.

White net and silver evening gown, bag to match, worn once, size 11-12; maple crib and mattress. Call 3-4791.

Mahogany organ, good condition. Call 5-2389.

"Salanti" accordion, excellent condition. Call at 17 Oak St. or 5-7137.

Sidearm heater, \$7. Call 5-9371.

Long white wedding dress, reasonable. Call 5-7102.

1934 Chevrolet motor, good condition, \$25. Call 3-1517.

42" white enamel double-compartment kitchen sink, chrome plated drain and trap. Call Wtn. 464.

G.E. floor model radio, good condition, reasonable. Call 3-5696.

1947 English motorcycle, complete with accessories, \$350. Call 4-2482 after 5 p.m.

Maple crib, spring and mattress, \$9; porcelain heater-cooker stove for coal or wood; large walnut dresser, \$15; large porcelain-lined ice box; apartment gas stove, ivory; small apartment gas stove, 3-burner type; porcelain wall-type kitchen sink. Call Naugatuck 5738.

Coldspot refrigerator, good condition; kitchen range equipped with oil burner or grates for coal; cream color kitchen gas stove, 4 burner. Call at 429 Baldwin St., second floor.

FOUND

Gold rimmed sun glasses near East Yard Gate. Call ext. 345.

RIDE WANTED

Between Main Plant and Peck Lane, Cheshire for 3-11 shift. Call West Cheshire 4197 from 10 a.m.-1 p.m.

RENT WANTED

Three or four rooms. Call 3-1517.

FOR RENT

Pleasant room with private family on Young St., gentlemen only. Call 4-8736 mornings or after 5 p.m.

Girls' Club News

By Dora Mori

The Girls' Club extends a hearty welcome to **MARIE MARTINEAU**, Mfg. Timekeeper, and **MARGARET SULLIVAN**, Tube Mill. Come along to the Annual Banquet on April 22, at the Hotel Elton and get acquainted.

It's nice to see our former member **MARY BOWLER** with us again. **MARY** is now **MRS. GRIFFIN** and can be found in Transcribing.

Old man stork was certainly popular with four of our former club members. **BETTY ANN CARRINGTON CARROLL**, formerly of the Tax Office, presented hubby a daughter on April 2 . . . **ROSEMARIE NIRO FAGAN**, formerly of D & C Sales, became the proud mama of Patsy Ann on March 29. The three **FAGANS** are now living in Madison, Wisconsin, where Edward attends school . . . A son, **Raymond Carleton, Jr.**, was born on March 20 to **MAE FRUIN STEWART**, formerly of General Stores . . . **ALBIE KRIKSCIUN WOLFF**, formerly of Mill Production, and hubby **JOE** are celebrating the arrival of their third child, first daughter, **Janet Mary** on March 22. Congratulations to all!

We extend our get-well wishes for a rapid recovery to **ANN KANE**, Prod. B.

MURIEL HAM of Central File is happily vacationing at Boston and New York for two weeks. We miss you, **MURIEL**.

What looked like a sunlamp draped over **ALICE GRAVELINE'S** shoulder recently, turned out to be just that — a sunlamp! Originality is a great thing!

MARIE PENNELL of Waterville and her family are very cosily settled in their lovely new home in Bucks Hill.

While attending the Providence College Glee Club performance on St. Patrick's night, **JUANITA "Kentucky Babe" ADDESSIO** of Addressograph caused a mild flurry of excitement among the Irish attending when they noticed the color of her new Spring bonnet—it was red!

NORA WILLIAMS of Waterville spent her Easter holiday at Cape Cod.
