Woodtick Gets Ready For Summer

When the summer season opens at Woodtick, all facilities will be ready for Scovill employees and their families who will spend much of their free time at the recreation area. All facilities at Woodtick are scheduled by the Employee Activities Office. This office may be contacted for details on any activity which is conducted at the area, by calling extension 834.

New, Additional Equipment

An added attraction at the swimming area will be a 12-ft. slide for the children which will be located in the children's swimming area in a desirable depth of water.

The many boys and girls who ride their bikes to Woodtick will be happy to learn that a new metal bike rack will be available for their use.

Additional picnic tables and fireplaces will be set in the wooded areas.

All of the game facilities will be in readiness. Three additional horseshoe courts will be installed and, if material is available, shuffleboard courts and an outdoor basketball court will be built.

Additional basket space has been made in the loft of the bathhouse and 200 additional wire baskets have been purchased. The new arrangement will add greatly to the convenience of all who use the facilities.

Garden Plots

Many of the gardeners have signed up already. All who are interested in having a plot are asked to get their requests in at an early date.

Reminders will be sent to all previous gardeners with detailed information concerning the manner in which the gardens will be assigned.

Good Friday Shutdown

The Main Plant will close for Good Friday at 7:00 a.m. March 23, and will reopen at 7:00 a.m. Monday, March 26.

Employees regularly paid on Friday will be paid on Thursday, March 22.

The ground will be plowed and harrowed as soon as weather conditions permit. It would be very much to the advantage of all the gardeners to get their assignments now so that they may clear their areas before the plowing is done.

Dept. and Club Picnics

The picnic area will be expanded and additional facilities will include horseshoes and volleyball.

Department and Group chairmen who have the responsibility of planning their summer outings are reminded that water has been piped to the area; an additional and larger fireplace has been built; and the adjacent factory building is in good order for cooking and games in case of bad weather.

Fishing Activities

Scovill fishermen will be interested to know that the Fishing Committee is making plans for a rather ambitious restocking program.

The schedule of restocking is being studied and the program will get underway in the very near future. The program is of an annual nature and is to be kept up according to desirable stocking programs.

Incidentally, the fishing facilities at Woodtick are available to all Scovill employees. It is not limited to Rod & Gun Club members.

Skeet Field

Skeet shooting has proven to be a year-round sport at Woodtick. Improvements are being made on the houses and traps in preparation for the expected increase in attendants as the weather warms up.

(Continued on Page 4, Column 4)

Our Operations For 1950

Under the heading "Financial Summary", we show the results for the year 1950 with some details as to how they were arrived at. We likewise show an average of the five years, 1946 through 1950. There are so many uncertain factors in business that for our Company a five-year average figure is a much better guide than any one year. The year 1949 was abnormally bad and 1950 was unusually good, and we recovered the loss in capital invested made in 1949.

Last year's sales were the highest we ever made. The payroll and related costs were also the highest. The prices of materials purchased kept rising during the year. The vast expenditures for new equipment made in the last five years gave us the opportunity to make the goods and do so in an efficient manner.

Things are so badly mixed up at present, with shortages of material and government controls, that we do not expect to be able to keep our production up to last year's record.

President

Financial Summary

	Year 1950		Ave. 1946 thru 1950	
	Total	Per \$ of Sales	Total	Per \$ of Sales
INCOME				
Sales of products	\$112,210,295	100.0¢	\$81,481,100	100.0¢

* Also includes payments to retired employees, Social Security taxes, and certain insurance costs for employee benefits that are related to payroll, all as paid without adjustments.

Donated A Pint Of Blood Yet? Mobile Unit To Be Here March 29

Tuesday, March 6th was the third "Scovill Day" at the blood bank. More than enough Scovillites had signed up to meet our quota of 120 pints for the day but, due to colds and gripes, only 79 pints were collected.

Left photo, a few of the donors waiting for their turn to give a pint of their blood. Bill Asevic, of Aluminum Finishing, (in succeeding photos) relaxes

during the process. After it is all over, Bill smiles broadly as he enjoys some refreshments and has a donor pin attached to his collar.

The Red Cross mobile unit will be in Waterbury again on Thursday, March 29. While not designated as a special "Scovill Day" all employees who are interested in donating on that day will be welcome.

Spring

Two days after this issue date, Spring will officially arrive.

While the past winter was not too rough, Spring will be welcome to most of us. Once again golfers will be seen on the links, vegetable and flower gardens will be started, and marbles and baseball will be with us once more. We can shake our heavy clothes and longies and really enjoy nice Spring weather.

However, we should be reminded about some of the dangers of Spring weather. Playing baseball in the streets, and starting brush fires are both dangerous and should be avoided.

So, let us all play safe and enjoy the Spring of 1951.

Pinochle Tournament

Art Denker's men took high score honors on March 8 when they totaled 38,525 points. Erv Honyotski's men were in second place with 38,325.

Francis Holihan of Waterville didn't care to have George Marti walk off with highest individual score for this season so, he also got a double run in clubs. This gave each man 1,500 points.

Individual high score for the evening was taken by Francis Holihan who had 4,880. Art Denker was second with 4,320.

IRA Rifle

The second annual IRA Rifle Championship shoot was held at the SERA Rifle Range on March 11.

Scovill winners are as follows: Les Coley who had top score in Division 2 with a 186—Andy Lynch who took second place in Division 3 with a 183—Morgan Fitzsimmons came in second in Division 4 with 180.

The Connecticut State annual tournament was scheduled to be held on March 16, at Winchester Club House, New Haven. We will enter two teams.

Proper Protection Saves Eyes

Last year, over 900 eye injuries were treated by our hospitals. Through good fortune and the use of many shields and safety glasses, only three of these injuries were serious enough to prevent employees from immediately returning to work.

Many jobs make chips or splashes of liquids, but there is eye protection for every condition and, where it is

needed, it is supplied by the Company without cost to the employee.

Never work with your eyes exposed to a hazard. Talk to your supervisor or foreman about eye protection if you feel there is any danger to your eyes and always wear equipment issued to you for eye protection.

You can walk on a wooden leg, but you can't see with a glass eye!

Luigi Marinaccio, North Mill, is a firm believer in eye protection. Here he operates an "overhauling" machine, watching the job through a shield which the North Mill had made recently by our Tin Shop. The guard keeps the brass chips out of his eyes. Little guards like this prevent serious injury.

Survival Under Atomic Attack

(The material in these articles is from a report by the Civil Defense Office, a part of the National Security Resources Board.)

No. 5—What About Radioactivity?

In all stories about atomic weapons, there is a great deal about radioactivity.

Radioactivity is the only way—besides size—in which the effects of A or H bombs are different from ordinary bombs.

With the exception of underwater or ground explosions, the radioactivity from atomic bursts is much less to be feared than blast and heat.

Radioactivity is not new or mysterious. In the form of cosmic rays from the sky, all of us have been continually bombarded by radiation every hour and day of our lives. We all have also breathed and eaten very small amounts of radioactive materials without even knowing it.

For over half a century doctors and scientists have experimented and worked with X-rays and other penetrating forms of energy. Because of all this experience, we actually know much more about radioactivity and what it does to people than we know about infantile paralysis, colds, or some other common diseases.

It is easy to understand how radioactivity works if we think of how sunlight behaves.

In the northern part of the world, winter's slanting sun rays seldom cause sunburn, but the hotter rays of the summer sun often do.

Still, just a few moments in the

Rod & Gun Club

The regular monthly meeting of the Rod & Gun Club was scheduled for tonight, March 19, in the Spencer Block third floor conference room.

The Club's annual banquet will be held at Doolittle Hall on April 5. Tickets may be purchased from Club officers or committee members.

mid-summer sun will not give you a tan or sunburn. You have to stay in its hot rays for some time before you get a burn. What's more, bad sunburn on just the face and hands may hurt, but it won't seriously harm you. On the other hand, if it covers your whole body, it can make you very sick or sometimes even cause death.

In the same way, the harm that can come to you from radioactivity will depend on the power of the rays and particles that strike you, upon the length of time you are exposed to them, and on how much of your body is exposed.

Broadly speaking, atomic explosions produce two different kinds of radioactivity—"initial" or explosive radioactivity, and "lingering" radioactivity. These will be described in an early issue.

How Is Radioactivity Detected?

While we cannot see, hear, feel, smell, or taste radioactivity, its presence readily can be detected with Geiger counters and other instruments. However, you won't have to know how to use one of these.

You can rely on your local radiological defense teams—a small specially trained corps of "meter readers"—to warn you of the presence of lingering radioactivity. You can also count on them to see that firefighters, rescue workers, and other people who may have to enter contaminated places do not remain there long enough to be injured.

Always remember our sunlight comparison. There is usually a whale of a difference between detectable and dangerous amounts of radioactivity.

The rays and particles from an ordinary, luminous-dial wrist watch will cause a roar in the earphones of a Geiger counter, as just one example.

Our Retired Folks

The meeting of March 6 was indeed a fine one. The weatherman smiled down on us and all who attended were "glad we came". Vice-president M. L. Sperry spoke to the group on his recent visit to several islands in the Pacific. The slides and his commentary were really enjoyed.

We were sorry to hear that some of our "regulars" were among the missing due to joining the many others in town who had met up with colds.

Belated congratulations to *Bill Greenwood* and the Mrs. on their 53rd wedding celebration. We hear it was quite a celebration — and surprise — too.

May Carton is resting a bit easier now. She's in St. Mary's Hospital, suffering with a broken shoulder bone, sustained when she was struck down by a car on Cherry St., on March 3. Best wishes for a speedy recovery.

We're glad to report *John McAvoy* is at home, feeling much better. He had been in the hospital since December when he was hit by a car.

Around The Plant

By *The Roving Reporter*

JOHN ENSMINGER, Atlanta Office, became the father of a second child (another boy) on March 3. *FRED ENSMINGER* of Engineering and *VICTOR HEDBERG* of ASM Sales are the proud grandfathers.

We're sorry to hear of the death of *JIM McALOON* of our New York Office who was killed in an automobile accident recently.

Introducing the new *GREEN SPOT Weather-Matic Sprinkler* which we began distributing to our wholesalers on February 19, 1951. It is attractive in appearance with its green base, green numerals on a yellow band and chrome-plated head, arms and nozzles. *Martha Laporta* (left) of Shell, packs one for shipment.

Ten-Year Awards

JOSEPH DONAHUE, Dallas, March 6; *JOHN CROCE*, Telephone, VINCENT GELBOGIS, Hot Forge, *JOSEPH ZANOVICH*, Button Tool, March 7; *GEORGE DEWS*, Electrical Testing Lab, March 10.

JAMES BEE, North Mill, March 11; *JAMES VENEZIANO*, Electrical, *FRANK WEIR*, East Machine, *CHARLES ANCYP*, Cleaning, March 12; *CARMEN SANTORO*, Drawing, *LOUIS MORROWAY*, Waterville, March 14.

NICOLA SCIANDRA, Wire Mill, March 18; *PATRICK CANESE*, General Stores, *ROSARIO MANCINI*, Press No. 1, March 19.

One of the newest products to be added to the *GREEN SPOT* Line is the Weather-Matic Sprinkler which is equipped with dial-nozzles and ball-bearing action.

The secret of the *GREEN SPOT* Weather-Matic's super-accuracy in releasing proper amount of water for a given area lies in its dial-nozzles which automatically control the speed of rotation. This new feature takes the guesswork out of proper water coverage for specific areas.

As the nozzles (which can be set to water accurately any area from 10 to 50 feet in diameter) are set for bigger areas, rotation is automatically

slowed down, providing correct, uniform water coverage over the area. For smaller areas, less water is thrown out, rotation is automatically stepped up and the area is watered with a finer spray. Thus, harmful washing is eliminated at small-area settings and uniform water distribution is assured at all settings.

The sprinkler's handsome, polished chrome arms spin freely on ball-bearings, for smooth, silent rotation. These ball-bearings and bearing surfaces are of the finest stainless steel and prevent all possibility of jamming.

The Weather-Matic is non-rusting and precision-made with head, arms and nozzles of solid chrome-plated brass. The attractive green-enameled cast-iron base is rust resistant and will not wobble when operating or tip when dragged. This sprinkler is of new and advanced design by our own engineers and has been warmly received by the trade. Due to the shortage of materials, however, we are manufacturing a very limited quantity to put on the market at the present time.

Monday Night Is "Dog Night" At Doolittle Hall

Thirty-six dogs and their masters were on hand for the opening class of the Dog Training Course at Doolittle Hall on Monday, March 5th.

Above are scenes at the demonstration given at the Hall on Feb. 27th. *Ed Develiskis* (top left with his collie) of Tool Machine is Chairman of the activity. *Joe McShaine* of Hamden and *Cal Haveland* of Bristol (lower

left with his collie sheep dogs) are trainers.

Rena DeSena, of Slide Fastener, has two dachschunds enrolled in the class (upper right, one works a figure 8 with *Rena's* sister-in-law; both dogs are pictured below). *Perley Wilson* (formerly of Transportation) has enrolled his shepherd (lower right with *Mrs. Wilson*, and jumping the burdle, lower right center photo).

New York Notes

Ed's Note:—the following was composed by a member of our New York Office. It was submitted with a note that .03¢ in copper coins (even in this day of copper shortages!) will be awarded the one who guesses its author.

In view of our story on the Weather-Matic Sprinkler, this seems an ideal time to use this masterpiece.

The Green Spot Line

A guy who got a Weather-Matic Has bells aringing in his attic, His feelings are just that ecstatic.

This gem produced by Scovill brain, And ably sold by one Sam Main, Will grow that grass once more again.

Too bad the war will slow you up, As here's a fine young growing pup That would o'erflow your joyful cup.

Excuse this morning aberration, It's only done in admiration— And, also, shows appreciation.

In Military Service

Theodore Barkauskas, Mill Time
Jack J. Everett, ASMD
James Flynn, Slide Fastener
Evon Gelinas, General Stores
William T. Mischou, Gen. Trng. 2
Joseph K. Owens, No. Mill Rolls
Richard Trepanier, Tube Mill

Retired Folks Enjoy Colorful Slides Of Pacific Islands

Our Retired Folks' Club was treated to some unusual views of several Pacific Islands recently.

Vice-President M. L. Sperry visited the islands recently, shortly after a volcano had erupted on one of them. Among the colorful slides he showed, and commented on, were some showing the lava still flowing down the mountain sides and several "potholes" in which the lava was red-hot.

Gosh, looks like the ladies were out of camera range!

Girls' Club News

By Barbara Gedraitis

Stork Club

A baby girl, Kathleen Ann, was born to JEAN (TURNBULL) FITZGERALD, formerly of CTO, on March 2 . . . on the same day, LUCY (GUARRERA) WOLFF, formerly of D&C Sales, presented hubby Ned, of Estimating, a second son—Edward Louis 2nd. Congratulations to all.

Vacations

LORAIN DE LAGE, Billing, and DOROTHY BERNIER, B&F Sales, went to Green Mountain Inn in Stowe, Vermont for a bit of skiing.

ADELE YAKULEVICH, Slide Fastener, took a trip to sunny Florida.

Odds 'n Ends

Au revoir and good luck to SHIRLEY BOISVERT, CTO, who left recently on a new adventure. SHIRLEY has joined the armed services.

Our deepest sympathy to the family of HELEN QUILTER LOY of ASMD who died recently. HELEN was an ardent Girls' Club member for many years.

Club Notes

March 28—is the date for our Spring Card Party. In addition, a Chinese Auction will be held. Come on along, it's loads of fun and you may win from one to 25 prizes!

Sunday, April 29—our big event—the annual banquet. Yes, it's going to be held on Sunday this year, at the Hotel Elton at 5:30 p.m.

It isn't any too early to get your tickets for either of these events. See your nearest council member or the Entertainment Committee.

Old-Time Album

About 12 years old when this picture was taken, this young lad has been with Scovill approximately 23 years. First coming in as a mail boy, he has worked himself up to a title. He's a familiar figure throughout all sections of the plant.

3 to 5 unfurnished rooms with or without heat for 2 adults. Call 4-0659. 5-room rent for 3 adults and one 8-year-old girl, excellent references. Call 5-0603.

TENANTS WANTED

Large bedroom with sunporch. Call 4-5669.

OTHER

Will pick up old newspapers, rags, etc. free of charge. Call 5-9097.

By Dom Polo

Andrea Ann is a new-comer to CHARLIE VAUGHAN'S house. Congratulations to you and the missus, CHARLIE.

ALCIDE BOUCHER and the missus celebrated their 30th wedding anniversary in style while they were in New York City. The best of luck, and may you have many more.

On March 3, HAROLD SANDERS took the fatal step. He was married in Stratford, Conn. Congratulations and best wishes, HAROLD.

LUCIAN ARRINGTON, BENJAMIN RYKOWSKI, CARMINE DAMIANI and DALLION WHITLEY are fashion conscious. They had to go and catch the flu like everyone else.

Our deepest sympathy goes to EGIDE DUMONT who lost his father on Mar. 9.

Life Out East

By Harry Shewbridge

In view of the fact that colds are so prevalent these days, I would like to pass on a recipe for breaking one up as given to me by the renowned medical advisor ANTHONY SEBASTIAN. Take a small clove of garlic each day and chew it for ten minutes. You may enjoy the fiery stuff, and it may break up the cold, but believe one who knows, you'll lead a lonely life and even your best friends will tell you why! When I tried it, my wife packed her bag and went to Maine for two weeks.

And speaking of northern climates, I understand that PAT MULLEN took lessons from a French instructor while in Canada recently. Some folks on the 6th floor want to know what kind of lessons. How high can you raise an eyebrow?

And now for the orange blossom special of the week—JULIAN KOSOWICZ, Slide Fastener, got married on February 3. . . . ANNA ASSIF, Slide Fastener is to be married on April 14 (have you seen the ring?) . . . JOHN BARTOLINI will take the step on the same day. . . . there are two more "to-be's" in Chucking — MARY PETRUCCI on May 12. . . . THERESA BRENNAN on June 2. . . . and finally, but not least, NANCY MULLEN, Slide Fastener, (and so young!) is to be married on June 11. So whether you like it or not, I can faintly hear the bells of Spring and see the sweet young things marching down the aisle.

Cribbage Doings

The last night of this season's play of the Cribbage Tournament was held on March 13. Individual high was taken by Henry Nault and Ed Meafski who had 1,461 points.

The American League won the third round by 20 points and a total of 36,340. The Nationals took the first two rounds.

On March 20, the SERA cribbage men will meet their Chase opponents at the Chase Country Club in the annual home and home contest. The Chase men will be guests of the SERA players at the SERA Clubhouse on March 27.

Two Men Succumb

DENNIS O'SULLIVAN, retired, died on March 7, 1951.

Mr. O'Sullivan had almost 45 years of continuous Scovill service when he was retired on February 1, 1951. He had been in the North Mill throughout his years here and was a supervisor in the Finishing Division for many years.

MICHAEL KRAMARCSIK, retired, died on March 13, 1951.

Mr. Kramarcsik first came to Scovill on May 6, 1909 and had 40 years of continuous Company service when he retired in 1949. Since 1930, he had served as a machinist in West Machine. Other departments in which he had been employed are Tool & Machine, Button Tool and General Training.

Woodtick Activities

(Continued from Page 1, Column 2)

Children's Day Camp

The Day Camp will start as usual soon after schools close. Camp schedule will be the same as it has been for the past three years, with plans to accommodate employee children, 6 to 12 years of age, inclusive.

Detailed information will be sent out later but interested parents may contact the Office at any time regarding the Day Camp program.
