MILLION DOLLAR SQUEEZE. Recently installed in the East Mill at Waterbury this new vertical extrusion press exerts pressures up to 2,500 tons in extruding brass tube shells for redrawing into tube products at our New Milford Mill. This new press, the largest of its kind in the world, marks another forward step in providing the facilities to meet customer demands for high quality products.

Governor At Scovill Exhibit

Governor Abraham A. Ribicoff visited the Scovill exhibit in the Connecticut Building at the Eastern States Exposition on Saturday morning, Sept. 19th. On hand to greet the Governor was President S. T. Williams.

Governors of other New England states also visited our exhibit after touring their own state buildings. The Exposition ran for nine days, and drew over half a million people.

Our exhibit featured model trains carrying miniatures of typical Scovill consumer products around a landscaped layout 12 feet wide. Hamilton Beach contributed a giant, six-foot working model of the new Mixette.

Displays on the back wall carried such consumer products as lipsticks and compacts, GRIPPER Zippers and GRIPPER Snap Fasteners, Oakville safety pins, Schrader tire valves, Hamilton Beach appliances, copper water tube.

United Fund Drive Opens at Scovill

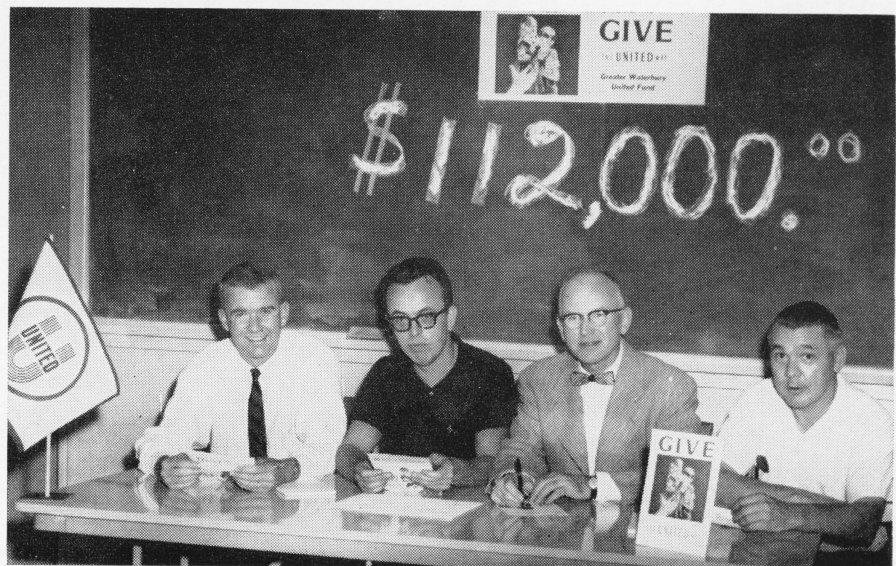

The Scovill United Fund drive for 1960 is being conducted from October 1 thru 29th. The quota for Waterbury Divisions employees is \$112,000.

As the *BULLETIN* went to press, the drive was scheduled to start with a rally at Doolittle Hall on Wednesday, September 30th. Approximately 350 campaign workers were expected to be in attendance. Scheduled speakers included Scovill president S. T. Williams; Local 1604 UAW-AFL-CIO president Ralph Dadessio and a representative of the Waterbury United Fund Campaign Committee.

As pictured below, the drive in Scovill this year again is headed by a joint Management - Union committee. Co-chairmen are John Moore and Charles Rietdyke representing Management; with Lawrence Bernier and Herbert Eastwood representing Local 1604.

In addition to the four co-chairmen, the following committee members will be serving in their divisions:—

(Continued on Page 2, Col. 3)

FUND DRIVE CHAIRMEN. Shown, left to right, are Co-chairmen John Moore Lawrence Bernier, Charles Rietdyke and Herbert Eastwood, planning the United Community Fund Drive in Scovill. This year, the goal for Waterbury Divisions employees is \$112,000—14% of the total United Fund goal of \$838,354.

MEMO *from Management:*

We've Got Company

The booklet you received recently (Look What's Happening to the Brass Mill Industry) shows the impact of imports on our business. We hope you have studied this report on the situation that threatens our company, our employees, and our community.

It is doubly important that we all know the facts because this area in which we work and live has already been badly hurt by foreign competition. We have seen what has happened to the makers of clocks and watches, bicycles, rubber footwear, typewriters, steel flatware, firearms, and sewing machines. The names of companies (and people) you know are on the casualty list.

The industries in our own backyard have been particularly vulnerable. For a long time they have yelled for help and protection. But Washington, playing international politics, has turned a deaf ear.

Now, some new voices are being raised. We've got company; amazing how self-interest can excite understanding.

Four key unions — International Ladies Garment Workers, Amalgamated Clothing Workers, Textile Workers and the United Hatters, Cap and Millinery Workers—are seeking legislation to safeguard domestic production against inroads from foreign "sweatshops".

The Textile Workers have officially protested the refusal of the U. S. Tariff Commission to consider the application for relief made by domestic silk mills.

Jacob Potofsky, president of Amalgamated Clothing Workers, told a Senate group, "There is no way for our own wages to be reduced to meet the threat. There is no extra production which could be cut back to permit the market to absorb the imports."

Even the steel industry is feeling the impact of imports. As the editor of Iron Age put it, "Foreign steel is now the realistic nightmare of the American steelmaker."

Republic Steel's President Thomas F. Patton stated, "First the foreign manufacturers took our foreign market; then they went after our coastal markets; now they're invading inland markets; foreign steel is a growing menace."

Our own President S. T. Williams concluded a recent speech with these words:

"If we are indeed rugged individuals, let us resist individually and in our homes the purchase of low-priced foreign merchandise for ourselves and for our businesses. In the long run good U.S.A. merchandise will be in fact the lowest in price.

"We of industry pray, as did the backwoodsman in mortal combat with a bear, 'Oh Lord, I never asked your help before — but I shore need it now. And Lord, if you can't help me, please don't help the bear.'"

The quota for the Waterbury area of \$838,354 is the minimum need of the 33 member agencies, and must be attained or exceeded if the agencies of the United Fund are to continue to operate during the coming year.

This goal can be reached and without putting any excess burden on anyone—if every individual would give his fair share. Giving by payroll deduction is the simplest and easiest way. Each weekly amount is surprisingly small but if everyone contributed in this way, the 1960 goal can be reached.

Production Control Conference Held

An inter-division conference on Production Control was held in Waterbury on September 28th and 29th. Representatives from all divisions and from several Waterbury Service Departments met for two days to discuss the latest techniques in production scheduling and control.

Among the topics discussed were the application of machine accounting to production control, long term planning, effective means of breaking bottlenecks, shipping and receiving operations, material handling developments (equipment and systems), and the use of scheduling and production charts.

The conference was another important step in an overall program to promote the inter-change of ideas on matters of common interest to all Scovill divisions. Previous conferences have covered Accounting, Finishing, and Materials Handling.

ONE 50, THREE 40, TWO 25-YEAR AWARDS. President S. T. Williams thanks Mary Larkin Miller for 50 years of service to Scovill; Theobald LeBlanc, William Johnson and Albert St. Jean for 40 years; John Carey and John Halrunk for 25 years each at Award Presentation Ceremonies on September 21st.

MOLLIE COLLINS AND EVELYN MALTBY RETIRE. Employees in Mfg. Packing and Mfg. Trucking join together in extending best wishes for many happy years of retirement to Mollie Collins and Evelyn Maltby. Foreman John Mitchell is seen shaking hands with Miss Collins who completed 50 years of service in August.

ATTRACTIVE, COMPACT MASCARA APPLICATORS. *With exclusive Comb hidden in the cap, they (and Refills) are available in a variety of finishes and colors.*

Mascara Applicator With Comb Makes Hit With Industry, Ladies

The Cosmetic Container Division's new mascara applicator with exclusive comb has had wide acceptance in the Cosmetic Industry. To date, twenty-nine of the leading eye makeup firms are using the unit in forty-seven different varieties of finish.

Women have been enthusiastic about this Mascara Applicator. In the constantly increasing market for eye makeup, a new and better way of applying this makeup was necessary. Our applicator has done the trick and, as a result, the cosmetic industry's mascara sales have increased noticeably.

This Mascara Applicator was invented by R. Gordon Bau, Director of Makeup at Warner Brothers Studio in Hollywood, and further developed for production by Scovill under an exclusive license agreement.

The applicator is of double end construction. The body contains the applicator and the cap contains the small comb. Both applicator and comb are made of polypropylene.

When the body is unscrewed and the applicator rod pulled out, the rod is wiped clean by a gasket, leaving the proper amount of mascara in the grooves at the end of the rod. After the mascara is applied and the applicator rod replaced in the body, the cap is pulled off revealing the small comb.

The small fine-toothed comb is the most important feature of this Mascara Applicator, enabling it to do what no other applicator can do satisfactorily—separate and curl the eyelashes.

Refills for the Scovill Mascara Units are also gaining in popularity. They consist of the body of the Mascara Unit with a special fluted black polyethylene Refill cap which has a colored polypropylene insert in the top. This insert is usually chosen to match in color the applicator and comb of the unit for which it is a refill and to indicate color of mascara within.

In addition, the Cosmetic Container Division has just started shipping a Combination Mascara — Eyebrow Pencil Container to one large customer. This container employs an aluminum applicator instead of our conventional polypropylene one. The other end of the container has an eyebrow pencil with a sharpener. It is expected that other companies will be interested in this container and a large volume should result.

Other variations are currently being developed.

Retirements

JOHN BLASAVAGE, maintenance electrician in the Electrical Dept., retired as of September 21, 1959 with 18 years of service.

Retiring October 1, 1959

MONICA DAUKSAS, miscellaneous machines operator and bench worker in the Cosmetic Container Manufacturing Dept.—14.7 years of service.

WILLIAM J. DAVIS, model maker in the Cosmetic Container Division's Model Room—37.1 years.

ANTONIO DEFRANCESCO, service man in the Wire Mill—36 years.

JOHN PLOCHINO, productive helper in the Casting Shop—21.9 years.

JOSEPH ROMANO, janitor in the Waterville Office—16.6 years.

NICOLA ROSSI, maintenance man in the Casting Shop—38.6 years.

Scovill Men To Attend Retreat

An invitation is extended to all Scovill men, including those retired, to attend the annual retreat to be held at Holy Family Monastery in Farmington, Conn., November 20-22nd.

Those interested and who have not been contacted are asked to call any of the following officers:—J. Arthur Rompre, PL 3-1780; Edward J. Seaward, PL 3-7537; Benedict Kelley, CR 4-4272; John J. Carolan, PL 5-1578.

GERARD CARON, Hardening Room, left for military service on July 31, 1959. An employee since November, 1955, Gerard graduated from the Training Course as a tool hardener in October, 1957, and was assigned to the Hardening Room at that time.

DENNIS J. SULLIVAN, Press & Machine Dept., left for military service on September 10, 1959. Hired as a punch press operator on September 1st, Dennis had served less than two weeks when called for military service.

"Give the UNITED Way"

New Assignments

Mills Division

JOHN BABIN — Product Manager, Copper Tube and Commercial Alloy Tube.

ROBERT A. NIELSEN—Product Manager, Brass Sheet, Rod and Wire.

NELSON J. SQUIRES—Manager-Sales Service, Brass and Copper Products; also Sales Service on Sheet Products.

GEORGE E. SICKLES — Supervisor-Sales Service, Tube Products.

JOHN D. MCGOVERN — Supervisor-Sales Service, Rod and Wire Products.

Plumbers Brass & Fdry

ARTHUR O. MCSWEET—Acting Plant Manager for the division.

Fishing Notes

The first leg of the 1959 Reeves Fishing Competition is now history. With extremely beautiful weather and favorable fishing conditions, our Scovill anglers roamed Woodtick Lake on Saturday, September 12th, in search of their prize fish. At the end of the day, Les Hart measured in the following:

Black Bass

John Fleming	13 $\frac{1}{2}$ "	
Leland Graham	13 $\frac{1}{8}$ ") tie
Herb Colby	13 $\frac{1}{8}$ "	

Pickereel

C. Korbusieski	18 $\frac{3}{8}$ "
Lee Reid	17 $\frac{1}{8}$ "

Trout

J. Caron	12 $\frac{1}{2}$ "
----------	--------------------

Bullhead

H. Colby	12 $\frac{3}{4}$ "
----------	--------------------

Next sessions will be held on Sept. 26, Oct. 10, and Oct. 24.

The Fishermen's Banquet is scheduled for Thursday, November 5, at Doolittle. Tickets will be out soon.

Congratulations to *Henry Miller*, who finally accomplished what he has been wanting to do for his fishing partner for many years. It has always been the writer who had the pleasure of netting *Henry's* champion catches. Recently the roles were reversed. A 23 $\frac{1}{2}$ " pickereel made the tragic mistake of selecting the writer's lure instead of *Henry's*. It was then that *Henry* with appropriate ceremony netted the big one. Well done, *Henry*, and may you do it again soon — preferably during one of the competitions.

SERA OFFICERS FOR 1959-1960 TERM. *John Capone*, of the Tin Shop, was re-elected President of the Scovill Employee Recreation Association to serve a second term. Also re-elected was Mrs. Betty Affeldt (center) who will serve her second term as Vice President. Secretary-Treasurer Ruth Peterson was appointed by the Board to serve in the position for another term.

SERA President Reports on Year's Activities

The annual membership meeting of the SERA was held at the Scovill Girls' Club on Tuesday, Sept. 15th. At a meeting of the new Board of Directors, current officers were reelected for a second term.

Re-elected to serve on the Board for the coming year were:—Anthony Crispino, Safety; William Finnegan, Electrical; John Mitchell, Sr., Mfg. Packing; Vincent Manzolli, Contract Production; Margaret Snowden, Grinding Room; Albert Kean, past president.

Newly elected members are:—Herbert Colby, Packing B; Joseph Fabiano, Trucking; Jean Ostroski, Group Insurance; Peg Sanchi, Mill Production; and John Sullivan of Oakville.

Alternates are Shirley Armstrong, Wire Mill; James Bruno, Planning; William Mancini, Screw Products Packing; and Cliff Aspinall, Safety.

President John Capone reported on activities of the past year. While no major projects were undertaken at Woodtick or Doolittle Hall, several minor improvements were made at both places to provide the best in recreation facilities for all.

Building a pavilion at the Group Picnic Area was indeed an asset to groups who were unfortunate to have rain on their picnic date. The warm humid days brought capacity crowds to the area and all facilities were put to good use. Doolittle Hall, which is normally closed during the summer months, was the scene of many parties and other activities. The Girls' Club also was very much in use.

The Day Camp, again, was a huge success. While attendance in other years was always high, a record attendance this year was maintained throughout the full season.

Golf and softball leagues were brought to a successful conclusion. Three different outings were scheduled during the season and the activities were brought to a conclusion with the SERA annual outing set for Oct. 3rd.

The Board of Directors for the past year was commended by the president for the manner in which they handled the business of the association. The financial report has been filed for audit but indications are that the year's operations broke almost even — which is ideal for such an association.

The current activities committees are finishing up their respective assignments and will turn over their duties to new committees as appointed at the October meeting of the Board.

Current committees in charge of social activities for which arrangements must be made in advance have already lined up bowling alleys, gymnasiums, and are scheduling Doolittle Hall and the Girls' Club for the coming fall and winter season.

All in all, it has been a successful year for the Association in providing recreational activities for all employees and their families; and the newly elected Board gives all indications of carrying on in the same fashion.

Hallowe'en Party

Children and grandchildren of Scovill employees—12 years of age and under — are invited to attend the SERA's annual Hallowe'en Party to be held at Doolittle Hall on Thursday, October 29, from 7 to 9 p. m.

A grand march, movies and refreshments will be on the program.

Mrs. Betty Affeldt, chairman of the activity, announces that prizes for Most Original, Prettiest, and Funniest costumes will be given as follows:—

1st, 2nd and 3rd prizes for children 7 years of age and under.

1st, 2nd and 3rd prizes for children in the 8 to 12 years age group.

No tickets are needed.

"Give the UNITED Way"

Retired Folks' Club

The first meeting of the season is scheduled for Doolittle Hall on Tuesday, October 13, at 1:30 p. m.

Notices telling of the program will be sent to all retired employees as soon as plans are completed.

Fire Prevention Week

Fire Prevention Week is not fire fighting week. There's a big difference. Buying extinguishers and hose is always a good idea, but the national observance of Fire Prevention Week is to *prevent* fires from starting.

Equipment just as important as fire fighting equipment:—

Rubbish barrels—
Butt Cans—
Brooms—
Shovels—
Safety cans for flammable liquids—
Ash trays.

Other equipment which would also fit into the picture as fire prevention equipment:—

Fire sprinklers—
Fire doors—
Good electrical equipment—
Fuse Boxes

Fire Prevention Week is the time to review hazards and correct them so that fire fighting will not be necessary.

Plastic Film - Use and Mis-use

(In view of the number of accidents caused in the home by the mis-use of plastic film, our Medical Director, Dr. R. W. Butler, has asked that we reprint the following "Helpful Hints to Parents" published by the Society of Plastics. He'll be back next month with his regular health column.)

The popularity of plastic film as a packaging material or a covering continues to increase because of its many outstanding virtues, such as transparency and protective qualities.

Plastic film is used for packaging a variety of consumer products—fruits and vegetables, clothing, toys, candies, baked goods, hardware, and sporting goods. The material helps preserve the life of merchandise in stores and in the home. *This is the chief purpose for which it is intended.*

It can be used in the refrigerator or bread box to preserve partially consumed products. As a package for vegetables in food storage bins, it prolongs their life. The film is used as a dust cover for garments by dry cleaning establishments.

Plastic film, once it has served its intended usefulness, should not be left around the house or given to infants or young children as a plaything. They pull bags over their heads and are de-

lighted because they can see through them. Recent reports indicate that young children playing with this ultra thin, limp film, become enmeshed in it and may suffocate themselves.

Many thousands of children die each year as the result of accidents from all causes. The Dept. of Health states "suffocation and choking are the most frequently reported causes of accidental deaths of children under one year of age. However, doctors now believe that in a great many instances of reported suffocation, the child really died not from lack of air to breathe but from some rapid overwhelming infection."

Nevertheless, The Society of the Plastics Industry recommends that parents eliminate any possibility of accidental suffocation from thin plastic film by keeping it away from infants and children.

When it has served its *intended* purpose—*dispose* of plastic film!

Your Social Security

How well do you know your social security rights?

For instance — one feature of the social security law is a disability clause which pays you and your dependents between age 50 and 65, if you cannot work because of a severe and prolonged illness.

If you are under 50 and severely disabled, you should ask at the social security office about freezing your social security record to protect you and your family's rights to future benefits.

If you or someone you know is disabled and cannot work, get in touch with the local security office, located at 108 Bank St.

SERA Rifle Team

The 1959 season came to a close for the SERA Rifle Team with a record of 5 wins and 4 losses in their matches in the Moon-Lite League.

Although the last game was a loss for the team, Harold Slocum maintained his record of expert shooting by scoring a perfect 400 with 40 x's.

Members of the team during the year included Harold Slocum, Alan Steel, Harold Henriksen, Richard Bares, Jerry Bosquet, Charles Atwood, Lee Atwood, Richard Lawson, Richard Northrop and John Degnan.

Obituaries

GRACE CALZARETTO died in Potenza, Italy, on July 27, 1959.

Mrs. Calzaretto had retired in July, 1951, after 35 years' service as a machine operator. She was working in the Waterville Division when retired.

HELEN DILLON died on September 3, 1959, after a brief illness.

Miss Dillon had almost 40 years' service when retiring in November, 1956. She was an inspector in the Waterville Div. Screw Products Div. when retired.

PAUL SKOKAN died on September 6, 1959 after a short illness.

Mr. Skokan retired in April of this year with over 40 years' of service. When retiring, he had been assigned to special cost work in Waterville.

BERTRAND J. DILLON died suddenly on September 9, 1959.

Mr. Dillon was serving as a gang leader in the Shipping Dept. when stricken. He had been a Scovill employee since February, 1937.

SANTO PALERMO died on September 9, 1959 after a long illness.

Mr. Palermo had retired in June, 1958, after 21 years of service. He was a floorman in Blanking when retired.

AUGUST BARTKUS died suddenly on September 19, 1959.

Mr. Bartkus had retired in January, 1955, with a service record of 23.2 years. He was a buffer in Waterville Division when retired.

UMBERTO URSINI died on September 19, 1959 after a long illness.

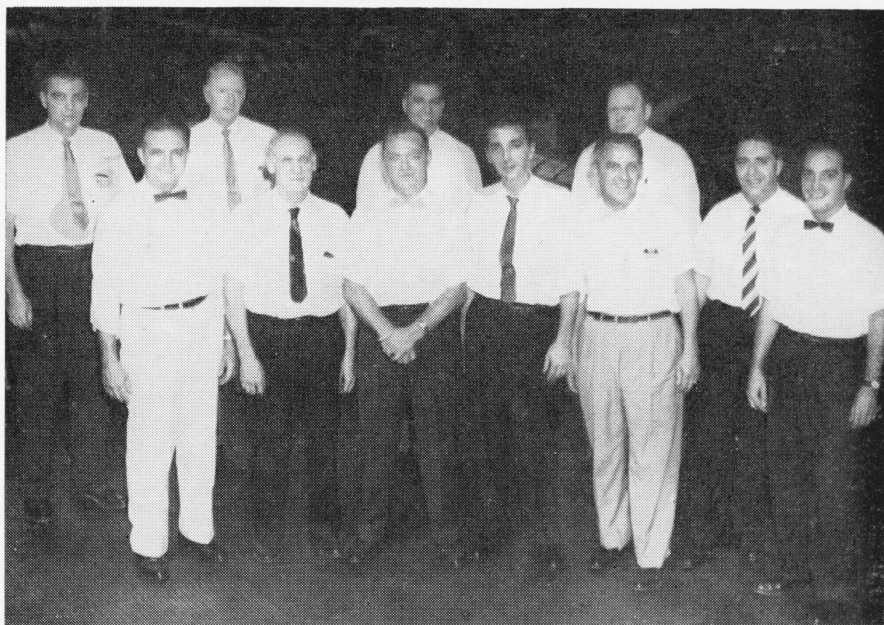

Mr. Ursini, who had a service record of over seven years, was serving as a floorman in the Japan Room when forced to leave due to illness last March.

JAMES F. HANLEY died suddenly on September 20, 1959.

Mr. Hanley retired on August 1st of this year. Maintenance Engineer and Foreman of the Roll Grinding and North Mill Maintenance, Mr. Hanley had a service record of over 43 years.

ALICE BLACKBURN died on September 20, 1959 after a short illness.

Miss Blackburn, who had completed 36 years of service in August, was serving as a Rate File Control Clerk in the Payroll Dept. when she was forced to leave that same month due to illness.

SCHRADER SUPERVISORS VISIT WATERBURY MILLS. *Snapped in the Strip Mill are: Back row:—Joseph Wunsch, Asst. Foreman, Automatic Dept.; Ray Foster, Chief, Planning Dept.; Paul Truncali, Industrial Administrator with James Smith, Manager of Waterbury Mill Production Operations.*

Front row:—Charles Silban, Chief of Quality Control; John Moriarty, Asst. Foreman, Plating Dept.; James Morgan, Asst. Foreman, Rubber Mill; Joseph Muraca, Asst. Foreman, Packing Dept.; Alfonso Mega, Buyer, Purchasing Dept.; Charles Pappalardo, Cost Dept.; Albert Grande, Accounts Payable Dept.

Schrader Supervisory Training Program

The ten men pictured above, together with Schrader Plant Superintendent William Hackemann, visited the Waterbury plant as a windup to the Supervisory in-plant training program they recently completed in Brooklyn.

During the course, they received instructions in the workings of every de-

partment in the Schrader Division—both office and factory. The second such program to be conducted in Schrader, the course consisted of one session weekly for seven and a half months. It is felt that the program has helped supervisors become better informed, and thus better qualified.

M.I.T. STUDENTS RECENT VISITORS. *A tour of the Scovill mills and Metals Research Dept. was one of the highlights for Senior Metallurgical Engineering students of Massachusetts Institute of Technology in their recent fall Metallurgical Plant Visits trip. The field trip, a part of their course at M.I.T. was made on September 18, by 35 students and 3 instructors.*
