

## Mills Division Offers Scholarships

The Mills Division has announced the availability of three scholarships for the 1960-61 academic year. Each scholarship will cover full tuition charges, laboratory fees and other similar charges at a college or university chosen by the recipient.

College students who have already completed one or more years at an accredited college or university, and secondary school students who are graduating in 1960 from schools in the greater Waterbury and New Milford area, are eligible.

Applicants must have a good scholastic record, and have demonstrated an interest in and aptitude for the engineering or technical fields, particularly in mechanical, electrical, civil, chemical, metallurgical or industrial

engineering, physics or business administration.

Although awarded for one year, scholarships can be renewed each year if the student maintains a satisfactory record, continues to work toward a degree in the engineering or technical field, and maintains a continuing interest in a position with Scovill.

All other factors being equal, preference will be given to Scovill employees or sons of Scovill employees. Sons of Scovill officers and directors are not eligible. It is expected that recipients of the scholarships will enter the employ of the Company after having satisfactorily completed their course of study.

The scholarship program is being administered by John Fogarty, Mills Division Safety and Labor Relations Coordinator. Application forms may be secured from the Employment Office, Employee Relations Bldg., 402 East Main St., Waterbury. Applications must be returned by May 15, 1960.

## Scovill Sponsors Politics Workshops

Politics is everybody's business. The more we know about politics, the better we can fulfill our responsibilities as citizens. Many Scovill employees have accepted this responsibility willingly and are actively engaged in politics by serving the party of their choice.

As part of a national effort to promote a more complete understanding of local, state and national political processes, the Company is sponsoring an educational course in practical politics. Approximately 100 of the employees in our Waterbury divisions who signed up for the first series have just completed the course of nine weekly sessions of one and one-half hours each.

The material on which the program is based was made available by the National Chamber of Commerce. The actual subject material was planned and prepared with the help and advice of career politicians from both parties—men and women who understand the workings of politics from inside out.

The Scovill program is under the supervision of Charles Rietdyke, of Employee Relations who also served as

*(Continued on Page 2, Col. 3)*

## T-V Promotes Copper Tube

To promote the sale of Copper Tube Mill Products in the Cleveland area, our Mills Division is sponsoring a television program on KYW-TV, Cleveland's leading television station. The program, called "Eye-Witness Sports", is on the air from 11:15 to 11:20 p. m., Monday through Friday, for 13 weeks, April 4 through July 1.

The purpose of the program is to establish the Scovill brand name and Scovill Tube Mill Products with wholesalers and plumbing and heating contractors in the area served by the Mills Division's new warehouse and sales office. The program is designed to aid these potential customers in the development of their business in the Cleveland area. The "commercials" feature a wide range of new plumbing and heating installation and modernization ideas tying in directly with the use of Scovill Copper Tube Mill Products.

*(Continued on Page 3, Col. 3)*

PRACTICAL POLITICS—OUR HOPE FOR GOOD GOVERNMENT. Such is the firm conviction of Mayor Edward Bergin and ex-Mayor Raymond Snyder who were among the local politicians who presented their personal views on politics at the final session of the Scovill-sponsored Politics Workshops recently. Charles Rietdyke, center, served as discussion leader.

# MEMO **from Management:**

## ***Ganging Up On A Problem***

"Task Force" is a phrase heard more and more around Scovill. In its military meaning, it refers to a special group, usually made up of elements from various services, "under a single commander, for fulfilling a single, precisely-defined mission".

It means the same thing, here at Scovill; a special group, selected and organized to consider a specific situation. People pulled in from various divisions and departments to investigate, recommend, and get things going. The group approach is nothing new, but the Task Force, with its comprehensive deliberation of a single decision or program, can be completely objective. And it can cut across all boundaries, call upon the best thinking and talents often hidden in a large company composed of what are really several separate businesses.

To date, seven Task Forces have been established, their missions involving million-dollar money and the calculated risk of Scovill's growth and future. Three have already made their reports to corporate management, which accepted their recommendations.

These were no simple, conversational decisions around a polished table. They were based on a great deal of work by the members of the Task Force and the representatives of corporate management working with them, all in addition to their regular jobs.

Take Task Force #1. Its assigned mission: to determine the possibilities of the continuous casting of aluminum strip. Its members included two engineers, a metallurgist, an accountant, an assistant works manager, and a market analyst . . . all representing differing interests, responsibilities and capacities.

An extensive market survey had already been run (what's the use of making the stuff if you can't sell it at a price to make a profit?) The engineers' preliminary studies indicated that the process was feasible and worthy of development.

Then came the hard-pencil routines: the costs, in time and equipment and cash, to make the process commercial; the technical and engineering and production problems; the evaluation of sales potentials; the timetable, where you balance how much you have to put out for how long, until you get back how much how soon?

The report of Task Force #1 was accepted. Expansion of our aluminum program puts Scovill in business all the way from the raw metal to the finished strip.

Not the least are the side benefits of the task force approach: in the inventory of our own human resources, the appraisal of the talents of our own people; in the awareness of people with a healthy indifference in viewpoints of their ability to work together to create something bigger than the sum of its parts.

## **Politics Workshop**

*(Continued from Page 1, Col. 1)*

discussion leader for the recently completed courses. Certainly no novice in politics himself, Mr. Rietdyke has been Chairman of the Republican Town Committee in Wolcott and was elected First Selectman last November.

To promote active discussion, participants were divided into five groups of 20 each. During the nine sessions, there was a thorough discussion of why people should be active in politics, and of the various opportunities available to the individual to work effectively in the party of his choice. The organization and importance of political parties and local political precincts (districts) and clubs were also discussed.

Brief descriptions of typical political problems and situations were covered to show participants how to analyze political situations and how to work out reasonable solutions. Homework assignments gave each participant first-hand experience in getting information on how political parties and government are organized in our own community, county and state.

In the last session of each group, experienced political leaders from both parties in the community were invited to attend the session to present their personal views on politics and to answer questions.

Results of the first series of courses have been so encouraging that the opportunity to participate in future sessions will be extended to additional groups of employees. Similar courses are also being offered by other companies and by local groups or clubs interested in promoting the civic responsibility of their membership.

It is important to note that this program is strictly impartial and does not promote or favor any particular political party or issue. Scovill employees from both parties as well as independent voters have attended these sessions and have expressed their whole-hearted approval.

This program was established by the Company in the belief that all of us will benefit if we have a better understanding of the political climate in which we live and do business, and are willing to take part in running our local, state and national government.

## Training Course

WELDER. Richard Tartaglia was graduated as of March 13, 1960 and has been assigned to the Tin Shop.

## Copper Tube Products

(Continued from Page 1, Col. 3)

Arrangements for this unique program, believed to be the first of its kind in the industry, were made by K. T. Howell, Mills Division Sales Promotion and Advertising Manager. First announcement was made to the trade at a special "Open House" held at the new warehouse and sales office on March 10, 1960. Details of this new sales stimulator were presented by C. W. Seeley, Regional Sales Manager.

JOSEPH M. SULLIVAN, Mailing Dept. messenger, left for military service on February 19. He had been hired into the Mailing Dept. in April, 1959.

ROBERT E. LAMONTAGNE left on March 11 for military service. He had been a maintenance man in the Drawing Room since coming to Scovill in September, 1959.

MAINTAINING HIGH STANDARDS OF SAFETY. Henry Carisio, foreman of Cranes and Hoists, has been making good crane operators for over 22 years. With 80 cranes in our plant, this is an important part of his work. Left:—

Alcide Boucher, Rod Mill, and (right) John Marages, Extrusion Dept., are instructed in proper crane operation. Similarly, other instructors cover many pieces of equipment to maintain high standards of safety.

## "H. O." Training Emphasizes Safety

"H. O." stands for Hazardous Occupations—a term that has been used in Scovill for many years to describe certain occupations.

These occupations are not hazardous to trained employees, but they involve the use of equipment which could be hazardous if operated carelessly or by an inexperienced person. Most of these occupations involve operation of equipment which moves or which uses gas or oil.

To qualify for one of these occupations, an employee must pass a physical examination first, after which he is specifically instructed in the use of the equipment, explained by instructors who certify the employee for the occupations upon completion of the training. Each employee "certified" for a Hazardous Occupation receives a certificate showing that he is qualified for operation of the equipment.

Included in these operations are operators of cranes, fork trucks, motor trucks, annealing furnaces, skid pullers, elevators, power presses, and similar equipment.

## Pinochle Tourney

With one more night of play remaining in the season, team standings as of March 31 were:—

Matulunas	34,355	395,925
Mancini	36,570	389,615
Laudate	35,670	384,030

High scores for the evening:—Torsani, 4,340; Daukas, 4,285.

The last night of play will be Thursday, April 7; the banquet will be held on Saturday, April 9th.

By Robert W. Butler, M.D.

I read a story some time ago which is worth a chuckle.

An elderly lady received \$500.00 from her insurance company as compensation for the loss of her wrist watch. To her chagrin, not long after she discovered the watch at the bottom of her clothes closet!

After much soul-searching on the proper course to take, she wrote to the insurance company: "I thought it wrong to keep both the watch and the money, so I am sure you will be pleased to know that I have sent the \$500. to the Cancer Fund."

Certainly the insurance company got a chuckle out of that one, too—but their money did go to a good cause.

Twenty years ago the lady would never have thought of the contribution, but there has been a great deal of publicity given to this killer during that time—and very properly so—because the death rate from it is climbing! In fact, the grim reality is shown in the figures. It has climbed from 7th to 2nd place on the list.

Here are some figures for you:

Every day over 600 Americans die of cancer

Cancer strikes one in every two families

More than 45 million Americans now living will eventually have cancer

About 265,000 Americans will die of cancer in 1960 if the present trends continue (God forbid!)

## Climbing!

There will be about 500,000 new cancer cases in the U. S. this year.

There will be about 700,000 persons under treatment for cancer in the United States this year (and at least half of them starting too late)

Last year more than 100,000 Americans were saved from dying of cancer (because they got after it in time).

The number of cures would have been more than doubled if every case had been treated early.

Now, these figures are not set down to frighten you, but merely to show the magnitude of one of the most critical medical problems in the country right now.

Fear is *not* the answer—intelligence *is*. But intelligence without action is useless!

Cancer can be cured—in its early stages. Let it go its own not-so-merry way, though, and cells break away from the parent growth, travel through lymph channels or blood-stream, transplant themselves into other organs, and cure becomes impossible.

Some of the most brilliant people in the world's history have devoted their entire lives attempting to erase this scourge from the face of the earth and literally billions of dollars have been spent in the process. They have made a great deal of progress, too, but still haven't found all the answers to the cause, *or* the cure.

They have found no cure for the person who hides under the bed and won't see his doctor because he fears he'll be told that he has cancer!

(Continued on Page 5, Col. 1)

## Bowling Sweepstakes

The 16th annual SERA-sponsored bowling tourney attracted 225 keglers. SERA president John Capone and Tourney Chairman Al Kean were among the chief rooters as Vice President Ivan Coulter rolled the first ball to start the tournament at noon on March 26 at the Cheshire Lanes.

### Class A—108 and over

1st high 3—Albert Petrone, 400  
2nd high 3—Benny Bannick, 397  
High Single—Carl Pickett, 151

### Class B—101 to 107 ave.

1st high 3—Ward Hobbie, Jr., 382  
2nd high 3—Anthony Posa, 381  
High Single—Daniel Samela, 143

### Class C—94 to 100 ave.

1st high 3—Joseph Joyce, 350  
2nd high 3—Dick Cullen, 347  
High Single—Kathleen Sileo, 137

### Class D—94 and under

1st high 3—Eva Fitzgerald, 327  
2nd high 3—Helen Tartaglia, 316  
High Single—Ward Hobbie, Sr., 121

### Special Prizes—Girls

High 3—Class C—Patricia Richards, 332; Class D—Ruth Jackowski, 304.  
High Single:—Class C—Dorothy Almeida, 119; Class D—Betty Fusco, 110.  
High Game without a mark:—Class B—Helen Niedzial, 79; Class C—Ruth Truelove, 90; Class D—Muriel Blood, 87.

## Climbing

(Continued from Page 4, Col. 3)

There may be a day when, as with Polio, we'll see the end of it, but right now, **EARLY DIAGNOSIS** and **EARLY TREATMENT** is the only hope!

The seven danger signals — and that means not that they're *proof* of cancer, but that they warrant investigation — you've *seen* many, many times before. Will you *this* time just read 'em?

1. Any sore that does not heal
2. A lump or thickening in the breast or elsewhere
3. Unusual bleeding or discharge
4. Any change in a wart or mole
5. Persistent indigestion or difficulty in swallowing
6. Persistent hoarseness or cough
7. Any change in normal bowel habits

If you've developed one of these—do something about it right now!

ANOTHER WISE OWL. Michael McEnerney is our third Wise Owl within a year. Norman Schaffer, Works Manager of the Screw Products and Forging Division, presents Wise Owl Award to Mr. McEnerney.

Safety Engineer John Pyatt and Foreman Roger LaFrance also congratulated Mr. McEnerney on his good judgment in wearing the safety glasses.

Right:—This is what happened to Michael McEnerney's safety glasses when a small grinding wheel flew apart. While the force of the blow cracked the safety glasses, there was no injury.

## Girls' Club News

By Juanita Addessio

The Council is in the midst of plans for our 39th annual banquet which will be held Sunday, April 24, at Waverly Inn, Cheshire. You can obtain tickets from Council members.

The question came up as to "why have it on a Sunday?" Well, for a very good reason—the club is made up of women from all over the plant. Quite a few are on production which sometimes means work on Saturday or on the second shift. Those on the second shift are never available to attend any of our other affairs so, by having the banquet on a Sunday, everyone is free to attend.

The annual meeting is the day after Easter and we certainly hope to see you there. Remember, if you don't like something the present Council is doing—the annual meeting is the time to put in your "two cents". Don't forget, you pay \$2.40 a year so you're entitled to put in your "two cents".

The Club is sponsoring a new worthy cause. "New Eyes for the Needy" is a charitable organization in Short Hills, New Jersey, which provides eyeglasses and artificial eyes to needy people in our country and abroad. They can use discarded eyeglasses, regardless of condition, size or shape. So, if you have any eyeglasses around (perfect or broken) you can't use any more, won't you send them in for such a worthy cause? Just drop them in at any Scovill Guard House, or at Employee Services (ground floor, E. R. Bldg.)

We want to wish a speedy recovery to Hazel Duffy who is at St. Mary's hospital with a broken hip and to Mildred Roach, also in St. Mary's, with a broken shoulder. You know, girls, to tango on ice you just have to have skates—as Hazel well knows.

Our best wishes also to Mary Dauderger who is recuperating in Waterbury Hospital following surgery.

## Retirements

Effective April 1, 1960

GIUSEPPE BALENA, buffer in the Buff Room—over 43 years' service.

HENRY J. CLEMENT, Quality Checker, incoming materials, in Screw Products Packing—34 years.

JOSEPH COCCHIOLA, Group leader and bench inspector, Plumbing Assembly & Pack—9.4 years.

THOMAS J. CRONEN, Casting Shop electrical and maintenance engineer—over 40 years.

JOHN A. GALGOT, Toolmaker in Cosmetic Tool—over 30 years.

DAVID C. HANLEY, Asst. Foreman in Head, Rehead & Clip—38 years.

MARY JACOVINO, bench and power press operator in Press 1—35 years.

ANTONINA MACKIEWICZ, miscellaneous press and bench operator in Cosmetic Manufacturing—16.5 years.

JOHN MCHUGH, die polisher in Wire Mill—42 years.

FRANK MCCOOEY, crane man in the Casting Shop—44 years.

LEONARD G. ROBINSON, Plumbers Brass Division—37 years.

UMBERTO URBANELLI, material handler in Mfg. Metal Stores—43 years.

## Your Social Security

Your doctor recommends periodic examinations for you. Checking on your health record is important to your physical well-being and can result in adding many healthful years to your life when you retire.

In like manner, the social security office recommends that you check your social security record every three years so that you can be sure that all your earnings are accurately credited to your account.

You can check your social security record by dropping into the Bulletin Office for a postcard designed for this purpose. The card is forwarded to the social security office which maintains your earnings record. In a short time you will receive an accounting of your earnings. If you believe that this record is not correct, you should inform the local social security office and they will take action to correct it.

In checking your record, you are protecting yourself and your family for future retirement, survivors and disability benefits.

**RETIRED FOLKS ENJOY LIVE SHOW.** A variety program of live talent was well received by almost 200 members of the Retired Folks Club last month. Entertainers included Vincent Manzolli singing popular songs accompanied by Ed Morra; Roger Borello on the accordion; and Hector and Mrs. LaRiviere demonstrating specialty and ballroom dancing.

An interesting demonstration of dog obedience training was conducted by Mrs. Dorothy Harlow. Participating were Helen Stukshis with her shepherd puppy *Tag* (Helen's dad is Stephen Bailey, now retired); Gladys Sabot of the Closing Room with *Buck*; and Tony Yarrow with his shepherd *Baron*.

Special guest of the program was

*Royal Master* shown, lower right, with his handler Daniel Lasky. A home-bred dog, *Royal Master* was raised and trained by Mrs. Lasky (Bette) and has won prizes in shows all over the country. His latest victory, last year, was taking top prize in a field of 90 Great Danes entered in the well known show in Westchester, New York.

**TWO VETERAN EMPLOYEES HONORED.** Two long-service employees who retired on March 1st were feted by fellow workers. Top photo: Tom Morrison, of Milling & Grinding, 36 years; lower photo: Carl Pike, Tool Room, 43 years.

## Obituaries

JOHN WAITKEVICH died on March 7, 1960.

Mr. Waitkevich had retired in August, 1954, after more than 25 years of Scovill service. He was a maintenance man in the Wire Mill when retired.

ARTHUR S. HICKCOX died on March 7, 1960.

Mr. Hickcox came to Scovill in December, 1938, and was serving as Methods Planning and Order Analyst in Mill Production at time of death.

ANNA L. CARROLL died on March 8, 1960.

Miss Carroll had over 53 years of continuous service when she retired in January, 1955. She had been a dial press operator in the Closing Room.

JOHN W. SIMONS died on March 10, 1960.

Mr. Simons had retired on January 1, 1955 with a service record of 17.3 years. He was a scrap sorter in the Repair Room when retired.

CATHERINE M. ROKE died on March 12, 1960.

Mrs. Roke, who had almost 8 years of Company service, was serving as a grinder on scoop punches and dies in the Slide Fastener Tool Room when forced by illness to leave her work.

ELIO ERMO died on March 17, 1960.

Mr. Ermo had retired on January 11th of this year after almost 37 years of service. He was a trucker in the Repair Room when retired.

LORENZO GIUSTI died on March 28, 1960.

Mr. Giusti had retired on January 1, 1955 with over 56 years of service. At retirement, he was a rack maker in the Waterville Division.

EMILE GERVAIS died on March 30, 1960.

Mr. Gervais had retired in January, 1955 with 13 years of service. He was a machinist, hydraulic shaper-planer in West Machine when retiring.

MICHAEL DUFFY died on April 2, 1960.

Mr. Duffy who retired in January, 1957, had been a die hardener in the Hardening Room. He had a service record of over 44 years.

SO LONG FOR A WHILE. Alfred Mormile, popular toolsetter-learner in the Cosmetic Finishing Assembly Division, was guest of honor at a surprise farewell party staged by his associates prior to his leaving for military service.

## Fishing Notes

By Mike Cicchetti

The March 15th meeting proved a very interesting one—plans for a busy fishing season were disclosed; 18 new members were accepted; and refreshments were enjoyed by the 51 members in attendance.

Saturday, April 16, is opening day for the fishing season this year. All is in readiness at Woodtick Lake for Scovill anglers. The boats are all in fine condition and the lighting system has been much improved.

A total of \$1100 was appropriated for restocking this year. Members voted to put trout into the lake as well as the pickerel and other species usually stocked. It was announced that the 10" minimum length for trout has been removed and the only limitation is three trout per day per person.

Tom Kaukas and his committee have plans pretty well completed for the special Children's Fishing Contest to be held at the Woodtick Swimming Area in the very near future. You'll be getting all the details soon.

Now for the big social event—our annual banquet. Ed DeBisschop, chairman, says the date is Thursday, April 21, and the location Doolittle Hall. Flyers are being mailed out with details and names of club members from whom you may get tickets.

Our honorary (retired) members are asked to contact the Employee Activities Office, Scovill Ext. 834 for their tickets. Membership cards have been mailed to these members — if you haven't received yours, please let us know.

## New Assignments

### Plumbers Brass & Foundry

ARTHUR O. MCSWEET has been appointed Plant Manager of the division.

## Blood Donor Day Nets 156 Units

Over 200 employees had signed up to donate a pint of blood for the March 31st visitation of the Blood Mobile Unit to Scovill. Of these, 156 were eligible to give — a fine start toward our 1960 quota.

This fine record could only be accomplished by the full cooperation of the many who served on the committee as well as the employees who gave. The Closure, Engineering and Plumbers' Brass divisions participated.

Three-gallon pins were awarded to Alvin J. Turner, Arthur M. Rogers, W. Craig Barber, Wilfred J. Smith.

One-gallon pins were presented to: Carleton Miles, Gustave Schoeck, Jr., Frank Carnright, John J. Keating, Anthony Mazurkivich, Armand Santucci, Arthur E. Lobley, Leo Boucher, Richard Brown, Irving M. Beal, Gabriel F. Riccio, and Charles R. McCue.

## Daylight Saving Time

Daylight Saving Time will be resumed in the state of Connecticut at 2:01 a. m. on Sunday, April 24, 1960.

At about that time, all clocks in the Waterbury Divisions will be advanced one hour. Outside clocks will be marked "D.S.T."

# Classified Advertising

## For Sale

All-white Florence stove, 4 gas, 4 oil; chrome pipe; 3-pillow sofa bed with maple arms, makes up into full-size bed. Both in very good condition. PL 8-9393 after 5 p. m.

White oil and gas stove with electric oven control, electric clock and Lynn oil burner, almost new; 50-gal. oil barrel with faucet; side arm gas heater. PL 4-1594 after 3 p. m.

Full size bed, vanity. Reasonable. PL 5-2049 after 5 p. m.

12 cu. ft. Norge refrigerator, 90 lbs. freezer space; 4 years old, perfect running condition. PL 7-9216.

1951 Buick Roadmaster, 4-door sedan, in good running condition. \$150. PL 8-9732.

Red leather chair, A-1 condition; 9 x 10½' fibre rug with rubber mat; new ladder-back chair; 2-burner oil heating stove with chrome pipes, can be attached to a fuel pipe or manual feeding. PL 3-8145 after 7 p. m.

9 x 9.6' grey wool rug with pad, \$40; almost new, excellent condition; size 7½ tap shoes, \$2. PL 3-0663.

Deluxe Model RK-70 Frigidaire electric stove, 2 ovens, deepwell, automatic timer, good condition. \$100. BR 2-5193 or Ext. 2393.

Car bed, \$3; Learner's wheels, \$3. CR 4-8751.

Florence range oil burner, two 7" burners, \$5; oil barrel, \$1; 10 doz. quart size canning jars, like new, \$5. PL 6-5606 after 5 p. m.

Heathkit 14-watt amplifier inputs for AM-FM tuner, magnetic and crystal phono. PL 3-1345 after 4 p. m.

12' all-aluminum 69 lb. Duratech boat, extra accessories, in excellent condition, \$150. PL 5-1362.

Beautiful 18-month old black and white male Collie, \$10. Wonderful companion. Must sell as moving to new location where he cannot be kept. CR 4-3689, daily from 10 a. m. to 2 p. m. or evenings 5 to 7 p. m.

## Good Friday Shutdown

The Waterbury Divisions will close for Good Friday at 7:00 a. m., April 15 and will reopen at 7:00 a. m. on Monday, April 18.
