

Scovill Reports Profit For First Six Months

First Quarter Improvement Continues

At their regular monthly meeting held on August 5, 1959, the Board of Directors of Scovill Manufacturing Company released the following sales and earnings figures:—

	1st 6 months 1959	1st 6 months 1958
Net Sales	\$75,804,838	\$55,569,093
Net Profits after Taxes	2,478,610	511,402 (loss)

The six months' figures indicate a continuation of the improvement previously noted in the BULLETIN for the first quarter of this year.

President S. T. Williams stated that "the operating results for the first half of this year are definitely encouraging, particularly when compared to the losses reported for 1958. Scovill people in all divisions have been working hard to reduce costs and to install more efficient equipment and methods. While it is still too soon for the beneficial effects of these efforts to be fully apparent in our operating results, they have been responsible for some of the improvements noted to date."

Mr. Williams cautioned, however, against undue optimism in regard to our position for the first half of the

year. He noted that heavy buying of brass mill products has been a major factor in the improvement noted for the first six months. To the extent that this heavier buying was inventory accumulation in anticipation of higher prices and material shortages, it could mean lower sales later in the year.

In commenting on our current position, Mr. Williams stated his belief that "Scovill has successfully passed through the first stage of its recovery. I have great faith that factors of growth are present in our company. These factors have been strengthened by the 20 million dollars spent in all divisions in 1957 and 1958 for new plant and equipment. Present programs, however, cannot be expected to solve all of our problems. There are still prod-

uct lines that continue to show losses or profits too low for long term operation. These problem areas must continue to receive our full attention."

At the August 5 meeting, the Directors voted to declare a dividend of 25¢ per share of common stock and 91.25¢ per share on the cumulative preferred stock. Both dividends are payable September 1, 1959 to stockholders of record at the close of business August 17, 1959.

At this same meeting, George A. Goss, Jr. was appointed Assistant Secretary of Scovill Manufacturing Company.

Immediately following the Directors' meeting, Mr. Williams announced that as of August 3, 1959 salaries of non-exempt, exempt and ledger payroll employees that were reduced on June 2, 1958 would be increased by the amount of the dollar reduction at that time.

Otto Bernz To Sell GREEN SPOT

It was recently announced that arrangements have been concluded for the Otto Bernz Company, Inc. of Rochester, New York to take over Scovill's GREEN SPOT line of garden and lawn watering accessories.

As of September 1, 1959, Otto Bernz will control the distribution and sales of all GREEN SPOT products.

According to present plans, Scovill's General Manufacturing Division expects to continue manufacturing the majority of GREEN SPOT items for Otto Bernz on a contract basis.

The Company is divesting itself of this line because it does not have sufficient distribution in the retail fields through which such products are sold. The acquisition of the GREEN SPOT line will allow the Otto Bernz Company to expand its already strong position in the outdoor living and home maintenance fields. Present Bernz products include BERNZ-O-MATIC torches, stoves, lanterns, grills and other propane appliances.

(Continued on Page 2, Column 3)

MILL MEN WIN SAFETY AWARD. It was with a great deal of pleasure that President Williams accepted an award from Liberty Mutual Insurance Company recently. Pictured making the presentation is Mr. David Sletten, Liberty Mutual District Supervisor. Also on hand at the special ceremonies were Mills Div. Vice Presidents J. J. Hoben and C. P. Goss; Scovill Safety Engineer W. M. McClesney and Liberty Mutual Safety Engineer Fred Haesche. See story on Page 2.

MEMO *from Management:*

No Time To Relax . . .

The six-months' figures (page 1) are rightly cause for encouragement throughout the Company. They reflect the results of our own efforts as well as the rising economic tide. Our own earnings improvement, from a half-million loss in the first six months of last year, to a two-and-a-half-million profit in the first six months of this year, represents a giant step.

But you can't take a step—even a giant step—and just stand there. You have to keep going. In the march of business you have to go forward—or fall behind.

Without discounting for a moment the hard work that helped so much to make possible this gain, we must face the realities that are already eating away our profits. At this moment, the steel strike threatens our second-half earnings. Scovill can't sell hardware for automobiles and appliances that are not being produced. The products of foreign mills and factories, under our foreign aid programs intended to improve the economy of these countries, have about wiped out our own export markets. They are now moving into our own domestic markets, at prices we cannot meet with the higher U. S. wage rates.

Here are some other hard facts, close to home in our own company. Scovill has had to spend a lot of money just to keep some operations alive. The consolidations of divisions, departments, equipment and people necessary to make money by saving money call for spending money now in the hope of future profits. There is always quite an interval between pushing out the chips and picking up the pot. Like poker, it is a gamble without a guarantee of a pay-off.

We have to recognize, also, that a large portion of the profits we are again making will have to go for the difference between what we are allowed to deduct for depreciation, and what we are actually spending for new plant and equipment. Theoretically, depreciation is supposed to replace worn-out or obsolete equipment. But it doesn't work that way. The new equipment, whether it's your own washing machine or a rolling mill, always costs more. And that "more" has to come out of profits.

Anyway, all of us at Scovill can take a deep breath, but now is no time to relax. We have a way to go to catch up to competition that was moving ahead while we were trying to get up speed.

Otto Bernz To Sell GREEN SPOT

(Continued from Page 1, Column 3)

Included in the *GREEN SPOT* line are lawn and garden sprinklers, hose nozzles, hose repair couplings and menders, hose connectors and various accessories. Not affected by this move are the industrial coupling lines which will continue to be manufactured and sold by Scovill.

Cosmetic Container Div. Moves New York Office

The Eastern District Sales Office of the Cosmetic Container Division, formerly located in the Chrysler Building East, in New York City, has been moved to the main office in Waterbury, as of July 27, 1959.

Mr. Lamson M. Scovill continues as Eastern District Sales Manager, assisted by Frederick Gaudineer and Gordon Petrie, as in the past.

One Million Man-hours

— No Disabling Injury

The Award of Merit presented by Liberty Mutual Insurance Company to our Mills Division was in recognition of their operating during the period October, 1958—February, 1959 in excess of one million employee-hours without a disabling injury.

"Such a record points up the *safety consciousness* of mills division people under the able guidance of Bill McChesney's Safety Department," says Vice President Goss. "No matter how good the record, however, *safety* must still be the business of everyone. It's not records we're after but the avoidance of personal harm to our fellow workers and ourselves."

Photo of presentation on Page 1.

Mill Street Gate

Beginning August 10, 1959, the Mill Street Gate will be open as follows:

Monday thru Friday

Open at 5:50 a.m., close 8:06 a.m.

Open at 2:30 p.m., close 3:15 p.m.

After 3:15 p.m., vehicles must use Hayden Street or South Hamilton Ave. gates. Pedestrians are to use the Purchasing Office entrance.

Michael McCormack Thomas O'Connell Michael Parker Fred W. Troske

235 YEARS OF CONTINUOUS COMPANY SERVICE. President S. T. Williams congratulates Mary Nelson on the completion of 50 years' service; Irene Bouley, 40 years; Thomas O'Connell, 40 years; Angela LoRusso, 25 years; Michael McCormack, 25 years, and Frederick Troske, 25 years. Congratulations were offered also to Mr. Williams for a service record—July 1st marked the 30th anniversary of his coming to the A. Schrader's Son Division.

New Assignments

Accounting Services

UBALD DESAULNIERS—Manager of Payroll, with responsibilities for Depts. 606, Payroll Office; 607, Addressograph; 615, Transcribing; and 53, Manufacturing Timekeepers

JEREMY E. JOHNSON — Data Processing Manager

ANTHONY SEBASTIAN — Assistant Manager of Payroll

Bldgs., Systems, Eng.

BRUCE E. WOOD—in charge of Real Estate, in addition to his present duties connected with surplus equipment.

Mills Div.

GERALD CORRIGAN — Office Manager, New Milford Tube Mill.

ANN CREAM—Inventory Accounting Supervisor, Mills Div.

GEORGE O'MEARA — Cost Supervisor, Mills Div.

Gen. Mfg. Div.

THOMAS S. HOWELL—District Sales Manager, Philadelphia Office, for the General Manufacturing, and Screw Products & Forging Divisions

RONALD E. MALIA—Sales Manager, Contract Products

JOHN L. SMITH—Foreman of Second Shift activities of the Division

Screw Prod. & Forging

WILLIAM M. ARMOUR — Industrial Engineer

PETER ARMOUR — Foreman, Dept. 379, Headed Products Tool

FREDERICK BATTEN—Foreman, Dept. 52 Service and 78 Finishing

RAYMOND J. CAFFREY—Asst. Foreman, Dept. 79 Packing

JOHN J. CORBETT—in addition to his present responsibilities, will supervise the second shift activities of all Headed Products departments in Building 136

DAVID C. HANLEY—Asst. Foreman, Dept. 75 Head, Rehead & Clip

JAMES A. HOLLYWOOD—Foreman, Dept. 79 Packing

MAX W. KOHLBRENNER—Foreman, Dept. 76 Slotters & Threaders

ROGER J. LAFRANCE—Foreman, 1st shift, Dept. 89, Hot Forge

HENRY J. MONTAMBAULT — Foreman, Dept. 75 Head, Rehead & Clip

WILLIAM F. SUTTON—in addition to his present responsibilities, will supervise the Screw Machine Tool Room, Dept. 378

Traffic—Transportation

GLENN ALLEN—Foreman of Garage
JOSEPH COSCIA—Foreman of Shipping, Receiving and Warehouse

JAMES DWYER—Supervisor of Shipping

ROGER LAVIGNE—Supervisor of Receiving

JAMES REDDEN—Foreman of Transportation

Lipstick, Perfume Cases Standardized

A program of standardization of lipstick containers was undertaken by the Cosmetic Container Division for several reasons:

—to eliminate the multiplicity of similar parts of various containers that formerly varied enough to mean completely different tooling but not enough to make any significant difference in appearance or operation of the containers — to eliminate prohibitively high tool costs for each customer (tool costs that were a major cause of loss of business) — to improve deliveries by enabling us to start shipping sooner from date of order than was previously possible.

Sizes and basic shapes of parts were standardized. The various finishes and decorations are done to customers' specifications. The design of these standard parts also makes it possible to use many of them for refillable and non-refillable perfume pursers.

Through this program, the Division is increasing its business, with lower costs, greater profits and more satisfied customers as the goal. Various high-speed automatic equipment and con-

veyors (which make for greater economy of operation) were feasible with certain standardization of container parts rather than with a multiplicity of slightly different parts.

LIPSTICK AND PURSER CONTAINERS. A small collection of various containers produced for different customers under our new program. With swellings, flutings, scratch brushing, stamped designs, printing, roller coating, screen stencilling, silver plating, etc., each is distinctively different and exclusive. Yet, all were made from the basic standardized parts.

BASIC STYLES OF BASES AND CAPS. Left photo shows some of the standard bases. In photo at right are three

basic styles of long lipstick and purser caps — straight side wall, tapered side wall and flared side wall.

FLEXIBILITY OF PROGRAM. (1) Swivel lipstick mechanisms set in two of the bases. (2) Left, refillable purser bottle and a lipstick refill unit, each of which will fit in any of the bases; right, purser bottle and lipstick refill

unit in two of the bases. (3) A sleeve assembled to one of the bases, making it a long base, and a lipstick refill unit in a long base. This container then takes a short cap like the flared portion of base.

Retirements

LEWIS F. COBB, Director of Purchasing and Stores, retired on July 1, 1959 with almost 42 years' service.

JOHN EDMOND, checker in Plating, formerly in Waterville Div., retired on July 13, 1959—34.9 years.

WILLIAM ROONEY, Waterville Div. Foreman, retired on July 13, 1959—41 years, 11 months.

HAZEL M. ADAMS, Standard Cost Clerk, Waterville Div., retired on July 20, 1959—42 years, 5 months.

August 1st Retirements

GEORGE R. AITCHISON, Foreman in Screw Machine Tool—36.5 years.

MERLAND M. AVERY, Foreman in Gen. Stores, Oil House — 36 years, 1 month.

THOMAS BEAMON, Draw-Block operator, Rod Mill—31.8 years.

MARY BUCZAK, matron in Sanitation—15.4 years.

ALBERT CORMIER, die and scrap man, Rod Mill—31.2 years.

ALFRED G. DEMING, Contract Mfg. Div. Sales Manager — 46 years, 11 months.

C. ARTHUR DUBOIS, Training Director—39 years, 6 months.

EARLE T. FORD, an Asst. Secretary of Scovill; also Manager of Timekeeping and Payroll, Addressograph and Transcribing—43 years, 11 months.

SESTILIO GILARDI, draw bench operator, New Milford Tube Mill—36.3 years.

NELLIE GRYSKO, miscellaneous machines operator and bench worker in Press 2—15.5 years.

JAMES F. HANLEY, Maintenance Engineer, North Mill and Foreman, Roll Grinding Room—43 yrs., 4 mos.

JOSEPH HARRELL, Forkman in Rod Mill—39.6 years.

HELENA KELLY, Accounting Clerk and Clerical Supervisor, Waterville Div.—42 years, 8 months.

WASIL KOPCHA, Brown & Sharpe Machine operator, Screw Machine—8.3 years.

EARL ODELL, Supervisor of Addressograph Dept.—48 years.

PASQUALE PERROTTI, dipper in Dip—45.2 years.

ERNEST E. PHILLIPS, Cashier in Gen. Accounting—35 years, 4 months.

WALTER J. RACICOT, Health Engineer, Main Hospital — 39 years, 9 months.

RETIREMENT PARTIES AROUND THE PLANT. *These retired in July:*

Top photo:—Antanina Mockaitis and Sophie Radomski of Hand Buff

2nd photo:—William E. Bordner of Mfg. Eyelet Tool

3rd photo:—Stefano Semeraro of Screw Machine Packing

4th photo:—Seated at the head table at party for Real Estate Agent Arthur Taylor:—Alan C. Curtiss, Arthur D. Chaffee, Mr. Taylor, George A. Goss and Mark L. Sperry, Jr. Standing is Hemingway Merriman.

ANTHONY SANDULLI, Shift Foreman in Hot Forge—42 years.

RUDOLPH A. SCHNEIDER, Production Manager in Button & Fastener Production—50 years, 5 months.

MARY SHARKA, Matron in Sanitation—16.9 years.

LOUIS VALLEE, laborer in Salvage Dept. — 15.7 years.

MARY WILCEVSKIS, power press operator in Press 1—32.3 years.

WALTER L. WOOD, an Asst. Secretary of Scovill; also Chief Accountant in the General Accounting Office—42 years, 10 months.

CHAMPION SHARPSHOOTER. *Harold Slocum holds the winner's trophy which he won recently at the annual President's Match sponsored by the Connecticut Rifle Association.*

Mr. Slocum was one of 94 entries in the Regional annual President's Match tournament which was held at Blue Trail Range in Wallingford, Conn. While he says, "it was just a lucky day," his score of 1,597 with 112 x's topped those of such top notchers as Walter Thompson (a member of the 1948 Olympic Rifle Team to England) who came in second with 1,595 with 108 x's; and John Crowley (1954 National Champion) who shot 1,594 with 115 x's for third spot.

Mr. Slocum is a regular member of the SERA Rifle team.

SERA Rifle Team

Remaining matches for the season:—Aug. 24—Lufbery; Sept. 2—Elmwood; Sept. 8—Glastonbury.

Your Social Security

Would you like to help your social security office shorten the time you now have to wait to get your first benefit check?

Since no payments can be made unless a claim is filed, and no claim can be approved without evidence that the law's requirements are met, your action in getting your proofs ready ahead of time, and taking them with you when you go to file, can greatly speed up that important first payment.

For prompt payment, get in touch with your social security office about a month ahead of time, and be sure to have with you your proofs of age and your W-2 form for 1958.

Blood Donor Day - August 18

Employees in the East Plant mills and the new Headed Products departments in Bldg. 136 will join with various offices personnel in donating a pint of blood on Tuesday, August 18. The Blood Mobile Unit will be

set up in Doolittle Hall from 12:30 to 5:30 p. m. for the collections.

Other employees not located in these departments are also invited to participate. A call to the Employee Activities Office, Ext. 834, will make an appointment for you.

The need for blood is constant—it takes no vacation.

Vacation time is pleasure time—but it is also open season for accidents on the highways, accidents around the home, polio rears its head, the marvelous open heart surgery cases continue — all of which call for blood as a vital part of treatment.

Have A Drink

By Robert W. Butler, M.D.

Water we mean!

Most of us don't drink as much as we should, only because we have never formed the habit. We get a good deal of water from various fruits and vegetables in addition to the other liquids we drink, but most of us still would be better off to take aboard a little more—it's one of the few good habits easy to develop.

Why? Do you know how much of your body is made up of water? From 30 to 60 quarts — depending upon what you weigh — 100 to 200 pounds. Your body tissues and membranes must be kept moist; your joints must be kept lubricated, and the fluid portion of the blood (plasma) must be kept up to keep you healthy. 90% of plasma is water, by the way. The juices in your stomach and intestines which digest the food you eat are largely water, too.

One of the very important functions of the body is the elimination of waste products: in perspiration, in the air we exhale, and in urine. How much water do we lose through those

routes in the course of a normal day's living? About 6 pints.

The kidneys have a very important function in eliminating poisons from the system by filtering them out of the blood stream. If these are diluted by considerable quantities of water, the job is much easier. If they are concentrated because of insufficient water they may irritate and do some damage to the substance of the kidney or the bladder.

Too few people realize that constipation, and all the troubles which result from it, is many times (not always) the result of a lower bowel which is too dry and that the condition may be cleared up just by drinking three or four more glasses of water a day. What cheaper cure?

Water will not put on weight, so don't drink less than you should just because you're on a diet. If you are normally healthy and drink more water than your body requires, it will pass it off. The two pounds you lost by cutting down on the amount of your drinking water when you first went on the diet came back as soon as you started drinking again. The fluids in your body demand balance; and if you don't provide enough, they steal from one another. That can be dangerous.

Remember that when you drink at a drinking fountain you never get very much at a time. Three or four swallows in that bent over position and you think you've had a real drink. Take three or four swallows from a glass of water and see how much you really did get.

Have one on the House!

SERA DAY CAMPERS RARIN' TO GO. These children attended the opening week of the SERA Day Camp at Woodtick. Councilors in charge of their activities include:—(1) Alice Fowler, (2) Linda Subr, (3) Wayne Williams and (4) Donald MacIntosh, all well qualified for this pro-

gram. At extreme right is SERA President John Capone. Attendance at the Day Camp during the first three weeks of July (including the two-week plant shutdown period) averaged 75 youngsters. Attendance during the month of August is expected to be greater.

Obituaries

THOMAS J. MCCARTHY died on July 7, 1959 after a short illness. Mr. McCarthy retired in April, 1950 after almost 50 years of service. He was a toolsetter in Trim & Knurl at time of retirement.

JOSEPH LAFLAMME died on July 8, 1959 after a long illness. He had retired in January of this year with over 43 years of service. He was a toolmaker in Manufacturing Eyelet Tool Room when retiring.

WILLIAM ROBINSON died on July 11, 1959 in Pico Rivera, California. He had been a toolmaker in Connector Tool when he retired in June, 1958 following 52 years of service.

MAY CARTON died on July 14, 1959 after a brief illness. She had retired in December, 1944 after 27 years of Company service. Mrs. Carton was serving in Press 2 as a small power press operator when retired.

FRANK MASI died suddenly on July 27, 1959. He had retired October, 1953, after 51 years of service. He was serving as a Hand Screw Machine operator in Chucking when retired.

PATRICK J. DiLAURO died on July 31, 1959 after a brief illness. An employee for over 12 years, Mr. DiLauro was working as a toolsetter in the Closing Room when illness forced him to leave on July 2nd of this year.

August Picnics at Woodtick

Aug. 13—Scovill Foremen's Club
Aug. 15—Grinding Room
Aug. 16—North Mill Bowlers
Aug. 18—Oakville Div.
Aug. 22—Oakville Div.
Aug. 23—Strip Mill
Aug. 29—Rod & Gun Club
Aug. 30—Steam Dept.

Rod & Gun Club Outing

Chairman Ed DeBisschop announces tickets will be distributed by committee members or will be available at the Employee Activities Office. He urges that you get your tickets prior to the picnic date. Activities will start at noon and continue through the afternoon.

HEADING FOR SUNNY CALIFORNIA. Upper photo:—Co-workers in Department 12 sent Jennie Truncale off in fine style just before she and her husband left for California where they will make their home. Lower photo:—Dick Kruse, of Trucking, also received the best wishes of his fellow workers for success and happiness when he left. He, too, was heading for California.
