"Extra" Money In Your Pay Checks?

You May Owe It To Uncle Sam!

By now, the extra money you have been receiving in your pay checks since March has become a normal part of your earnings and is hardly noticeable anymore — but, it may be brought to your attention again, quite sharply, next April if Uncle Sam asks for some of it back.

And this can happen because the 1964 Revenue Act reduces withholding rates for this year more than it reduces taxes. Therefore, many people — especially those in the middle and upper income brackets — will find their tax for the year 1964 will be greater than the amount withheld during the year. This discrepancy will be reduced in 1965 when the rates are further reduced for the payment of tax while the withholding rate will remain the same.

The reason for all this is that, as originally set up, the new income tax law provided for a 15% withholding deduction for 1964 but, since two months of this year had already gone by during which time 18% was deducted, employers were authorized to

(Continued on Page 2, Col. 3)

Woodtick Area Open For Season

Memorial Day, May 30, marked the official opening of Woodtick Recreation Area for its 19th season.

Employees of the Waterbury (including New Milford) and Oakville divisions — active and retired — and members of their families will find the Woodtick area a popular and convenient spot with the finest of recreation facilities, at a nominal cost, available in the area.

A new, modern, colorful and highly functional cinder block building graces the Swimming Area. It houses all necessary facilities under one roof—dressing rooms, toilet facilities, a large sized basket room which will also serve as headquarters for the day camp in in-

clement weather, and a more accessible refreshment stand. New sand has been added as needed to the beach area, the lake has been drained and thoroughly raked, and all is in readiness for use. Qualified lifeguards are on hand to keep a watchful eye on bathers.

The very popular family picnic area, under beautiful shade trees, is equipped with tables and fireplaces, as well as slides, see-saws, merry-go-round, and swings for the youngsters.

The Group outing area has a large shaded pavilion, tables, fireplaces, and various games equipment. Group outings are scheduled by the Employee Activities Office and the recent warm weather has prompted many groups and departments to schedule their summer picnics well in advance. If you are planning such an outing, be sure to call the office for a reservation.

Ample free parking is provided in the lot across from the Swimming Area.

Passes to the area have been distributed again this year. Additional "Associate" passes may be obtained for members of your family. It is recommended that you secure these passes as, when the area is crowded, only those with passes will be admitted.

1964 Vacations

The Waterbury Divisions and Services will be closed for vacation during the two-week period starting Monday, July 6 and ending Sunday, July 19.

The 4th of July falls on Saturday this year and the plant will therefore be closed on Friday, July 3rd.

The *BULLETIN* will not be published in July. The next issue will be mailed on August 10th.

SCOVILL IN AUSTRALIA.

This new plant of Schrader-Scovill Proprietary, Ltd., opened in 1960, produces tire valves for the Australian market. Approximately the size of the U.S.A., Australia has

a population of 11,000,000 and about 3,500,000 cars. Most of the major U.S. tire and automobile companies have manufacturing facilities in this growing market now being served by this modern Scovill plant.

MEMO *from Management:*

8,000 Bosses

That's about how many bosses we have in our Waterbury Division alone. We may not see them walking around the plant but they play an important part in everything we do. These bosses decide what we will produce, how much we will produce, when these products will be made — in fact they pay all our bills, including our wages and salaries. These bosses are our customers. Without them, we wouldn't be in business.

Customers come in all sizes. One may be a small clothing manufacturer placing a \$25 order for snap fasteners once a year. Another may be much larger than Scovill and buy millions of pounds of our brass every year. Others may be distributors who warehouse and sell Scovill products to customers in all sections of the country.

Why do these customers buy Scovill products? It may be because they are convinced that our quality is higher — or that our service is better. Or it may be a combination of many things.

It's not always easy to keep 8,000 customers satisfied. Sometimes it seems that everyone demands attention at the same time, with customers changing their minds seemingly at the last minute about delivery dates or design specifications. On such occasions, tool engineers, production schedulers, and sales people go about tearing out their hair, wondering how to keep everyone happy at the same time.

If we stop to think about it for a minute, we will realize that our customers have the same problems as we do. They have customers whom they must satisfy and who expect as much from them as our customers do from us.

How to win customers and keep them is a delicate art. The helpful voice on the telephone, the quick attention to an emergency shipment, the prompt reply to a teletyped question — these are just a few of the ways to demonstrate that we mean business in holding on to the business of our customers.

And there's another not so comforting thought. If we are not willing or able to make the necessary effort, there are plenty of competitors waiting to take care of our customers — and take over our jobs.

Withholding Rates

(Continued from Page 1, Col. 1)

use the 14% rate (which would not have gone into effect until 1965) for the remaining 10 months. This means that the amount withheld during this year may be smaller than the tax due and you will have to pay Uncle Sam the difference — or, if you received a refund this year, you may find a smaller refund, or none at all, due you next year.

So, while you may be planning on saving this 'windfall' toward next year's possible tax due, there is another alternative: you may have additional tax withheld from your salary by reducing or eliminating the exemptions claimed on the Form W-4 which is on file in the Payroll Dept. A call to Ext. 2373 will get the proper form sent to you to make the desired change.

SERA Day Camp

The SERA-sponsored Children's Day Camp will open on Monday, July 6th, and will be operated through August. It will be conducted during the two-week vacation shutdown period.

All employees' children and grandchildren—boys from 6 to 12 years of age, and girls 6 to 10 years—may attend. The children leave at 8 a.m. from the SERA Building (corner East Main and Mill Streets) by bus, accompanied by qualified and experienced counselors who guide and supervise their activities until they return to SERA to be picked up by parents at 5 p.m.

The popularity of the camp is attested to by the fact that this is the 17th season of its existence, with high enrollments in each of its years. An additional feature this year is the new building at the swimming area which will provide shelter and indoor activities in inclement weather. Camp activities include swimming lessons, quiet games and rest periods, movies, supervised free play, story telling, hiking, nature study, teaching game skills, competitive games and sports, hot dog roasts and special events.

Further details, and application blanks may be obtained at the Employee Activities Office. Children may attend for as many weeks as desired but parents are asked to register the children in advance of the week they intend to go to camp.

New Assignments

General Mfg. Div.

H. ARTHUR SCHUYLER — Assistant General Sales Manager.

Waterbury Services

GEORGE H. KRITZMAN — assumes responsibility for the Addressograph Dept. in addition to his responsibilities in the Mailing & Filing Dept.

Retirements

Effective June 1, 1964

CARL A. ANDERSON, foreman in Milling & Grinding—almost 49 years of service.

GUISTINA CONTI, miscellaneous machines operator in Cosmetic Assembly & Packing—8 years' service.

ELMER W. CROWLEY, technician—electric and signal systems, Telephone Dept.—almost 48 years.

ALONZO FITZSIMONS, floorman—scaleman in Screw Machine Packing—23 years of service.

JOSEPH M. GALVIN, tool grinder in Screw Machine Tool—45 years.

JOHN J. GRIFFIN, inspector, tumbling barrel, Wire Mill—27 years.

PASQUALE IADAROLA, floorman in Manufacturing Packing — almost 39 years of service.

EDWARD T. KEANE, process inspector in Press 2—14.5 years.

DOMENICO MECCA, caster's helper in Casting—33 years' service.

VINCENT TOLETTI, electrician in Electrical Dept.—46 years.

Service Anniversaries

Joseph A. Synnott, Wire Mill
40 years—May 22, 1964

Augustus Alexander, Wire Mill
25 years—May 23, 1964

Edward Dussault, Clos. Tl. & Mach.
25 years—May 26, 1964

Jane Perkins, Maintenance Dept.
25 years—May 31, 1964

Frances Piedmont, Fuze A Assembly
10 years—May 9, 1964

Louis Laudati, Jr., Aluminum Mill
10 years—May 20, 1964

Ludmila Drasauskas, Cosmetic Cont.
10 years—May 25, 1964

Theresa Rogers, Japan Room
10 years—May 26, 1964

Pre-Vacation Blood Donor Day

School will be out soon — families will be on vacation or taking weekend trips — traffic on all highways will be increased many times over — as will be the danger of accidents causing serious injury or death.

We must be sure our Blood Program is kept operating in the event of such emergencies where blood is needed immediately to save a life. It could happen to you, or to one of your loved ones. Let's be sure we have done our part to keep this supply of blood available

The Blood Mobile Unit will be set up in the air-conditioned SERA Building on Thursday, June 25, from 12:15 to 5:15 p.m.

While primarily set up for employees of the General Manufacturing Division, because of the importance of having enough blood available during the summer months, other employees are invited to participate.

If pledge cards are not available in your department, call Ext. 834 and one will be sent to you.

Also, a cordial invitation is extended to other members of employees' families, who are eligible, to donate a unit of blood. "Drop-ins" are most cordially welcome.

SONG AND DANCE NITE FOR THE FOREMEN. *The scene of this year's annual spring dance of the Scovill Foremen's Club was SERA Building. A community sing and dancing were enjoyed after a sumptuous dinner. Heading this year's Program Committee are Alfred Smith, Anthony Laudate and Peter Dowling.*

Training Course

GILMAN BOU-CHARD graduated as a toolmaker on May 11, 1964 and has been assigned to the Gen. Mfg. Tool Room.

GEORGE PERUGINI graduated as a toolmaker on May 22, 1964 and has been assigned to the Gen. Mfg. Tool Room.

JOSEPH SCARPA-TI, JR. graduated as a toolmaker on May 27, 1964 and has been assigned to Closure Tool & Machine.

Midnight Bowlers

Living up to their chosen team name, "The Three Kings" took first place for the season in the second shift Midnight League. The "Kings" are Lyle Lawrence of the Rod Mill, Art Steinnagel of Cosmetic Container, and Tom Curtin of the Aluminum Mill.

This league, certainly "dedicated" bowlers, started bowling at midnight, finishing by 2 a.m., at the Lakewood Lanes each week.

Here's How

By Robert W. Butler, M.D.

Did you ever try pushing yourself through a mattress? Obviously you can't really push, you have to *sink*—and you can't do that without complete relaxation. Try it sometime—it makes a good preparation for a night's restful sleep; and preparation is important if you're going to get as much benefit from it as you should.

Make it a good mattress, too. After all, you spend one-third of your life on it, so it ought to be the most comfortable thing you can get; and if it isn't, you don't want it—regardless of price, fancy names, or high pressure advertising or salesmanship.

A comfortable mattress on a good spring in a hot, dry, stuffy room is not good either. Try to keep your sleeping room cool and well ventilated; but if you sleep close to a window, screen yourself from drafts—and save yourself a crick in the neck. If the bedroom air is too dry, put humidifiers on the radiators, or wide pans of water on tables, dressers, or chairs. Dry air not only interferes with good sleeping, it also makes dry-in-the-morning throats!

If you're not one of those fortunate people who is asleep as soon as his head hits the pillow, here are a few points worth thinking about. They're not all easy, and not always possible; but they are all important and worth a try:

First, your mind should be at peace with the world before you drop off. Don't lie there and fret about what has

gone wrong or not to your liking during the day—it's too late now. Don't lie there scheming up schemes for tomorrow—it's too soon now; and your mind is in no condition to do any sharp thinking anyway. The dull mind, however, is capable of pleasant thoughts and those are relaxing.

If you have trouble getting to sleep, there are a lot of tricks better than the sheep-counting business, and some of them may work for you:—

Reading in bed (with good light) is helpful for many people, but the reading material must be carefully chosen. If your mind at bedtime is not too active, it should be something light and entertaining and certainly not stimulating—no whodunits, and nothing that requires concentration. If your mind is alert, and you tend to lie around fretting and stewing, read something which is foreign to your work, but which requires all the concentration of which you are capable.

A few other things, not so easy, are worth mentioning:— Get into an uncomfortable position, and keep it long after you feel you can't stand it any longer. The relief you feel after getting out of the uncomfortable position will often help you to fall asleep quickly.

That half hour nap you take after the evening meal and newspaper may be doing you out of an hour or two of sleep later too, you know. Cut it out if you don't get to sleep easily and quickly. Also, if you are not on your feet all day at work, a brisk walk an hour before going to bed may help.

A word to those who work the 3rd shift and have trouble sleeping during the day:—your eight hours' sleep should be the eight hours just before going to work—not the eight hours just after leaving it. Nobody on the first shift would go to bed at 4 o'clock in the afternoon, and get up at midnight with six or seven hours up and around on his feet before starting work; but that is what you do when you sleep from 8 in the morning to 3 or 4 in the afternoon. Better to stay up until 1 or 2 and do your sleeping in the afternoon and evening. The night's work won't seem so long then.

As we said—you spend a third of your life sleeping—why not make the most of it?

Your Social Security

"A stitch in time saves nine"—an old saying? Yes, but how true.

If you are planning to retire, you will find that a visit to your social security office a few months before retirement will help you get your first check on time.

Your social security representative will be glad to discuss with you the proofs and information which you will need when you apply for benefits. He will also be able to advise you about any special problems you may have.

One Scovill employee remarked recently, "I'm sure glad I checked into this thing early—I never realized that I would need proofs to establish my claim. Once I found out, it was no problem to get everything I needed together." His first check arrived on time because he inquired before he retired.

Yours will, too, if you plan a visit to your local social security office be-

Girls' Club News

By Margaret Gorman

Our annual banquet was lovely and enjoyed by all. Guests at the head table included: Mr. and Mrs. Selden T. Williams, Mr. and Mrs. John J. Hoben, Mr. and Mrs. George Goss, Jr., Mrs. George Goss, Sr., Mr. and Mrs. Malcolm Baldrige, Jr., Rev. Maxwell B. Long, and our speaker Rev. Robert Keating.

Also attending were 62 of our retired members.

You'll be getting your notices soon on the family picnic to be held at Woodtick on Sunday, June 14.

Welcome to new members Marcella Sciortino of Dept. 62; Jennie Shaken of Dept. 60; Anna Lopes of Dept. 25; Ann B. Jones of Dept. 44 and Elisa Lavado of Dept. 12.

fore you retire. The Waterbury Social Security office is located at 108 Bank Street, and the phone is 756-7475.

STUDENTS STUDY
INDUSTRIAL NURSING

Quite impressed with the services rendered and equipment utilized in industrial hospitals, student nurses Yvonne Petit and Florence Heinz show real interest in the Quadriceps Resistive Exerciser being described by Alice Chagnot, Registered Nurse and Registered Physical Therapist in our main hospital. Mrs. Patricia Woods is the patient.

Nursing, as Waterbury student nurses are learning, has many fields. Prior to the present courses conducted in local hospitals, students had a very limited knowledge of the scope of industrial nursing and many misconceptions concerning it.

Today's courses include a two-day field trip into local industry hospitals where the majority of students are amazed at the extensive medical and safety programs provided by Industry for its employees, and its concern for their total welfare.

Their conclusions, following these visits, are that a general knowledge of medical conditions and injuries, factors predisposing to them, and skills in observation are the primary requirements for prompt and adequate treatment. The rapport between nurse and patient was considerably remarked upon, and expressed as ideal for patient understanding. One principle observed by all was the importance of keeping accurate and detailed, up-to-date medical records.

The nurses pictured above are students at the Waterbury Hospital. In addition to observing treatments in our hospital, they were taken on a brief tour into the main plant and Oakville Division to see the types of work our employees are engaged in.

MISUSED HAND TOOLS CAUSE INJURIES

The wrench and the nut in both pictures are perfectly alright but when, as in the left picture, a wrong tool is used injuries can happen. In this picture, the wrench is the wrong size and it will slip from the the nut when force is applied. The picture on the right shows a proper fit.

A Good Mechanic Seldom Gets Hurt

Scovill mechanics have established an excellent record in the prevention of serious injuries. Knowing how to do their jobs and having the right equipment to do the job have made this record possible.

Good mechanics seldom get hurt, but amateur mechanics and thoughtless haste still cause many painful, if not serious, injuries to hands—especially to the do-it-yourselfers.

As illustrated in the above pictures, wrenches must fit the problem and also be the type to "get" it. Similarly,

screwdrivers must fit screw slots squarely and have good handles of sufficient length; hammers must be the right size with safe striking surfaces. Files, saws, scrapers, crowbars, jacks, hooks, or whatever tool you handle, if right for the job and used as intended will not cause injuries.

Don't take chances with a misfitted, dull, greasy spring or defective hand tool. Don't use excessive force to try to make the wrong tool do a job. A good mechanic does not misuse hand tools — and seldom gets hurt.

Vacation Tour

Atlantic City, New Jersey, is the spot chosen for the only employee vacation trip being planned by the SERA this year. With the attraction of the World's Fair in New York, interest shown in a trip abroad—or one of more than one-week's duration—was not sufficient to warrant such a tour.

Travelling by deluxe air conditioned motor coach, the vacationers will leave from the Travel Center, West Main Street, at 9 a.m. on Friday, July 3, and will return on Tuesday, July 7. They will stay at the Colton Manor Hotel for four nights.

Included in the trip will be a day at beautiful Monmouth Race Track—or—a lectured Town and Country tour of Atlantic City and nearby points of interest as well as a visit to the famous Smithville Inn and holiday entertainment at the Hotel.

Reservations must be in by June 26. If interested, call the Employee Activities Office, Ext. 834.

Other round trip bus excursions to the World's Fair will be conducted. Details will be announced as trips are planned. If interested in such a trip, contact the Employee Activities Office for possible dates.

Credit Unions

Vacation Schedule

CREDIT UNION #1—not operating during shutdown. Dividend will be declared as of June 30. All books will be collected from boxes by 9 a.m. on Thursday, July 2. Loan applications must be in by noon on Wednesday, July 1. Please plan deposits and withdrawals before July 2nd.

CREDIT UNION #2—not operating during shutdown. Loan applications and withdrawals must be in by noon on Wednesday, July 1. Last day of business—Thursday, July 2.

CREDIT UNION #3—not operating during shutdown. Loan applications and withdrawals must be in by noon on Wednesday, July 1. Last day of business—Thursday, July 2.

CREDIT UNION #4—not operating during shutdown. Dividend will be declared as of June 30. Loan applications and withdrawals must be in by noon on Wednesday, July 1. Last day of business—Thursday, July 2.

WITH OUR RETIRED FOLKS. *Upper photo:—Quite a few familiar faces were seen in the group of 50 senior citizens of the Waterbury Retired Workers Council who toured the aluminum and strip mills recently.*

Two more long-service employees joined the ranks of the retired recently. Center photo:—Henry Fontaine's co-workers in the Casting Shop bade him a fond farewell after his 37 years of service. Bottom photo:—Raymond Havican was feted by his co-workers and associates in the Closure Division. He had served in Scovill for 30 years when retired on April 1st, 1964.

Retired Folks to Hold Summer Picnic

All retired employees of the Waterbury and Oakille Company Divisions, as members of the Scovill Retired Folks' Club are invited to attend the club's annual picnic scheduled to be held on Tuesday, June 16, at Wood-tick.

Members are asked to meet in the SERA Building, corner East Main and Mill Streets, at 1:30 p.m. Those who may be driving and are closer to Wood-tick will go directly to the group picnic

area; others who will be coming through town and can take passengers, are asked to stop at the SERA to take others along. Transportation will be provided for those not having rides.

Each member is entitled to bring one guest along.

In case of inclement weather, the meeting will be held in the SERA Building. Details and passes to the recreation areas are being mailed to members.

Obituaries

FORREST ALLEN died on May 7, 1964. A floorman in Drawing when retired in September, 1958—over 15 years' service.

GEORGE EVITTS died on May 14, 1964. A tool crib attendant in General Training when retired in September, 1955—almost 25 years.

JAMES LEE died on May 18, 1964. A process engineer in Manufacturing Inspection & Process Engineering when retired in May, 1949—34 years.

GIUSEPPE ORTALE died on May 19, 1964. A rack maker in the Repair Room when retired in November, 1960—33 years' service.

CHARLES HAMEL died on May 28, 1964. Maintenance man on Extrusion Press dies, Rod Mill, when retired in January, 1955—55 years' service.

JOHN BIJOWSKI died on May 29, 1964. A milling machine operator in Milling & Grinding when retired in August, 1960—21 years.

DOMENIC ERCOLI died on May 29, 1964. A trucker in Trucking when retired in November, 1954—38 years' service.

EDWARD VANCE died on May 30, 1964. A toolsetter, leadman in Cosmetic Division when retired in October, 1960—16 years' service.

JOHN HAYES died on May 31, 1964. A power riddler operator in Screw Machine Packing—13 years.

We were very sorry to learn of the death of Navy Lt. (jg) Robert Minor, one of the 77 victims of the May 11th plane crash in the Phillippines. He had worked as photographer's assistant in our Photo Lab from March to July, 1942 and then left for Navy duty. He returned to the Photo Lab in December, 1945, and was a familiar face around the plant until he was recalled to active Navy duty in September, 1950. He had been a leading aerial photographer and was in charge of the U.S. Navy Fleet Air Photographic Laboratory in Bataan at the time of his death.

Pre-Vacation "B" Day
SERA Building
June 25 — 1 to 5 p.m.

MILL MEN HOLD ALUMINUM SALES MEETING.

The new facilities in Waterbury for increased production of Aluminum Sheet Products were the main subject at the regional sales meeting held in Cleveland recently. Attending were Mills Division Sales Personnel who cover the mid-west region of the country.

Front row (left to right):—C. Y. Newcomer of Detroit; C. W. Seeley, Regional Manager; R. D. McMahon of Cleveland; M. McKeever of Cincinnati; H. I. J. Collier, District Manager, Cleveland; A. Gray of Cleveland; and W. H. Bitner, District Manager, Sturgis.

Back row:—J. P. Garbrick of Cleveland; J. R. Mitchell, Aluminum Mill Products Manager, Waterbury; D. N. Woodward of Cleveland; R. N. Watjen, Market Manager, Waterbury; D. C. Fisher of Sturgis; H. A. Littell of Pittsburgh; N. O. Besenfelder, District Manager, Cincinnati; and H. U. Edelmann, District Manager, Detroit.

Rod & Gun Club

By Mike Cicchetti

A good number of fishermen turned out for the Club Members' Contest held the weekend of May 16-17. Prize fish weighed in during that Saturday and Sunday were: (1st, 2nd and 3rd prizes, respectively)

Bullheads—Fred Ehrhardt, 12½"

Perch — Ed Zukauskas, 11¾"; Charles Rietdyke, 10¾"; Bob Fumire, 10"

Pickrel — Lee Graham, 21¾"; Charles Rietdyke, 18¾"; Henry Harbert, 17¾"

Trout — Ed Zukauskas, 14¾"; John Pietrzak, 12½" Will Rogers, 11¾"

As there will be no BULLETIN during July, here's a reminder of three events coming up this summer:—

June 16 — regular monthly meeting will be held at Woodtick

June 27 — Children's Fishing Contest at the large pond. Flyers are being sent out covering the event; application blanks may be obtained at the Employee Activities Office.

August 15 — Members and Guests Fishing Contest at the recreation area.

Fertilizing of the areas will be continued during the summer months.

Rules to Remember

It's a shame that the carelessness of a few fishermen makes it necessary to take action, per State law and Rod & Gun Club rules, as follows:—

Any fisherman tossing carelessly about waste materials (including beer can flip tops), not cleaning boats before leaving, or not depositing waste materials in the conveniently located containers, may have his fishing permit, or license, or both, revoked pending hearing by the Fishing Committee.

Fishing at the swimming area is limited to fly casting — because of the possible hook hazards to swimmers.

Also, please do not toss back unwanted fish into the lake — of any size.

Meanwhile, have a fine vacation and don't forget — if you bring back some fine fish stories, be sure to let us know. We'll be happy to pass them along.
