GRIPPER Snap Fasteners Featured In New Jersey Show

Here's the Scovill display at the Knitting Arts Exhibition held in Atlantic City recently. The phrase on the display, "When you're buying Snap Fasteners, it pays to

take a closer look", is cleverly illustrated by the eyeglasses. The lenses portray youngsters wearing knitwear which use GRIPPER Snap Fasteners.

Memorial Day Shutdown

Main Plant

Memorial Day falls on Saturday this year and will be observed on Friday, May 29, 1953.

Except in cases where individual employees or departments are notified to the contrary, the Main Plant will be closed at the start of the first shift on Friday, May 29, and will reopen with the start of the first shift on Monday, June 1. Employees regularly paid on Friday will be paid on Thursday, May 28.

Waterville Division

The Waterville Division will close at the end of the second shift on Thursday, May 28, and will reopen at 7:00 a.m. on Monday, June 1, excepting those cases where individual employees or departments are notified to the contrary.

Memorial Day is one of the seven holidays for which employees on the factory payroll are paid when they do not work.

Retirements

EMILE TOSCANO, Chucking Tool, retired from active Scovill service on May 4, 1953.

Mr. Toscano was hired in 1910, and has a continuous service record since January 12, 1915. At the time of his retirement, he was serving as a toolmaker in Chucking Tool.

MICHAEL SPILLANE, Wire Mill, retired from active Scovill service on April 6, 1953.

Mr. Spillane has 27 years of continuous Scovill service. Always in the Wire Mill, he was a service man last February when he left due to illness.

DOMENICO SANTAGUIDA, North Mill, was added to the Special Retirement List as of April 29, 1953.

Mr. Santaguida was hired on April 14, 1915, but worked intermittently until 1920 when his continuous service record started. He was employed as a locker room attendant in North Mill Rolls at the time of his retirement.

CESARE VIGEZZI, Casting Shop, was retired on May 4, 1953.

Mr. Vigezzi first came to Scovill in November 1916, and has a continuous service record since 1920. Except for a short period in the Steam Department, he has always been in the Casting Shop where he served as an Alligator Shears operator.

ROBERT MONNERAT, Manufacturing Tool, retired on May 13, 1953.

Mr. Monnerat has been with Scovill continuously for 43 years. He has always been in the Tool Division. When he left the Company last November because of illness, he was a toolmaker in Manufacturing Tool.

Blood Donor Program

More than a year has passed since the Employees' Blood Donor Program was adopted by Scovill employees. Dividing the plant into four sections, each group has been called on to donate a unit of blood.

However — once is not enough! Even if an armistice takes place in Korea in the near future, the need for blood will still be urgent in our military hospitals, as well as in our civilian hospitals and to help prevent the crippling effects of POLIO.

The second cycle will start with the visit of the Blood Mobile Unit to the old Foreman's Clubhouse on Thursday, May 28. Employees of the Manufacturing Division departments which make up the first group will be asked to donate at this time.

Departments involved include:— Mfg. Eyelet and Tool, Gripper Eyelet and Tool, Burnishing, Closing and Tool, Cutting and Tool, Japan, Tool Room #1, Hardening, Mill and Grinding, Button Tool, General Training #1, Press 2 and Tool.

Also, Lipstick, Lacquer, Lacquer Wash, Aluminum Finishing, Stamp, Model and Button Model, West Machine, Button Eyelet and Tool, Trim & Knurl and Tool, Electric Shell and Tool, Buff #1, Repair Room and approximately 170 office employees.

(Continued on Page 2, Column 2)

Greensboro Office Moves

Our office in Greensboro, North Carolina, was moved to its new location on May 15. The present address is 1108 East Wendover Avenue, Greensboro. The telephone number is 6186. All mail should be directed to PO Box 1882.

Woodtick Recreation Area

The Woodtick Recreation area will open officially on Friday, May 29, for another fun-packed season for Scovill employees and members of their families. The recreational facilities offered at Woodtick hold something of interest to all our employees.

Whether it be fishing, swimming, boating, picnicking, walking, or just plain loafing, Woodtick has the facilities. For the home gardener who wants to stake out a plot of ground to raise vegetables, there are still a few plots left for cultivation. Competitive sports as softball, horseshoes, bocci, volleyball, rifle and skeet shooting are provided also. And, for the small ones, there is the Day Camp with a well organized and supervised program.

As a Scovill employee, all these facilities are available to you and members of your family. There is fun for everyone at Woodtick. Why not go out there often for enjoyment and relaxation?

Adam C. Curtin
Vice President

GREEN SPOT Sprinklers Keep Center Green

Supt. of Parks James J. Curtin (right) and Jim Bayard, of the Scovill Advertising Dept., watch the operation of several GREEN SPOT sprinklers which the Company has donated to the City of Waterbury.

In the foreground are three multiple sprinklers especially designed for new lawns and slope areas which require a fine spray. The sprinklers will be used on the Green and in other areas served by the Park Dept.

We Will Keep The Faith

This month we celebrate Memorial Day and pay homage to our departed loved ones. Memorial Day was known originally as Decoration Day and was set aside in honor of our soldiers killed in the Civil War — and subsequently also in honor of those who fell in all wars.

Graves are decorated, church services are held and many communities celebrate with parades. This generation has gone through two World Wars and is at present going through what is war in everything but the official declaration.

Our sons, brothers and husbands have been, over the years, and still are fighting for us against aggressive nations with a loyalty that must be maintained at all costs.

So, on this Memorial Day let us once again offer our prayers to the end that the present World Conflict will soon end and that Peace will be with us again.

WE WILL KEEP THE FAITH

Fishing Notes

By Jim Littlejohn

A nice string of Perch and Bullheads were found floating on the water at Woodtick recently. Wonder who lost them? One of the Perch was a sure prize winner so perhaps the owner will be more careful next time.

Please don't leave your boat away from the dock when you have finished fishing. It will save Les Hart a lot of trouble trying to locate it.

Heard that Walter Wood is studying pictures of different fish these days. He wants to make sure he'll know it's a Bullhead and not a Trout when he hooks one. However, Walter, some nice Trout are still being caught at Woodtick.

Heard, too, that Bill Armour caught a nice 18" Trout.

Joseph DiSalvo, Gen. Trng. #1
William Eberle, Gen. Trng. #1
James Norton, Jr., Bulletin Office
Michael Ryan, Jr., Gripper Eyelet

Blood Donor Program

(Continued from Page 1, Column 4)

Information sheets and pledge cards will be distributed to these departments. The pledge cards must be returned no later than May 26, and reminders will be sent to all pledgers on Wednesday, May 27, giving the exact time.

Good Mechanics Avoid Hand Tool Injury

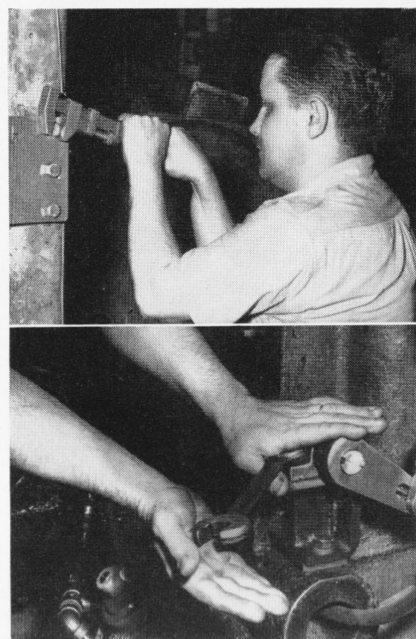

The pictures below show two hand tools which will never be replaced by machine age automatic devices. The monkey wrench (upper photo) and the end wrench (lower photo) are the most regularly used wrenches.

These are also the most abused hand tools and, therefore, send hundreds of employees to our hospitals every year for "busted knuckles" or something more or less serious.

Here are the main reasons why these injuries occur:

1. The wrong wrench for the job — is usually too small or too large.
2. A bad order wrench — nine times out of ten it has sprung, open or worn jaws.
3. A slippery, greasy wrench — held in the same kind of hands.
4. Excessive jerking force on the wrench in close quarters.
5. Pulling with the jaws the wrong way. Jaws should pull onto the nut.

A good mechanic avoids injuries with wrenches by remembering these hazards and eliminating them.

Take It Off!

By Robert W. Butler, M.D.

There is nothing easy about taking off weight, and the longer you've been overweight the more difficult it is. It requires courage and perseverance, a lot of exercise (of your will-power, that is) and in the process you'll have some discomfort and discouragement. It may be that you'll have to change eating habits of years — possibly generations.

If you're not discouraged already, here are some things to remember:

The first three weeks of a diet are very hard to take, and the second three weeks are hard; but if you go for six weeks without cheating (cheating is fatal in this business) your troubles are over. Don't forget that this is a 21-meal-a-week schedule. One meal of the kind you'd like on Sunday, will put back all the weight you lost during the week.

Don't expect or try to take off too much too quickly, although the first five of the twenty-five pounds you're going to lose will disappear more rapidly than the last five. Diet fads have not proved to be very successful. Twenty pounds in twenty days is too much, and those people who are conscientious with a diet of that kind usually eat the weight they've lost right back on again in short order.

Eat three meals a day, but eat less than you have been eating at each meal, being especially careful about fats, and foods or liquids containing flour or sugar. Alcoholic beverages not only contain sugars, but are likely to stimulate your appetite and throw an added burden on your will-power. Don't try to get by on two meals a day — breakfast is very important.

Don't eat between meals, especially at night. If you feel you must have something, lettuce (no mayonnaise, please) or celery is all right, but nothing else.

Pills may or may not be a safe help for you, and they may be positively dangerous. The fact that some friend's doctor has prescribed them, or that several of your friends have taken the same kind of pills doesn't make them safe for you. After all, your friend's probably not the same year, and certainly not the same model! Unless you enjoy flirting with real danger, take no medicine of any kind unless it has been prescribed by your doctor after an examination.

Keep a record of your progress. Weigh yourself at the same time of day and on the same scale, but once a week only. After you've taken off the first pounds you may go a week or ten days at a time without losing an ounce; and then overnight lose a pound or two.

Take it off the hard way and you'll have no trouble keeping it off—and you'll be surprised at how much better you'll feel.

Let's eat less and live longer!

Family Album

Vinal Shaw Duncan, Jr. was just a few days old when this shot was taken, last February. His dad, Vinal, Sr., is a trainee in General Training #1. Grandma Helen Giarlella is of Solder and formerly of ASMD.

Life Out East

By Harry Shewbridge

I am writing this issue's column on Mother's Day. It has been quite a day. I went to church with my three best girls—my daughter, my wife and my mother. My son was confirmed and my bald head got sunburned. Hope you had as nice a day as I.

Everywhere are the signs of spring. Building 112, sixth floor, had its annual ice cream festival at tulip time at noon on May 6. Six gals and three boys (?) journeyed to *Art Roberts'* house where they saw a backyard with 1400 tulips in full bloom. They came back completely overwhelmed by the beauty of the sight and each soaked up the benefits of an ice cream cone.

Of course, the race tracks are opening again. You wouldn't believe it but "Hot Shot" *Julie McManus* (East Planning) picked her first horse of the season and it paid \$5.50 to one. That's right, she wagered one dollar and split the bet with some other hard-bitten gambler. All we can get out of *Julie* is how rich she would have been had she bet a \$1000 on the horse—if, if, if.

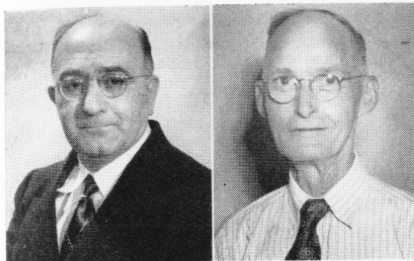

And, by the way, some of that sunshine we're getting Out East these days is from the smile of "Choo-Choo" *Tom O'Day*. *Tom* left the Main Plant Drafting Room and is now an engineer in the Slide Fastener Department.

Finally, as you know, I generally spread rumors about people. This week I want to debunk a couple of rumors with the permission of the principals. First, *Lee Neville* (Slide Fastener) is not leaving. She merely took a week's vacation to coincide with school vacation so she could take care of the kids. Now that the vacation is over, she is back to work again—hardly any the worse for wear.

And, last but not least, there have been persistent rumors that *Alice Moeller* is married. Honest, folks, she isn't. In fact, the lady in question says she isn't even engaged. Amen.

Sales; May 13—*Joseph Romano*, Waterville; May 18—*Angelina Masi*, Aluminum Finish, *Nicholas Santa Maria*, Welding.

SERA Rifle

The first match of the Moon-Lite League took place on April 29, with Cheshire defeating Scovill by a team score of 1995 to 1990. On May 6, the Scovill men took the second match from Bell City, 1992 to 1990.

Matches are held at Lyman Range in Middlefield weekly.

Scoops From Zipper

By Louise Foell

Welcome back to two lovelies—*Florence Rein*, Timekeepers, and *Eunice Grady*, Shipping Office.

Our sincere sympathy is extended to *Laura Denton* and her family on the loss of *Laurd's* father.

Congratulations to *Jean Fredin* and *Dorothy Martin* who celebrated their birthdays this month.

May 30 will be a big day for *Phyllis DiGiovanni* as wedding bells will be ringing at Our Lady of Lourdes Church at 11 a.m. Best wishes to a nice couple.

Slide Fastener is well represented on the Girls' Club Council—*Edith Carolan*, *Kay Ryan* and yours truly.

Louise Zollo, Assembly, is the owner of that brand new 1953 Dodge we see each morning. Happy motoring, *Louise*.

Just a word in this column as to how lovely the Slide Fastener girls looked at the Girls' Club banquet—beautiful girls, lovely hats, fashions galore.

Know Your "Eye" Man

By Walter J. Racicot

Oculist—A Doctor of Medicine who is an expert on diseases of the eye. He tests eyes and prescribes glasses if needed.

Ophthalmologist—A Doctor of Medicine who has some training as an Oculist. He treats diseases of the eyes and performs eye surgery and is known as an Ophthalmic surgeon.

Optometrist—A skilled technician who is trained in measurement of visual acuity, fitting of glasses to correct visual defects. Optometrists cannot treat diseases of the eyes.

Optician—A skilled maker of optical instruments. He grinds lenses for eyeglasses and fills prescriptions for eyeglasses. He may not test eyes unless he is also an optometrist.

Q: My wife and I are expecting our first baby in the near future. Will the baby be automatically covered on our Blue Cross contract?

A: No. As soon as the baby is born, notify Blue Cross or ask for an Application For Addition of Family Member at the Blue Cross Office. The baby's membership will become effective four to eight weeks after the application is returned.

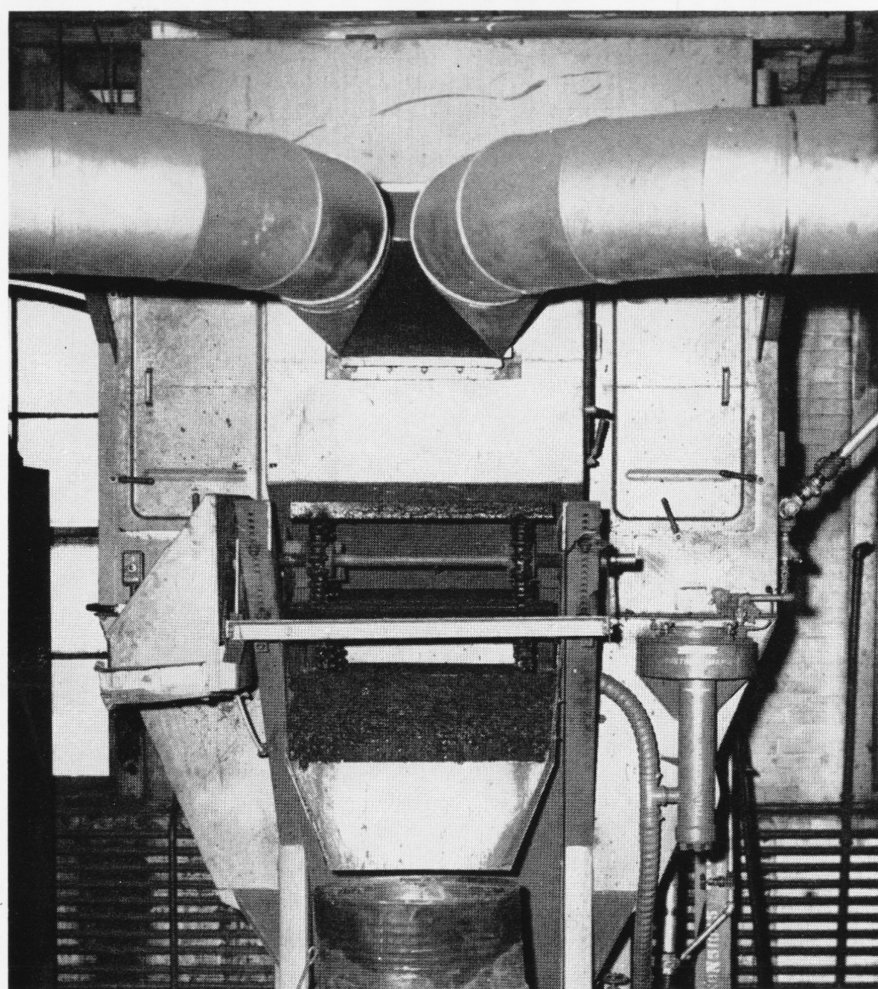

Q: If I cut my hand while working around the house and receive treatment in an emergency out-patient accident room at the hospital, would I be eligible for benefits?

A: Although Blue Cross was set up to pay for bed patient hospital care only, it does pay up to \$10 for each initial visit to an emergency out-patient accident room when care is received within 24 hours of accident.

Q: I have Blue Cross and CMS. When I fill out an application to add a dependent to my Blue Cross contract must I fill out a separate application for CMS coverage?

A: No. Only fill out one application card. This will give the dependent the same coverage as you.

Buff Rooms Have Five New Roto-Clones

Here is one of the five new Roto-Clones which have been installed in the Buff Rooms. The chain-type conveyor is carrying lint and rouge onto the chute which, in turn, empties into the barrel (shown above).

Five new electrically-driven machines have been installed in the Buff Rooms which meet the hearty approval of the employees. Called "Roto-Clones", these machines not only collect the lint and rouge from the buffing machines, but clean the air of this dust and recirculate it in the room. During the summer, the cleaned air will be exhausted outside and fresh air drawn in.

This machine has a sludge settling tank in the base which is equipped with a chain-type conveyor.

Lint and rouge from the buff machines are carried to the Roto-Clone by a suction blower. The Roto-Clone cleans the air by the combination ac-

tion of centrifugal force and a thorough inter-mixing of water and dust-laden air.

Dirty air flowing into the Roto-Clone at a high velocity carries water with it in a heavy turbulent sheet first in one direction; then in another. The centrifugal force within this machine causes the dust particles to penetrate the water film and become permanently trapped. This combined washing and scrubbing of air produces a thorough wetting action so that high efficiencies are obtained with all types of dust.

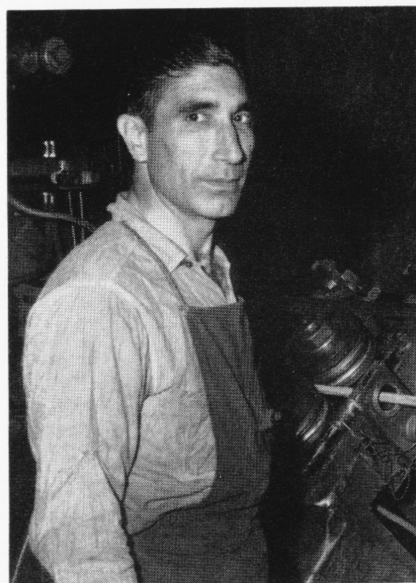

Any moisture carried along in the cleaned air is removed by a specially designed wide-spaced eliminator, made in removable sections. The water in the reservoir is continually reused, no pumps or nozzles are required. The water-level is maintained by an overflow dam; a small amount of fresh water being admitted when needed.

The dust sucked into the Roto-Clone settles to the bottom of the reservoir to be removed as a muddy deposit. This is done by the chain-type conveyor which dredges the bottom and carries the collected material into a chute which empties into a container for periodic disposal.

The cleaned air from the Roto-Clone is returned directly to the room for conservation of heat in winter and conditioned air in the summer.

Suggestion Winners

Credit Union No. 4

Attention of all members is called to the fact that no withdrawals or loans can be made without the presentation of an individual's passbook. If you plan to apply for a withdrawal or loan in person, be sure to check business hours with your treasurer. An employee must be a Credit Union member for 13 weeks before he is eligible for a loan or withdrawal.

All members who have not had their books audited should place them in the Credit Union box as soon as possible.

Girls' Club Annual Banquet Held At Hotel Elton

Approximately 300 members and invited guests attended the Girls' Club Annual Banquet on Saturday, May 2.

Seated at the head table (top, center) were: Rev. John Yungblut, Waterville Factory Supt. Fred J. Senior, Mrs. E. O. Goss, retiring Club President Betty Affeldt, Speaker Rev. Robert Keating, Mrs. George Goss, Sr., Elizabeth Kelly and Scovill Vice-President C. P. Goss.

Lower right photo:—Newly-elected council members: (seated, left to right) Jo Levenavich, Mollie Collins, Ruth Lobley, President Ruth Tourangeau, Betty Colbassani. Standing: Vice-President Kay Bannon, Treasurer Mary Petrucci, Edith Carolan, Jessie Ciarleglio, Secretary Dorothy Budris, Margaret Gorman. Absent: Catherine Ryan, Louise Foell, Angie Cedela, Cleo Read, Nina Lago.

Arrangements for summer activities will be made at the monthly meeting on May 19, at 8 p.m. in the Spencer Block (third floor conference room). Sorry that there will be no movies but a card game is planned for after the meeting.

Four Succumb

TRACY SMITH, retired, died on April 30, 1953.

Mr. Smith's Scovill service started in 1911, when he was an engineer in a downtown office. He came to Scovill as Consulting Engineer on July 1, 1931. At his retirement on July 1, 1949, he was serving as an electrical engineer.

LEON SANGLARD, Milling & Grinding, died on May 1, 1953.

Mr. Sanglard first came to Scovill in 1918 but, due to several periods away from the plant, his continuous service record started on April 16, 1951. At the time of his death, he was a grinder in Milling & Grinding.

FRANK MAZZEI, retired, died on May 10, 1953.

Mr. Mazzei had completed over 28 years of continuous Scovill service when he retired on February 1, 1950. Always in the Waterville Buff Room, he was employed as a buffer at the time of his retirement.

GEORGE F. HODGES, retired, died on May 13, 1953.

Mr. Hodges was hired on June 7, 1887, which is also his continuous service date. At his retirement on May 1, 1929, he was a clerk in the Time Office.

Classified Ads

(These ads are published as a free service to all Scovill employees. They are to be submitted in writing or brought in to the Bulletin Office. Telephone calls for ads cannot be accepted. Written ads must bear employee's name, department name and check number. The deadline for all ads is the Wednesday noon preceding the issue date).

FOR SALE

Accordion with two right hand switches and one bass switch, cost \$295, will sell for \$195, practically new. Call 5-9690 after 4 p.m.

21" Caldwell power mower, \$45. Call Woodbury 496-J 5.

Sealey (Sleeper bed) love seat which is practically new and in excellent condition; parlor rug with cushion, 9 x 12; bed, mattress and bureau; screen door, like new; small kitchen table with two chairs. These articles must be sold as house is to be torn down to make room for new highway. Call 6-4539 after 3 p.m.

Two metal Simmons twin beds, complete. Call 5-5737 after 4 p.m.

Two-year-old singing canary with cage and stand, \$10. Call at 36 Ash Street from 6 p.m. to 7 p.m.

Portable tape recorder, "Brush" sound mirror, semi professional; 10X JR target spot. Call Dick at ext. 2179.

White enamel Florence combination oil and gas kitchen range, reasonable. Call 2-3690 after 4 p.m.

Cabinet sewing machine which has never been used because of illness, cedar chest. Call 4-9284.

Kitchen gas range, screen door, kitchen table with six chairs. Call 3-7728 or inquire at 29 Howard Street.

RENT WANTED

Three or four unfurnished rooms for young couple with no children. Call 6-9326 after 4 p.m.

Four or five furnished or unfurnished rooms for couple with two children in Waterville or surrounding towns, moderately priced. Call ext. 589 or 2297.

TENANTS WANTED

Four rooms on 99 Alma St., first floor for working couple. Has bath, three clothes closets, hobby room in basement, stove, refrigerator, cooking gas, automatic furnace heat, electricity, continuous hot water—\$25 per week. Will be vacant the first part of July. Will redecorate or compensate tenant for redecorating. Call 3-6961.

WANTED TO BUY

Girl's 24 or 26" bicycle. Call 4-5309.

Woodtick Opens May 29

The summer season will open officially at Woodtick on Friday, May 29, and every effort has been made to make the area the ideal recreational spot for employees and their families.

Each Main Plant and Waterville Div. employee will receive an "Employee Pass" at his work place. These will be distributed by the Employee Activities Office, together with an application blank for associate passes.

As soon as the employee properly fills in the blank and returns it to the office, "Associate Passes" will be issued for members of his family. These will also be delivered to him.

Garden Area—the plots have been plowed and harrowed, a few plots are still available.

Fishing—the main reservoir has been a beehive of activity since the fishing season opened.

Departmental Picnic Area—departments and groups are now signing up for their annual outings; the factory building has been cleaned up for dancing.

Day Camp—the facilities are being readied for the opening of the Children's Day Camp (ages 6-12) early in July.

In Service

Pfc. Nicholas Palladino is with the Armored Tank Division in Korea. He's been in the Army for nine months. His dad is Louis of the Waterville Plating Room.
