Published by the Scovill Manufacturing Company for its Employees.

Vol. XXXIX

June 6, 1955

No. 11

## How Answer This One?

A good many of those who work in the metal industry work on items made on contract for a particular customer. Suppose they were working on items for the Christmas trade. The orders would probably be placed in the early summer. Tools would be built — and the orders would be delivered complete not later than early November so the items could be distributed to retail outlets before the Christmas buying season.

In a particular manufacturing company anywhere from a few to many hundreds of people are occupied on such seasonable work. The manufacturer cannot make the tools before he gets the order and specifications, and in almost all cases the order would not be repeated.

Now suppose a manufacturing plant that has always furnished considerable employment through such seasonable contract work is faced with the obligation of guaranteeing work, or pay in lieu of work, to his employees for up to a year after the job they work on runs out.

Will he continue taking such orders? Or will he stop taking such orders?

It seems obvious that a manufacturer, faced with the obligation of paying employees for any period up to a year for no work, could not afford to take such seasonable business.

*Alan C. Curless*  
Vice President

## Suggestion Winners for May

The Industrial Improvement Committee announced the following awards for suggestions submitted:

**\$25.00**

John Briotti and Domenico Ianniruberto, Cont. Strip Mill, Rolls Div.

**\$15.00**

Domenico Ianniruberto, Continuous Strip Mill, Rolls Division.

Charles Malagutti, Continuous Strip Mill, Rolls Division.

Henry Menard, Maintenance Dept., Millwrights Division.

Joseph Rossi, Continuous Strip Mill, Finishing.

## Group Life Insurance

### Employee Deductions

No deductions have been made from the pay of employees for Group Life Insurance coverage from December, 1954, through May, 1955 as the employee's share of the 1954 refund was returned in the form of suspension of payments.

Deductions will be resumed in June (the third pay day of the month) as the refund will have been exhausted.

**\$10.00**

Paul Doran, Casting Shop, Melting Division.

Joseph Rossi, Continuous Strip Mill, Finishing (for two suggestions).

### Letters Of Appreciation

John Briotti, Cont. Strip Mill Rolls Div.; Anthony Fasano, Gripper Eyelet; A. Morgan Fitzsimons, Chucking; Sidney Frank, Cont. Strip Mill Rolls Div.; Joseph Giattino, Scrap Processing (for two suggestions); Frank Giglio, Rolling Mill No. Mill Finish. Div.; Frank Hira, Scrap Processing.

Joseph Lambo, Trim & Knurl (for three suggestions); Wilmon Mercer, Casting Shop Melting Div.; Francis Minicucci, Gripper Eyelet; Joe Rossi, Cont. Strip Mill Finish. Div. (for three suggestions); Frank Sabis, Casting Shop Melting Div. (for three suggestions); Anthony Strumski, Casting Shop Melting Div.; Fred Teach, Sl. Fast. Assembly.

## Two Retire

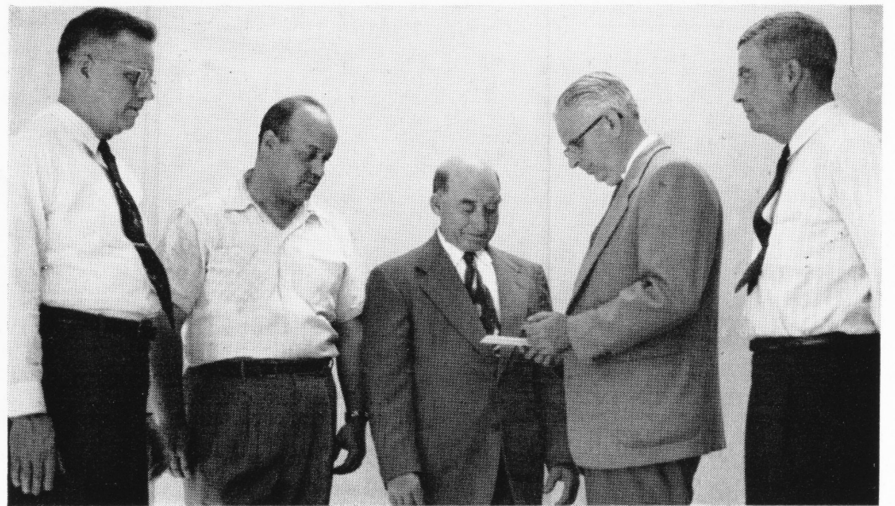

GIUSEPPINA D. GAMBARDILLA, Lacquer Room, was retired with benefits to start May 23, 1955.

Mrs. Gambardella first came to Scovill in October, 1922, and has a continuous service record since September, 1923. Always in the Lacquer Room, she was serving as a racker and unracker when she was forced to leave due to illness in February, 1955.

BERTHA E. NEEDHAM, Central File, was retired from active service as of June 1, 1955.

Miss Needham has a continuous service record of 31.5 years which began when she first came to Scovill in January of 1924. Always in the Filing department, she was a file clerk at the time of her retirement.

## Vito M. Corbo Receives 40-Year Award

Vito M. Corbo, Waterville Annealing Dept., receives the 40-year continuous service award from Plant Manager L. G. Robinson. Looking on (left to right) General Foreman J. A. Muckle and Foreman Joseph Nardozzi; (extreme right) Vice President and Waterville General Manager S. G. Gaillard, Jr.

## New Assignments

### Sales Division

Announced by Mr. P. E. Fenton, Vice President in charge of Manufactured Sales:—

Effective June 1, 1955, Ernest B. Lawton, Jr., has been appointed Sales Manager of the Automatic Screw Machine Products Division. He will be responsible for development of sales and marketing policies associated with Divisions 95 and 96 and will report to Mr. Fenton.

### John Wahl Retires

JOHN WAHL, who headed the Model Making Dept. of our A. Schrader's Son Div. in Brooklyn, New York, for many years, retired recently.

Mr. Wahl has been with the company since 1900 and had served as a model maker under George H. F. Schrader, the man responsible for the development of the modern tire valve. He is the man who turned the first motor valve out of a solid bar of brass for Mr. Schrader.

Mr. S. T. Williams, Vice President and General Manager at Schrader, presented a plaque to Mr. Wahl which read as follows:

This plaque has been prepared and presented to John Wahl in appreciation of his 54 years of Service and for his contribution to the development of Schrader Products.

The Schrader Company and associates at 470 Vanderbilt Avenue, wish him many years of health and happiness in his retirement.

### Engineering Division

Chief Maintenance Engineer T. W. Colina has issued notice of the following appointments, effective May 16, 1955:

Nicholas H. Crochet has been appointed General Foreman in charge of the East and West Machine Rooms, reporting to Superintendent of Mechanical Maintenance A. D. Chaffee.

William H. Rosevear, Jr., has been appointed foreman in charge of the West Machine Room; George Block is foreman in charge of the East Machine Room. They will report to General Foreman Crochet.

John J. Wallace has been appointed Assistant Foreman of the West Machine Room, reporting to Mr. Rosevear.

### Mills Division

Announced by Works Manager, Mills Div., John J. Hoben:

Effective May 16, 1955, Donald F. MacIntosh has been appointed Tool Engineer of the Mills Division, reporting to the Works Manager's Office. He will be responsible for designing, developing and procuring of all tools in cooperation with the Purch. Dept.

## Atlanta Office Moves

The headquarters of the Scovill Manufacturing Corporation in Atlanta, Georgia are now located at 1195 Techwood Drive, N.W.

## Export Appointee Moves

International Brass and Copper Company, Inc., export appointee of Scovill Mfg. Company, has moved to 75 West Street, Room 511, New York 6, N. Y., according to announcement received from its president Carl E. Alfaro.

No. 11

## Woodtick's Tenth Anniversary

Woodtick was first opened ten years ago with the beach, six picnic tables, two fireplaces and a softball diamond. Today there is an abundance of picnic tables, fireplaces, swings, seesaws, merry-go-round, slides and rafts for the children. The condition of the beach has continually been improved upon by the addition of new sand, and the expansive play area now has a beautiful turf.

Immediately adjoining the beach, on the main reservoir, the SERA Fishing Committee in cooperation with the Rod & Gun Club has developed a fleet of 21 rowboats and maintains a stocking program that costs several hundred dollars annually.

With the removal of buildings and additional grading, the parking lot has been improved and now accommodates 375 cars.

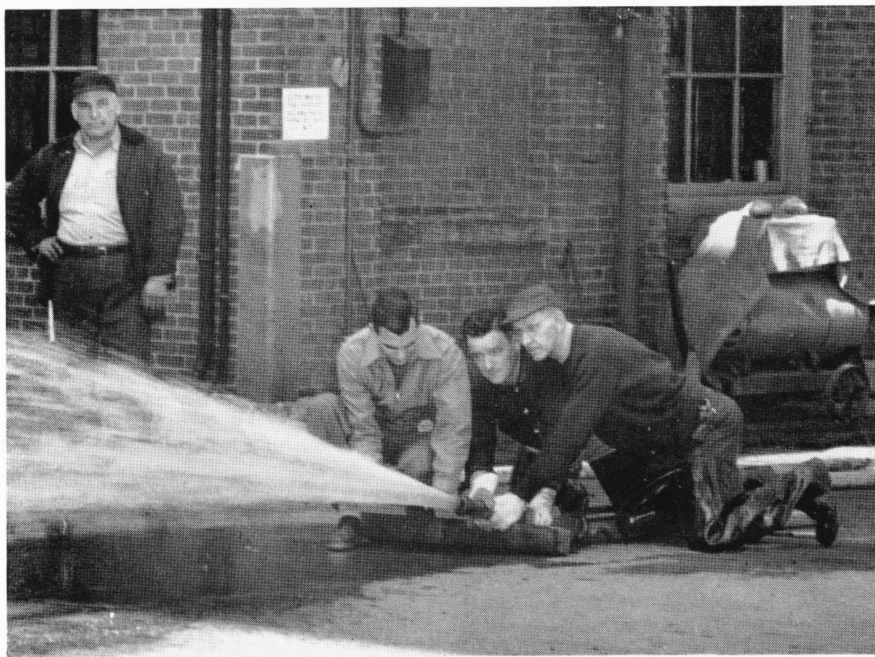

The Departmental and Club Outing Area accommodates 150 people. It is being expanded to provide a large and more desirable play area. This area combined with the Cornelis building, which is equipped with stoves, tables, and benches to accommodate 150 people, provides a highly desirable place for the many group outings.

This building and picnic facility provides for an ideal headquarters for the Children's Day Camp which has developed into one of the most popular activities sponsored by SERA. The youngsters use the facility from 8 a.m. to 5 p.m. Monday through Friday, leaving it available for adult activities on evenings and weekends.

The Garden Area has 100 plots which are planted and harvested by employees; nearby are the popular skeet field and rifle range.

Woodtick has many more possibilities for activities for all members of the family. It is intended to be a place for relaxation and fun. It is not a commercial venture, as an amusement park, for a one day a year visit. It will continue to maintain the highest standards at minimum service charges. It's there for you—make the most of it.

## Scovill Water Supply Rating "Tops"

A Scovill fire crew controls a 2½" hose during a water test conducted in the plant recently: Rocco Guerrero (Pipe Shop), Factory Mutual Engineer Harry Sinclair, Joseph Doran (Garage) and Harold Geigle (Elec.)

The above scene, staged at various points around the plant, brought inquiries as to whether the plant streets were being washed. Indeed not!

A very important part of our fire and plant protection precautions is the yearly test by the fire insurance company of water available for fire fighting and sprinkler operation.

A good fire insurance rating, whether for a plant or a town, requires that there be ample pressure in a water system while heavy hose streams are being used. The test, again this year, gave the plant the highest rating for its water supply.

ing and sprinkler operation.

## Saule Nudegimas - Insolazione - Grille

By Robert W. Butler, M. D.

They have it in every language, but no matter how you say it, or how thin you slice it, it's pretty hard even in these days of super-cosmetics to disguise a blistered beak! And for that statement, brethren, I have the fervent word of some high-class experts: those who have tried more than once and finally gone back to vinegar or goose-grease.

Most of us by this time know how much sun we can take safely, (but keep your eyes on the kids, Mabel) so let's for once keep the dose down and comfort up, shall we? The right dose is good for the health, but too much can be well-nigh fatal. You wouldn't take 50 aspirin tablets at one time to cure your headache, so take no more sun than your body can handle, either.

It's a smart child who doesn't put his hand on the hot stove twice, but a smarter one who'll take your word without further proof that it's a poor thing to fondle; so if you've been lucky thus far, take no chances. You don't want to go to that clambake and have someone trying to break off one of your claws!

So what do you do? First you take your sun in gradually increasing doses until you are thoroughly tanned. Many people can take only five minutes the first time or two, and if you burn easily you'd better keep your watch handy. Remember that the sun doesn't have to be very bright, either. Too many people have been badly blistered on a hazy day when they could look directly at the sun without the use of sunglasses.

Sleep is a great thing, but not on the beach. Who ever went to the beach to sleep, anyway? Time passes very quickly that way, but you'll do little or no sleeping for the next couple of nights, so where is the profit? Blue Cross will take care of most of the hospital bill, but they won't assume the pain—nor will anyone else. You won't even have the satisfaction of having broken a record—because

many another before you has been lifted off the sand and into an ambulance!

Beware of the breeze, because it will fool you; and that's particularly true if you're out in a boat, or driving a car with your arm out there holding the top down. The breeze cools your skin, and it won't yell "Uncle" until long after it's too late. The days of haze or breeze are the most vicious, so beware.

Suntan lotions and creams will help protect your skin, and will help in the tanning process, but they're not the whole story by any means. Without good judgment on your part, they're worthless. You still have to do it gradually—that curvaceous blonde you see in full color in the magazines advertising the stuff didn't get that beautiful tan in one session by any means. You still have to get the tan gradually, and you have to apply the lotion or cream often. Water will wash it off, whether it be salt water from the ocean or from your own perspiration.

A real sunburn can make you real sick, so don't get one. As far as your body is concerned, it makes no difference whether you get it from the sun, a fire, or hot water; the result is the same—so let's be careful, not careless. If your first move is to get careless, your second move is to get the doctor—it might be really serious, and expert help is what, unfortunately, you'll need.

## Picnics At Woodtick

Department and group picnics scheduled for the month of June are:

June 9—Employee Relations  
June 11—Lacquer Wash  
June 14—Industrial Nurses  
June 15—Mill Production  
June 18—Slide Fastener  
June 19—Rod Mill  
June 21—Sales Office  
June 25—Waterville Division

Reservations may be made for the picnic area by calling the Employee Activities Office, Ext. 834.

## Training Course

The following apprentices have completed their training and have received their assignments as follows:

John Cavanaugh  
Electrician  
Electrical Dept.

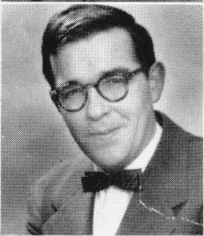

John Clark, Jr.  
Rivetmaker  
Waterville Div.  
Rivetmaker Dept.

Charles Perugini  
Electrician  
Electrical Dept.

Donald Wood  
Toolmaker  
Gripper Eye. Tl.

## "Scoops" From Zippers

By Louise Foell

Edith Carolan and Anna Romano, both of Assembly, recently spent a pleasant holiday at Atlantic City.

Antoinette Rinaldi, Assembly, has left to take up household duties.

Marie Martineau is at St. Mary's hospital. We are all hoping for a speedy recovery, Marie.

Naugatuck High has four new cheerleaders — one of these, none other than "Cookie" Kinch daughter of June, Assm.

Seen walking down East Main Street, Mary Kisonas, Finishing, eating a popsicle — that's one way to beat the heat.

Best of luck to Frances Schifiliti, Assembly, and family in their new home.

Johnny Dunn, son of Mary, Salvage, has "dood it" again. He pitched Leavenworth High to a victory of 9 to 1, beating Naugatuck High. Watch for Johnny at our recreation area this summer — he's the tall, handsome lad.

Herb Robertson, Tool Room, has been getting tips from his co-workers on how to be happily married. He took the plunge on Saturday, May 28. Best of luck to Herb and his bride.

## Six Succumb

PETER DLUGOLECKI, retired, died on May 14, 1955.

Mr. Dlugolecki had a continuous service record since October 6, 1942, the day he first came to Scovill. Always in the Steam Dept., he was serving as a coal man when he retired in August, 1954.

WILLIAM G. PARSONS, retired, died on May 17, 1955.

Mr. Parsons was first hired in July, 1916, and had a continuous service record of over 35 years. Always a machinist, he was serving in the East Machine Room at the time of his retirement in March, 1952.

DAVID A. LYONS, Process Engineering, died on May 19, 1955.

Mr. Lyons first came to Scovill in May, 1915, and had a continuous service record of 40 years. He was serving as a process engineer since January, 1955, prior to which he was a foreman in General Training No. 2.

EARLE A. WHELAN, Button Packing, died on May 27, 1955.

Mr. Whelan first came to Scovill in January, 1951, and had a continuous service record since June of that year. Always in Button Packing, he was serving as a floor man at the time of his death.

HENRY ZMYEWSKI, retired, died on May 27, 1955.

Mr. Zmyewski was first hired in July, 1919, and had a continuous service record since January, 1925. He served in various departments until 1927 when he went to the Casting Shop. Mr. Zmyewski was serving as a barrel man when retired in June, 1953.

JAMES A. BROWN, Waterville, died on May 29, 1955.

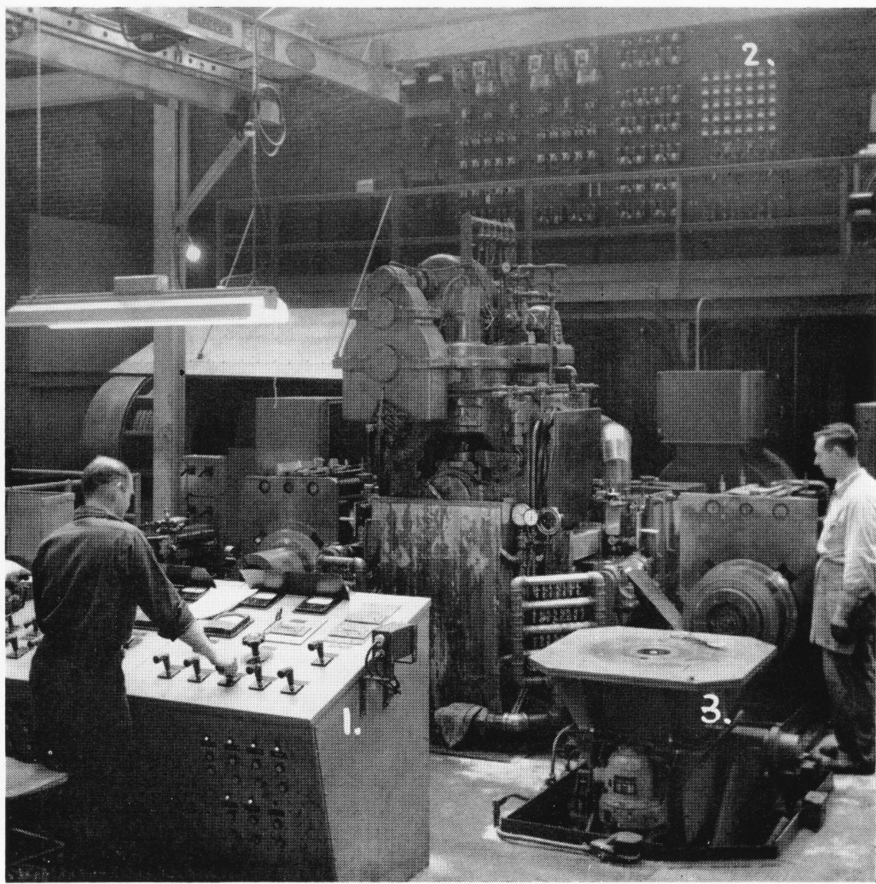

Mr. Brown came to Scovill in June, 1928, and had a continuous service record of over 25 years. He served in the Main Plant until 1942 at which time he went to the Waterville Division, where he served as a grinder in the Tool Room, until his death.

## Inter-Dept. Softball

Team standings as of May 28:

	Won	Lost
General Training #2	2	0
Slide Fastener Tool	2	0
Lipstick	2	1
General Training	1	1
Gripper Eyelet	1	1
North Mill	0	2
Drafting	0	3

## Morgan 4-Hi Reversing Rolls

The Morgan 4-Hi Reversing Rolls is in operation under the watchful eyes of Robert Miller at the control table (1) and Eugene Minicucci, who has completed the preliminary operations. Also shown is the panel (2) which is recording all the operations and conditions of the machine and the side table (3) on which the operation is completed.

In the Rolling Mill, North Mill Rolls Division is a section called the 4-Hi which boasts a Morgan 4-Hi Reversing Rolls. There is only one other like it in Scovill. The Morgan Reversing Rolls is an automatic operation which eliminates much handling, thus being a time saver—and because it is automatically controlled it insures correct work at all times, such as not leaving heavy centers in the bars which sometimes results in the older type machines.

This section is made up of: the machine which has 4 rolls—2 big backing up rolls and 2 work rolls, thus the name 4-hi; a control table, as the name indicates, controls the tension, pressure, heat, etc. as the metal passes through the machine; the panel which records these conditions is sometimes known as the fault finder because if the mill is not working as desired the dials are checked and the trouble is usually easily found; and the side tables which is the last step in the operation, winding the bar automatically on a spool.

To begin the whole operation, the bar which comes from the Strip Mill is fed through the machine and inserted in an expansive block; a portable guide is put on the bar for the first passing; pressure pads containing oil are applied—this cleans and lubricates the bar as it passes through the machine; bridle rolls are released to hold the tension on the bar, keeping it steady; tension and directional controls are set, completing the preliminary operations.

As the metal goes through the machine, tension, pressure, heat, etc. are controlled from the control table, plus the recording of such things as the number of wraps around the expansive block for one bar. At the same time the panel begins all its recordings.

After the first passing the pressure on the pressure plate is released, the guides are removed, the controls on the table are reversed and the bar goes through the machine from the opposite direction without the need of resetting or any handling whatsoever.

The tension and number of passings depend upon the metal — the bar may

be passed through the machine anywhere from two to five times before the desired gauge is obtained.

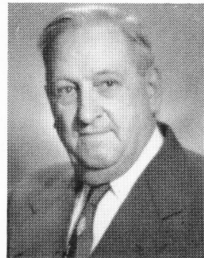

Completion of this operation puts the side tables to work. There is a table on either side of the machine so that it makes no difference on which end the last passing is completed. The table falls on its side and a large spool sticks out almost connecting to the expansive blocks. The bar is cut and placed on the spool and then automatically wound around it. When this is completed, the table is put up again and a band is placed on the metal holding it intact.

The bar is then weighed and sent to either the stockroom, the muffles or to the finishing section for the next operation.

## Service Awards

### Forty Years

William F. McCasland, Sr.  
East Machine  
June 1, 1955

Vito M. Corbo  
Waterville  
May 25, 1955

### Twenty-Five Years

Anne G. Bulzgis  
Transcribing  
June 2, 1955

### Ten Years

May 20—Flora C. Weymer, Chucking; May 21—Lauren S. Wood, Hardening Room; May 25—Edmund V. Kissel, Tinsmiths; May 29—William J. Serrell, Repair Dept.; May 31—William H. Barth, Mill & Grind.

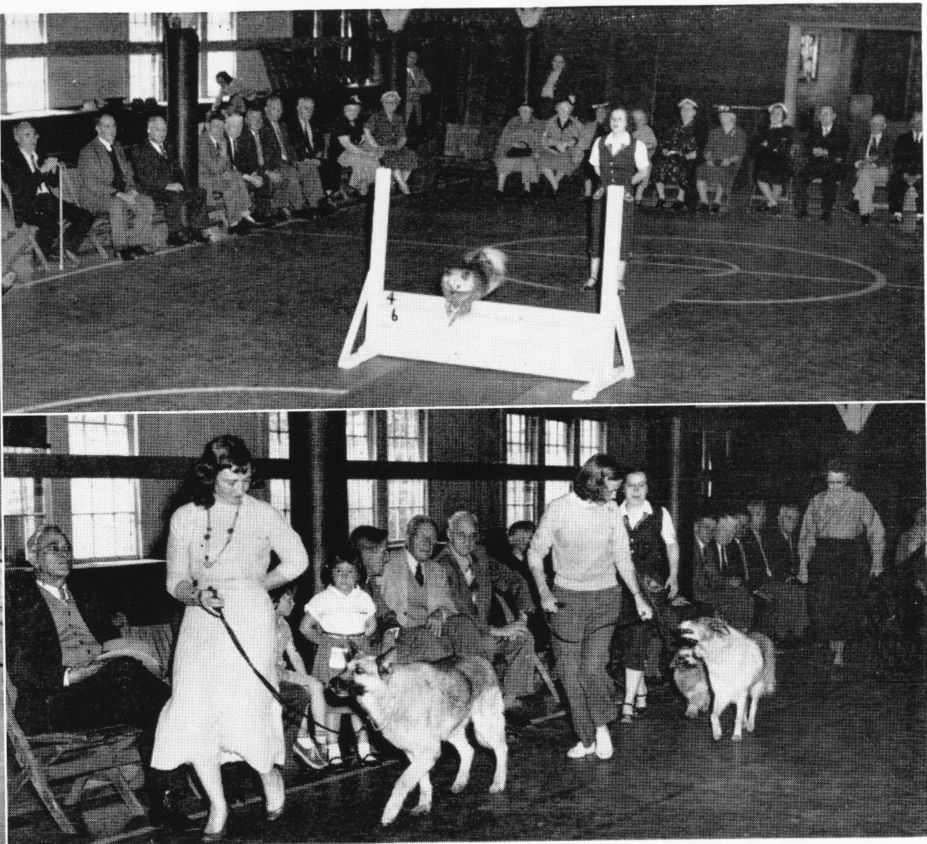

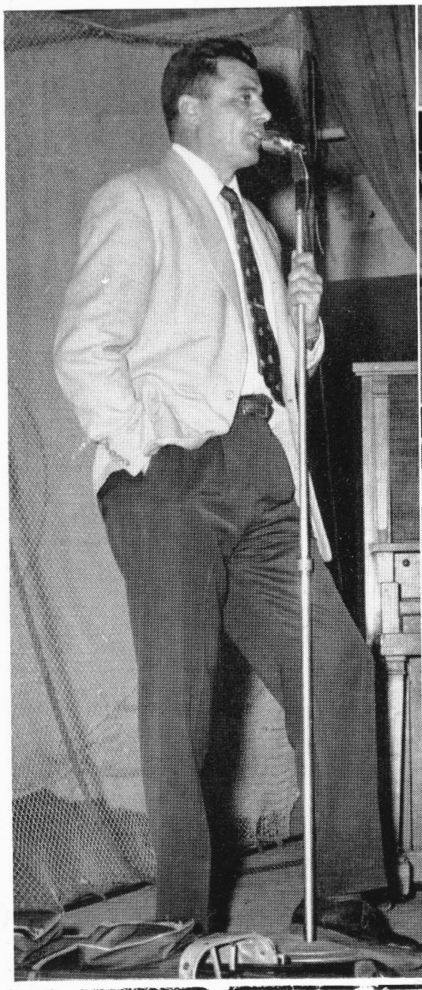

## Scovill Foremen's Club Spring Dance

The Scovill Foremen's Club spring dance was held at the Chase Country Club. The committee members, pictured with their wives were: (left to right) Club President and Mrs. John Meehan, Dance Chairman and Mrs. Arthur Chaffee, Mr. and Mrs. Wayne Johnson, Mr. and Mrs. James Moore, Mr. and Mrs. Edward Willhaus, Mr. and Mrs. James Gibbons and Mr. and Mrs. John Mitchell.

# Variety Program At Retired Folks' Meeting

About 60 members of the Retired Folks' Club enjoyed a variety program at their May meeting which included (left) Len Corrado explained golf techniques and use of the various clubs; (right) dog training exhibition: Betty Lasky with Trainer Joe McShane's German Shepherd "Jock," Mrs. Walter Montville with collie "Muffin," Anita Bournival and her Pomeranian "Spark," and Mrs. Bennet Bronson with Labrador retrievers "Wig" and "Wag."

## Fishing Notes

Waterville claims two outstanding trout fishermen as top champions. Elmer Libby and Louis Moraway, inseparable anglers—never fail to return without their limit of fresh caught trout. Where do they get 'em? Ask them!

Reeves Competition dates will be: August 27, September 10, September 24 and October 8. Jot these dates down in your notebook now. And while we are talking of dates, here are two more important ones: August 6—The Rod and Gun Club fishing contest and August 13—the Club's annual Outing (tentative). All these activities will take place at Woodtick.

Now for a serious note. Ray Ladden, Chairman of the SERA Fishing Committee reports that he inspected the boats at Woodtick recently and was appalled at the condition in which you fishermen leave the boats. The rental for our boats is ridiculously low and we cannot supply labor to clean up after you. However, should this become necessary, it would no doubt mean that rental charges would have to be drastically increased. This we do not wish to do! The decision lies with you. Follow these suggestions: Treat the boat as though it were your own. Keep it clean of refuse. Tie it up properly. And if you see someone abuse a boat, report the stinker to Les Hart. Permits can be revoked for reason! Don't let a small minority of poor sports spoil our fishing. We need your help badly in this situation. Let us keep our fishing privileges at Woodtick!

## Girls' Club News

By Teresa Ryan

The council for the coming year held its first meeting May 16. It was decided to hold a card party June 20, at the Club.

The dinner for the retiring and new members of the council was held May 26, at the Yankee Drover Inn, Newtown.

Received thank you cards for the annual banquet from: Emma Perone, Jo Melroy, Agnes Roberts, Laura Perigard, Rose Winslow and Mrs. A. P. Hickcox.

Welcome to our new members—Niel-sine Hansen and Catherine Rupenski, Press No. 2; Beatrice Weidinger, Slide Fastener; Dorothy Marino, Sales Dept.; Barbara Gilroy, Accounting; Jeanette Voycik, Bulletin Office; Sally Dalton, B&F Production Office; Della Riccio, Waterville; and Theresa Desjardins, Oakville. We hope to see you at our various activities.

Sorry to hear that Adeline Goudreault of Slide Fastener is out ill. Marie Martineau of Chain Room is in St. Mary's Hospital due to a serious automobile accident. Hope to see you back with us soon.

Welcome back to Jean Fredin, Slide Fastener, and Sue DeLeo, Lipstick.

Anna Burbee daughter of Pauline, Closing Room, starred in Barbara Hyland's Dance Revue which was held recently.

If anyone has any news which she thinks will be of interest, please contact Teresa Ryan, Ext. 857.

## Chairs - \$1.00 Each

New chairs have been purchased for use in Doolittle Hall and the old wooden ones, in gangs of four, are being offered to employees at \$1 each.

If interested, call the Employee Activities Office, Ext. 834. They will be sold during the week of June 6 on a first-come, first-served basis.
