Technical Assistance Mission No. 42

This group of recent visitors to the Main Plant represent 11 different European countries. They make up O.E.E.C.'s Technical Assistance Mission No. 42 on Materials Handling Equipment. Standing, starting second from the left, are: Joe Wolff, Jim Mitchell and Art Hickcox of the Mill Production Office, who escorted the visitors on their tour of the plant.

The most recent group to visit our plant, in connection with the Technical Assistance Program of the Economic Cooperation Administration, included experts in materials handling equipment. Representing eleven different European countries, the group consisted mainly of manufacturers of equipment, representatives of universities, of Government departments, and of certain industries.

In the United States for a visit of six weeks, the objective of the group was to make a comparison of American methods of manufacture and use of materials handling equipment with those current in Europe. Because of

the exceptional conditions following the war, many European industries have been delayed in modernizing their production facilities and there are many valuable lessons on this which can be learned in America.

The group visited the Materials Handling Exposition in Chicago and toured the United States in order to study methods of production of a wide variety of such equipment; uses of the equipment in a representative cross-section of American industry; and techniques of instruction in materials handling as applied in U. S. educational institutions.

Countries represented by this group included:—Austria, Belgium, France, Germany, Great Britain, Greece, Italy, Netherlands, Portugal, Sweden and Switzerland.

Technical Assistance Program

This program is designed to enable Europeans to visit American industry in order to acquire technical "know-how" in the interests of improved European productivity and preparation for defense.

After its return to Europe, the group will compile a report which will be widely circulated throughout European countries and on which co-operative action will be possible to stimulate industrial progress.

One Retirement

SALVATORE FORTUNATI, Trucking, has been added to the Special Retirement List as of June 1, 1951.

Mr. Fortunati first came to Scovill on November 6, 1916, but due to several periods away from the plant, his continuous service record started in 1922. For the past 28 years he has served as a trucker in Trucking.

Suggestion Award Procedure Revamped

The plan for awarding prizes to employees for submitted suggestions has been an established program in Scovill since May, 1942. It was introduced in the Plant at that time as the "Production Drive Plan" and was intended to increase War production by improving efficiency, by stopping all kinds of waste, and by maintaining employee morale.

During this period, many awards have been presented to employees for their prize-winning suggestions. Under the former procedure for handling suggestions, it was sometimes a long, drawn out affair to process some of them.

At a recent meeting of the Industrial Improvement Committee, the following new system for processing suggestions was adopted.

1. Suggestion boxes are located in every department in the plant. Suggestion blanks are available at these locations. Envelopes, addressed to the Employee Relations Department, are also available.

2. After filling out a suggestion blank, the employee will place it in one of the envelopes and drop it in the factory mail.

3. Upon receipt at the Employee Relations Office, a card copy will be made of the suggestion. The original suggestion will be forwarded to the Planning Office.

4. The Planning Office personnel will process the suggestion through the various steps and then return the suggestion to Employee Relations.

5. The suggestion will be turned over to the Industrial Improvement Committee for action.

This new procedure will speed up final action on suggestions, and it is the hope of the Committee that employees will keep them busy by filing more and more suggestions. You know there is always a better way.

The Industrial Improvement Committee is made up of two sub-committees: the Employee Committee and the Management Committee.

Serving on the Employee Committee are:—Robert Currie of Trim & Knurl, Calvin Martin of Closing, Frank Kontout of Button Tool, Rita Kennedy of Button Packing, Peter Kelly of Chucking, Thomas Cullinan of Slide Fastener Tool, and John Carey of Slide Fastener.

The Management Committee is made up of:—Grover C. Baldwin of the Mfg. Supt's Office, George Chase of the Tool Office, Armand Wolff of Planning, Art Chaffee of Engineering, Louis Willard of Mill Production, Monty Williams and William Vining of Slide Fastener, and William Wells of the Wire Mill.

Five Receive Awards

The Industrial Improvement Committee also announced the awarding of five cash prizes as follows:

\$75.00 Award

Carl R. Wester, Press 2 Tool

\$10.00 Award

Anthony Daddona, Slide Fastener
Leonard Solomita, Cutting
Fred Teach, Slide Fastener
James Veneziano, Electrical

New Assignments

Employee Relations

The following notice of appointment has been issued by J. M. Burrall, Manager, Employee Relations:

Effective June 11, 1951, John W. Goepel has been appointed Personnel Assistant. He will report to the Manager, Employee Relations, with duties as may be assigned.

Manufacturing Div.

Factory Superintendent J. G. Wolff has issued notice of the following:

Effective June 11, 1951, John T. Mitchell has been appointed acting foreman of Depts. 57, 58 and 59—Mfg. Work in Process Stores, Trucking and Elevators. He will report to Mr. G. A. Goss, Mfg. Supt's Office.

Mills Division

Mr. J. J. Hoben, Works Manager, has issued notice of the following:

Effective June 18, 1951, Edward B. Goss has been relieved of his responsibilities as Assistant to the Casting Shop Superintendent and has been appointed an Assistant to the Works Manager, Mills Division.

Waterville Suggestion Award Winners

Factory Superintendent Fred J. Senior presented cash awards to two Waterville Div. employees for their prize-winning suggestions, on June 5.

Upper photo:—Presentation of a \$25.00 award to Mrs. Paulina Higham receives approval of Plant Manager L. G. Robinson and Assembly Room Foreman J. F. Lengyel. Lower photo:—A \$15.00 prize is presented to Roland J. Grenier as Mr. Robinson and Tool Foreman W. F. Gleason look on.

No. 12

The Golden Rule

Since television has become one of our popular means of home entertainment, those persons having television sets are becoming more and more popular. Neighbors and friends become frequent callers and many of them enjoy the television programs.

However, have you ever been enjoying a program when other guests in the living room or den, or wherever the set is, start yakity-yakity about the price war, the ball game and many other topics?

If you are the one who's watching television you know how disturbing conversation can be.

To those who like to yakity-yak, why not remember the Golden Rule and adjourn to some other room.

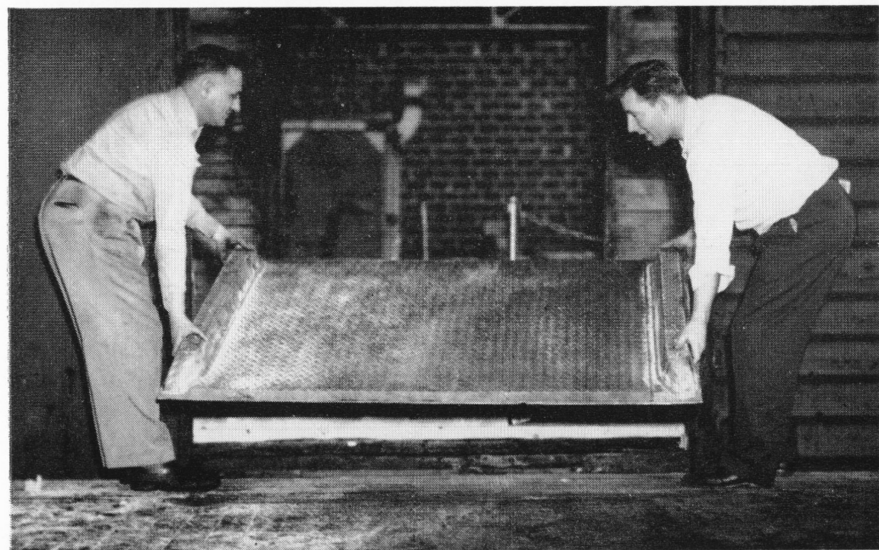

John M. Altieri, Sl. Fastener
Hugh E. Coddington, Japan Room
Edward J. O'Loughlin, Pipe Shop
John E. Slavin, Sl. Fast., Wire Form

Ten-Year Awards

PAUL FEDE, Tube Mill, June 5; EV-ARISTO CATALINA, Dip Room, June 6; FRANK LUCASHENSKY, West Machine, LELAND KRAKE, Tool Office, WILLIAM DACEY, Mill Production, June 9.

JOHN KUCHERAVY, Button Eyelet Tool, JOHN STEPHENS, ASMD, June 10; JOSEPH OVERTON, West Machine, June 11; WALTER SMITH, Wire Mill, June 14; Ralph Brown, Wtvl, June 16.

Magnesium Does The Trick Here

Dom Abbondandolo (left) and John Sullivan swing a magnesium dock board into place at a box car in the Continuous Strip Mill. The dock board, (which is called a ramp, plate or gang plank) weighs only 170 pounds as compared with a steel board weighing almost 400 pounds for the same job.

Several of the new magnesium dock boards are now being tried in the plant. If satisfactory, it is hoped to put more of them in wider use throughout the plant. In addition to

being of light-weight metal, they are tailored for the job and have features such as safe hand holds, guard rails, non-skid tread and a channel piece to hold it in place.

Fire Safety Rules

With vacation time so close at hand, a few fire safety rules should be observed by vacationists prior to leaving.

1. Leave a key to your home with a neighbor and ask to have the house inspected every day or so.

2. Send the fire department a card telling when you will be away and who has the key.

3. Disconnect heavy-duty electrical appliances and check with the utility company as to other appliances.

4. Leave no hot ashes in stoves or cigaret butts in trays.

5. Do not leave oily or paint-soaked rags about which might be spontaneously ignited.

6. Take along an approved type fire extinguisher for emergency use if you are going to stay at a cottage.

YAK-A-TA

Survival Under Atomic Attack

No. 11 — "Induced" Radioactivity - Radiation Sickness

Induced Radioactivity

If an atomic bomb goes off in the air within two-thirds of a mile or slightly more of your home, there is no practical way of keeping explosive radioactivity out of the above-ground part of your house.

It is possible that, at very short range, artificial, or "induced" radioactivity could be set up in gold, silver, and many other objects. However, this kind of radioactivity will never offer great danger, so don't throw away bandages and other first aid materials in the medicine cabinet. They will be safe to use.

Naturally, the radioactivity that passes through the walls of your house won't be stopped by tin or glass. It can go right through canned and bottled foods. However, this will not make them dangerous, and it will not cause them to spoil. Go ahead and use them, provided the containers are not broken open.

Radiation Sickness

Should you be caught upstairs or in the open at the time of a bombing, you might soak up a serious dose of explosive radioactivity.

Even so, the first indication that you had been pierced by the rays probably wouldn't show up for a

couple of hours. Then you most likely would get sick at your stomach and begin to vomit. However, you might be sick at your stomach for other reasons, too, so vomiting won't always mean you have radiation sickness.

The time it would take you to get sick would depend on how strong a dose you got. The stronger the dose, the quicker you would get sick. For a few days you might continue to feel below par and about two weeks later most of your hair would fall out.

By the time you lost your hair, you would be good and sick, but, in spite of it all, you would still stand better than an even chance of making a complete recovery, including having your hair grow in again.

Our Family Album

This little girl posing with her doll is Sharon Ann Franzese who is twenty months old. Her paternal grandmother is Mary of Press No. 1.

Varsity Horseshoe

The SERA men defeated French Company on their first night of play on June 5 by a score of 12-4.

Last year, Scovill men were city champs and participated in the state finals where they came in second. The boys expect to be better off this season.

Our Retired Folks

Tuesday, June 5, was not exactly the ideal type of day for a picnic but 34 of our members just knew the weatherman would smile on us eventually and decided to go to Woodtick as planned. They were right, the sun did finally come out and all had a fine time.

Some choice entertainment was provided by *Charlie Littlehales* who favored us with a song and a recitation. *Bart Insero's* son also sang.

We'd like to thank *Fred Wilson* and his staff for the grand time and for the monthly meetings we've had during the past season. They've done a fine job and we do appreciate the opportunity of getting together once a month and visiting with our former co-workers. We're looking forward to having the meetings start up again in the fall.

On the sick list at St. Mary's hospital are two of our members:—*Bill Dunn*, and *Jacob Krawchuk*. *Timothy Fitzmaurice* will be spending the fine summer days at the Woodlyn Rest Home in Prospect.

And so, until we meet in September, have a nice summer, take it easy, and the best of health to you all.

In The Navy

Michael Cannata, a former employee of General Training No. 1, is now stationed in Norfolk, Virginia. His mother, Helen, and Aunt Louise are formerly of Chucking. Another aunt, Caroline, is employed there now. His grandfather, Louis Grasso, is with the Sanitation Department.

Concert, Playhouse Tickets Available

Tickets for this summer's "Pops" Concerts and the productions at the Litchfield and the Southbury playhouses are available to employees through the Employee Activities Office. For information and reservations, call the Office at Ext. 834.

"Pops" Concerts

Six concerts will be presented in New Haven's Yale Bowl by the New Haven Symphony Orchestra.

June 26—the first concert of the season will be "Cole Porter Night", with Cole Porter in attendance. Guest artists will be: Barbara Ashley, Norman Atkins, Thomas Hayward and Lois Hunt; also, the 80 voices of the New Haven Chorale will perform.

July 10—the second concert will feature Alex Templeton.

July 24—Marguerite Piazza of television and the Met will be guest soloist, and Robert Russell Bennett will conduct the orchestra.

July 31—Gershwin Music, with guest artists Morley and Gearhart (husband and wife piano team of the Fred Waring organization).

Aug. 14—Muriel Rahn (she created the role of Carmen in Billy Rose's long-run musical smash, "Carmen Jones") and Edward Matthews, who is noted especially for his performance as Porgy in George Gershwin's "Porgy and Bess". Also, the combined Salsbury and Rock-Hontus chorus of New Haven.

Aug. 28—Connecticut's own Mimi Benzell will sing popular and operatic songs at this final concert.

By Dorothy Bernier, Alice Spillar

The latest gals in the Club are Cecilia Paldauf, Helen Suignano, Rachael Caraf, Josephine Fasano, Marie Coretto, Louise Zollo, Josephine Perugini, Cecilia Petro, Brigida Biondi, June Langton, Mary McKenna, Jane Dostaler, Eunice Grady, Dorothy Pagnoni, Joan Gerulis, Adeline Kulko and Josephine Jackson. Welcome all!

What's Cooking?

Hot dogs, hamburgers and all the fix-ins. The Club is having the annual Hot Dog Roast on Wednesday, June 27, at 5:30 at Woodtick. Rena Pierpoint, Slide Fastener, is in charge of entertainment, so we're sure to have a good time. All returns for the roast must be made to council members by June 14.

Vacations

Mollie Collins, Trucking, is spending a week in Atlantic City where she is putting to the test her sure-fire recipe for a suntan. If Mollie doesn't tan, at least she'll be delicious—you should hear the ingredients that go into her special lotion!... Ellen McFarland, B&F Sales, spent a few days of her vacation arranging her new apartment. Doesn't it make you feel like a bride again, Ellen?... Helen DiMaria, Waterville, is humming "California, Here I Come". The lucky lady leaves on June 18 for 3 months.

Census Bureau Please Note

Rose Lawton, formerly of CTO, and husband Fred are the proud possessors of a brand new "vital statistic". Robert Kingston Lawton arrived on June 2.

Gathered At Random

Anneliese Huelster, B&F Sales, will become Mrs. Clyde Myers on June 21. The Canadian Chamber of Commerce guarantees wonderful weather for the honeymooners when they motor across the border.... Have you seen those tricky golf hats modeled by Rose Iarrapino and Madelyn Dubauskas, Cost? One of the nicest events in recent days is Ethel Zeiner's return to her old desk in Mill Sales.

Tool Stores Serves All Tool Crib

Storekeeper Joseph Markowich of Tool Stores (see photo) fills a tool request for one of the many tool cribs throughout the plant.

All tools purchased from outside concerns and all dies are stored on shelves and racks for easy access.

Some have Scovill numbers such as drills and files; others are stored according to their actual name and size.

Requisitions for tools from the Main Plant, Oakville and Waterville Divisions are handled through this department.

About one of the smallest-sized rooms in the plant, the Tool Stores Department is a very important one and its services are used by almost every other department in the Main Plant, Oakville and Waterville divisions.

Located on the first floor in Building 4, Tool Stores' operations are handled by Storekeeper Joseph Markowich. Approximately fifty feet in length and twenty feet wide, the room is lined with single shelves and racks. Down the center of the room are double ceiling-height shelves. These are stocked with drills, files, springs, emery wheels and cloth, belting, saws, hammers, tin snips, taps, bolts, nuts, screws, cotter pins, drill rod, wrenches, gauge stock, reamers, paper pins, oil stones, parts for safety devices, diamond wheels and dust, and almost every other type of item needed to keep machines throughout the plant in good repair.

In the West Plant, messengers will come to Tool Stores with requisitions for needed articles. A Company truck will deliver the items to the East Plant, Oakville and Waterville divisions, except on rush orders when a special messenger is sent to the department.

Joe also sees to it that there is always enough on hand to take care of all requests. A daily spot inventory is taken of small items such as nuts, bolts, screws, handles, etc. When such supplies get low, Joe reorders through the main "stores" office, General Stores.

Tool Stores is but one of the various "stores" which keep the plant assured of needed operating supplies. As its name implies, it handles all the

tool supplies which are purchased from the outside. Some dies stored in Tool Stores are made in General Training No. 1; others are purchased from outside concerns. These are distributed to departments through Tool Stores. It is a branch of the General Stores system which is under the supervision of General Foreman Les Coley.

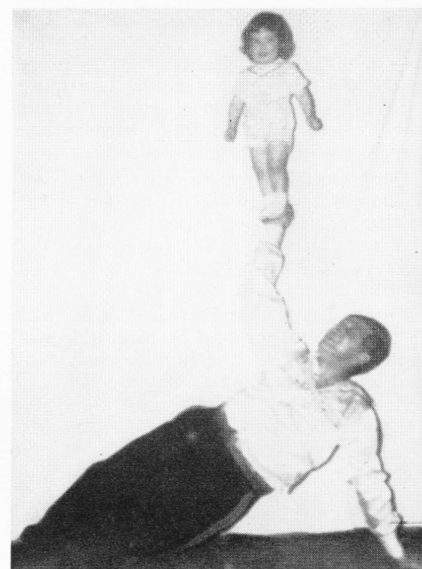

"Eye Opener"

Have you ever imagined you were totally blind? Try it. Press your hands over your eyes and count ten. Imagine going through life that way.

Now, while you're "blind", imagine how you will actually move across the room, out the door and down the street to board a bus to go on an errand. Don't bother figuring out how you'd drive your car or how you'd go hunting or fishing, or take in a show or a ballgame, because those things are all over for you. You're blind now.

Just to tack a moral to this story—don't you be one of the thousands of workers who will suffer a disabling eye injury this year. Such an injury might result in total blindness. *Always wear your safety glasses on the job.*

Our Family Album

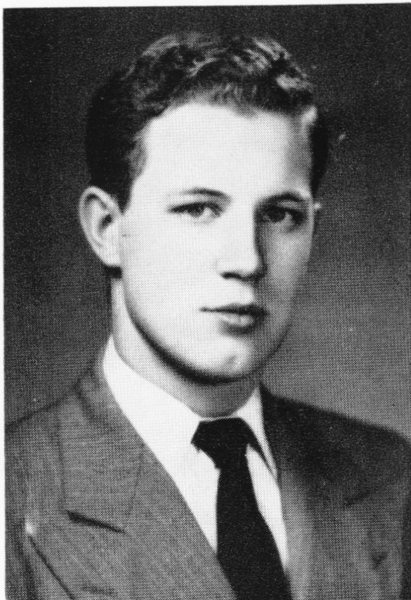

Jane O'Brien is the two-year-old daughter of George of Slide Fastener. She is a member of a professional acrobatic troupe and thinks nothing of being tossed around.

New York Office Fetes Ralph Dawson

Ralph M. Dawson was honored by his associates in our New York Office on the completion of 45 years of Scovill service. About 30 members attended the anniversary party at the Hotel Beaux-Arts, at which time Ralph was presented a fine fishing outfit.

Seated at the head table were four Scovill men whose years of Scovill service total 172—Messrs. Dana Farrar (now of our Baltimore Office), Ralph Dawson, Paul E. Fenton (Main Plant) and Joe Stassen.

The Family Album-1951 Honor Grads

Francis Retallick, son of Thomas of Repair, is an honor graduate of the University of Connecticut.

On June 10, Francis Retallick graduated from the University of Connecticut with high honors. He was the recipient of a BS degree in mechanical engineering.

He is a member of Tau Beta Pi, national honorary engineering fraternity, where he held the office of cataloguer. He was also vice-president of Pi Tau Sigma, national honorary mechanical engineering fraternity.

Francis served as vice-chairman of mechanical engineers, and is a member of the Society of Automotive Engineers and the Engineer's Club.

When he graduated from Washington High School in 1947, he was the first recipient of the Roger Hotchkiss Memorial Scholarship. He also has received three University of Connecticut scholarships.

Francis is with the Westinghouse Electric Corporation in Philadelphia as of today.

Robert Ciarcia, son of Joseph of Button Tool, shares valedictorian honors at Crosby High School.

Robert Ciarcia is one of two graduating students at Crosby High School to win valedictorian honors with a four-year average of 94.5.

He is a member of the Science Club, Argus Staff and Honor Society and took top honors in History, German and English. Robert was also editor of this year's classbook, the German and CYO papers.

He was awarded a \$25 first prize by the Chamber of Commerce for an essay on "What Credit Means to the American People".

A graduate of Merriman Grammar School as valedictorian, he expects to enter Holy Cross in the fall.

Winning honors seem to run in Joe Ciarcia's family. His other son, Joseph, held valedictorian honors for grammar school (class of '42) and high school (class of '46); his daughter, Barbara, was "val" of her grammar school graduating class in 1949.

Leo Bovalley Dies

LEO BOVALLEY, retired, died on June 5, 1951.

Mr. Bovalley had forty-two years of continuous Scovill service when he was retired on September 6, 1942. All his years here were spent in the Dip and Plating Rooms. At the time of his retirement, he was a trucker in Plating.

Rod Mill Topics

By Kilroy

Carmen Rosato is a great Yankee rooter and the boys are giving him quite a ribbing when they lose. Perhaps that's why he received a "crying" towel when they lost a series to the Red Sox.

Congratulations are in order for:—Tom O'Connell and Howie Kraft for their golfing.... Bill Corbett for the addition of a new member to his family—a baby girl.... Ed Brown for that new desk he recently acquired.

Rumor has it that Darwin Weeks will be the next mayor of Cheshire. He has appointed Ramadan (Bubble Gum) Ismail as his campaign manager.

Training Topics

Ray Adam has left the Training Room for Chucking Tool and Alfred Bakutis is now in Mfg. Eyelet.

Eddie Draskinas has a truly novel explanation for the large blue mark he's been sporting on his forehead. His daughter stuck one of those suction cup darts on his forehead while he was napping. What a time he had trying to get it off!

Ed Candee had to leave Mfg. Eyelet temporarily for an operation on his leg. Glad to see that George Becker is back to work after his recent operation.

Joe Labutis of General Training says those new golf clubs are working fine.

Charlie Thorpe is back in Gen. Trng. after about 17 months' Navy service.

Big things are happening to Eddie O'Loughlin, Pipe Shop. He finished his training on May 27, and reentered the Navy on June 16.

Nick Santopietro, who left W. Machine in '42 to enter the service, returned on June 6 to pick up where he left off.

Ray Platt, Mfg. Eyelet, took an early vacation and tried the fish in Maine in a big way. He had a bang-up time even though the fish ignored him.

Bob Meyer of Press No. 2 is quite a trumpeter. He played with the late Glenn Miller's Army Band while stationed in Atlantic City.

FOR SALE

One family house—8 rooms and sun parlor, all improvements, two-car garage. Call 3-7607 after 3:30 p.m.

6 cubic foot meat case, electric slicer, electric scale, vegetable scale, panel truck. Call 2-2482.

Grand Rapids black walnut dining room set, Queen Anne style; Andes white porcelain stove, gas and gas heat combination. Can be seen at 69 Beecher Ave., 1st floor or call 3-8266 after 6 p.m.

Keystone 8 mm projector with screen, A-1 condition. Call 3-6224.

Girl's 26" bike, blue and cream color, \$20. Call 4-7575.

Cocker Spaniel puppies, reasonable. Call 5-5630.

1947 Kenmore wringer type washer with automatic timer, very good condition. Call Woodbury 24-4.

Lawn mower, sickle and brush chopper, victrola, gas range with high oven. Call 4-1791 after 10 a.m.

Whitney dinette set—table and four chairs—\$40. Call ext. 553.

1949 Crosley car in excellent condition, original owner. Call 5-9641.

High chair, baby carriage, practically new, any reasonable offer accepted. Call 4-7642 after 12 noon.

Six pairs of damask drapes, covers for three-piece living room set. Call 6-2619.

Westinghouse refrigerator, Norge washing machine, Philco console radio. Call 4-5571.

Set of Wm. Rogers sterling inlaid silverware, service for 12, never used. Cost \$79, will sell for \$50; Univex "Mercury" camera, used twice. Cost \$79.50, will sell for \$40. Call 5-1770.

1940 Nash in good condition, reasonable. Call 3-3307 from 3 to 6 p.m.

1947 Crosley sedan, four good tires, cast iron block. Call at 89 Orange St. after 3 p.m. or call 3-5625.

Electrolux gas refrigerator, 6 cubic foot, has new unit, perfect condition, \$65. Call Cheshire 2752.

Drop head sewing machine in good running condition. Call 3-3779.

Coldspot refrigerator, reasonable. Call 4-3725.

Garage—16' wide, 18' long, 14' high. Has sliding door, \$35; well-built dog house, 25" x 42", \$5. Call 2-3705.

Complete dining room and parlor set in first class condition, reasonable. Call Cheshire 2045 after 5 p.m.

1942 Buick sedanette. Call Ext. 728 from 3 to 11 p.m.

Special DeLuxe four-door gray Plymouth sedan with radio and heater. Call 4-4685 or ext. 677.

1935 Ford with rebuilt engine, low mileage, excellent mechanical condition. Call 6-1779.

For sale or rent—one room cabin at Fall Mountain Lake, Bristol. Call 4-7209.

Mahogany dining room oval table, 42 x 56, has 12" leaf, six months old. Call at 68 Greenleaf Ave.

Gas range, leather chair, day bed, dishes. Call 5-5904.

WANTED TO BUY

Kodak 35 mm camera preferably with range finder, gas heater with two plates. Call 4-7575.

Four used storm windows, 32x59; 1/2 to 3/4 hp gasoline motor. Call 5-4863.

Chest of drawers, tea wagon, drop leaf table, sofa bed, wrought iron garden furniture, suitable for cottage. Call 4-6285.

Slide projector for 2" x 2" Kodachrome slides, light weight model preferred. Must be in good condition. Call 4-7452 from 5:30 to 6:30 p.m.

Underwood Typewriter in good condition. Call 3-6443 evenings.

LOST

Keys on key-tainer between 41 Bldg. and Receiving, \$1 reward. Call ext. 319.

OTHER

Manchester male terrier, 8 months old. May be had free by calling 4-5241.

RIDE WANTED

Ride from Hitchcock Lake for 7 a.m. shift. Contact Fred Pierpont, Buff No. 2 or call 4-3028.

From Scovill to Peck Lane, Cheshire at 11 p.m. Call Austin Quinn at ext. 2112 or Cheshire 4197.

By Jim Littlejohn

On and after July 1, the legal length for Black Bass will be 10" instead of 12".

A couple of the largest fish caught by employees to date are a 21" Pickerel by Ettore Pagano of the Dip Room and a 15 3/4" Bullhead by Joseph Aleksinas of the Tube Mill.

Two important dates for Rod & Gun Club members are:—the annual fishing contest on July 21—the annual clam bake and sports program on August 18.

The fishing committee appeals to employees who fish at Woodtick to see that all boats are properly anchored at the dock and that the boats are clean.

If Maurice Gagny and his French Canadian friends are successful, you may be invited for turtle soup. But, it's the same old story, "First catch the turtle".

A small metal boat has been found at Woodtick. The owner may have it by contacting Fred Wilson at the SERA Office, ext. 834.

C.R. DeBisschop Raises Iris For Hobby

C. Robert DeBisschop of Transportation has reason to be proud of the beautiful array of "giant" size, colored iris in his garden on Stillson Road. Note the beauty Bob holds (left photo). Transportation Foreman Philo Lee enjoys a stroll through the garden with Mr. DeBisschop (right photo).
