NAB Presents Awards

Mr. Gerhard D. Bleicken, Regional Chairman of the National Alliance of Businessmen presented certificates of appreciation to President John Helies and Nelson Bridges for their activities in the NAB program.

In January, 1971, Mr. John Helies was appointed by President Nixon as Chairman of the Greater Waterbury area activities of the National Alliance of Businessmen. He served in this capacity through June, 1973.

Nelson Bridges, retired Employment Manager and Security Officer, was appointed Metro Director of the Waterbury Office, with Margaret Fenske assisting as Office Manager.

NAB is a private, non-profit corporation formed at the request of the President of the United States. The continuing goal of the JOBS program (Job Opportunities in the Business Sector) is permanent employment for disadvantaged Americans and Vietnam era veterans, and summer jobs for school-age youths.

The certificates of appreciation were presented to these men in recognition of their efforts which resulted in over 500 jobs secured for the disadvantaged and Vietnam era veterans during this period.

The presentation was made by Mr. Gerhard D. Bleicken, Northeast Regional Director of NAB. He is Chairman of the Board of Directors and Chief Executive Officer of the John Hancock Mutual Life Insurance Company in Boston, Mass.

John Helies To Head Area Bond Campaign

Mr. John C. Helies was appointed chairman of the area "Take Stock in America" campaign, by E. Clayton Gengras, state volunteer chairman of the U.S. Savings Bonds Committee. He will direct the drive to encourage employees to enroll or increase their participation in the payroll savings or Bond-A-Month program.

The Treasury Department has announced that the annual limitation on the purchase of savings bonds has been raised to \$10,000 face amount (\$7,500 issue price) for series E and H bonds.

Mr. Helies notes that the new six percent rate on bonds held to maturity makes them attractive savings and investment security, and bonds are "an excellent way for each of us to help meet our responsibilities to our families and our nation."

Scovill Reports 1973 Results

Scovill Manufacturing Company noted continued improvement in the financial report for 1973 issued on February 6, 1974, with earnings up 13.6% and sales up 12.1% over 1972.

Consolidated results for the year 1973 are summarized as follows:—

	1973	1972
Sales	\$614,514,599	\$548,030,645
Profits after		
Taxes	\$20,453,267	\$18,031,411
Profits as		
% of Sales	3.3%	3.3%

New Jersey Plant Wins Minute Man Flag With Gold Star

Proudly displaying their "Minute Man Flag with Gold Star" are:— Chet Little, Division Director of Industrial Relations; Elizabeth Scefcyk, IUE-AFL-CIO Clerical Group Office Chairlady; Vasco Gomes, IUE-AFL-CIO Technical Group President; Robert Young, Plant Manager; Alex Steinfeld, IAM-AFL-CIO Chief Steward; and Mr. R. Weber of the Treasury Dept.

In ceremonies held recently at the Newark, N.J. plant of the Apparel Fasteners Division the "Minute Man Flag with Gold Star" was presented to Plant Manager Robert Young by Mr. R. Weber, area manager for the Sav-

ings Bond Division of the Dept. of the Treasury.

The award recognizes six consecutive years of over 50% of employees participating in the U.S. Savings Bond program thru payroll deduction.

MEMO

from Management:

Conserving Energy

On November 8, 1973, Scovill established a comprehensive plan for conserving energy at our extensive Waterbury operations. Thermostats were lowered and all non-essential lighting was eliminated. In factory areas, electric motors and high-pressure air, steam and water systems were shut off when not required for productive use.

The savings from these and other conservation efforts have been impressive. In the last two months of 1973, total oil consumed for heat, lights and minimum load requirements in the factory was reduced by 18 per cent. This saved us approximately 280,000 gallons of oil. These savings, when extended through March, will provide enough fuel to heat about 700 average-sized homes for the entire winter season.

All of us are also being urged to form car pools. Sharing rides can lead to significant savings in energy. Federal figures show that autos accounted for about 40 per cent (8.4 million barrels) of the daily demand for oil in 1972 — four times the daily consumption of industrial heating oil and five times the daily consumption of home heating oil. In eleven days, American motorists burn the equivalent of enough oil to heat all homes in New England for one year.

So — turn down your thermostats, turn off non-essential lights, drive slowly and join a car pool if you can. The Bulletin Office can help you with the service that it is providing in connection with car pools.

It all makes a lot of sense. Faced with shortages, the energy we save by conservative use means that there will be more available for taking care of our customers and saving our jobs.

Girls' Club Offers Scholarship Award

The Scovill Girls' Club has announced its annual Scholarship Award program. This year, two awards of \$250 each will be given and presented in the month of May.

Applications will be available at the Employee Activities Office in the SERA Building on Monday, February 18th. Deadline for entries is April 19th.

Eligibility — An applicant must be the son or daughter of an active Scovill employee of the Waterbury, Watertown or New Milford plants; and a senior at an accredited high school — public, private or parochial.

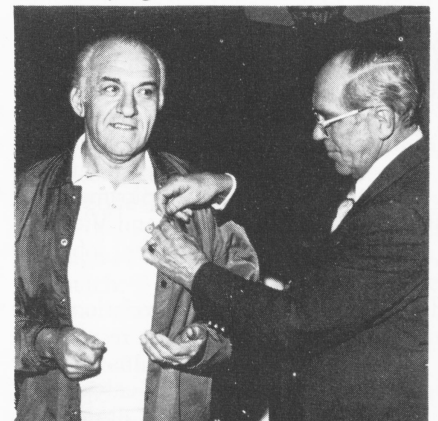

The award will be based on: scholastic achievement, involvement in school and community affairs; and on recommendation of school principal, teacher or guidance counselor.

Blood Donor Day

The Holiday Special Employee Blood Donor Day, held at the SERA on December 20th, saw 131 registrants with a total of 118 pints collected.

Special-gallon pins were awarded as follows:

- 10 gal—Michael Petrucci
- 8 gal—William A. Rogers, Craig Barber
- 7 gal—Edward A. Loughlin
- 5 gal—Louis Guerrera
- 3 gal—Philip Valaitis, Richard Rogers
- 1 gal—David Schaffner, Richard Kleinschmidt, Edward Kazimir, James Guinea, Jorge Velez

Michael Petrucci, of our Sewing Notions Division in Watertown, was on hand at the Holiday Special Blood Donor Day to donate a unit of blood; making his contributions to date a total of 10 gallons. Employee Activities Manager Fred Wilson presented Donor Pin to Mr. Petrucci.

If you'd like to join a car pool, clip form below and send to Bulletin Office.

Student Nurses Visit Plant

Recent visitors to the Waterbury plant included nursing students of Western Connecticut State College whose tour was part of their occupational health experience. Head Nurse Helen Carew guided the students.

Future nurses are just one group of students whose college courses include "field trips" to get a first-hand look-see at their chosen profession. The value of these trips, together with an opportunity to study the practice itself, is that they sometimes help a student decide if this is the career he or she will follow.

Reaction of the student nurses, at conclusion of their tour, included:

"Nothing like I expected"—"Amazed at size of hospital and facilities therein"—"Surprised and pleased with degree of respect and consultation between doctor and head nurse—whole concept of occupational health nursing was changed"—"it just seems too ideal to be true, but we were there all day and saw the results—reading charts, seeing patients, etc."—"a good exam-

ple of the Registered Nurse accepting the ever-expanding role of the nurse—the charge nurse is exceptional in her

Gasoline Warning

Motorists who are buying gasoline cans to keep extra fuel in their homes and cars as a hedge against Sunday gas station closings are actually storing potentially lethal liquid bombs, the National Safety Council says.

According to Hans Grigo, the council's technical consultant, "The explosive power of one gallon of gasoline has been compared to the explosive force of 14 sticks of dynamite. Gasoline vapors expand to fill the available space they are confined in. The expansion can split the seams of an unvented can or plastic container and can cause vapor leakage from a vented 'safety' can. Sparks from a light switch, electrical appliance, car ignition or short in tail light or brake light circuits can then trigger an explosion."

field—she is very competent, knowledgeable, is respected and valued by the doctor as well as employees".

Mattatuck College Students Visit Plant

Pictured at our new acid waste treatment plant, inside the Hamilton Avenue gate, are Geography and Environment Sciences students of Mattatuck Community College who visited the plant recently.

Ms. Eva Herzfeld, Assistant Professor of History and Geography at Mattatuck Community College, accompanied the students on their tour. Allan Steel, Engineer and Supervisor of the Waste Treatment Plant operations, was their host.

The tour, included in the school course as a field trip to give them a better understanding of what industry,

in general, and Scovill in particular, are doing to fight pollution. The attitude of "let's see what industry is dumping into our rivers" was changed to one of amazement and deep respect for what Scovill is doing to help clean up the environment. They're pretty sure now that industry in general is working toward cleaning up rather than polluting.

For Gas Savers

If you are walking, biking or busing to work to save gas, you should still drive your car at least once a week, and for at least 5 miles each time, to keep it in good running order. That's particularly true in cold weather, according to Frank S. Roop, Jr., associate professor of mechanical engineering at Michigan State University.

He explains that, on short runs, "the engine doesn't get properly warmed up, the automatic choke cannot function properly, the crankcase oil will remain stiff, excessive gas in the cylinders will create wear on them, reducing performance and drivability."

Retirees Receive Warm Send-off

- 1) Alfred Busby, Electrical Lab
- 2) Manual Maia, Casting Shop
- 3) Michael Dotoli, Wire Mill
- 4) Vincenza Genova with B & S and Davenport Foreman Frank Chiarella and Operations Manager Robert Dunn

- 5) Arthur Choquet with Field Equipment Engineering Manager Jon Foults
- 6) Lucy Pesino with Cleaning Room Foreman Charles Ancypa and Operations Manager Robert Dunn
- 7) Agnes Sobienski, Mfg. Packing
- 8) Louis Migli, Bldg. 112 Cleaning
- 9) Kasimir Pernerewski, Screw Machine Tool
- 10) Peter Zilinskas, Gripper Eyelet

Retirements

Gerard Sevigny, machinist in Kingsbury, retired as of November 19, 1973, with 31 years' service.

Effective December 1, 1973

Rolland Dupont, scrap control man in the Rolling Mill—40 years' service.

Joseph Ford, buffer-polisher in the Buff Room—32 years.

Rose Marciano, assembler — miscellaneous machines operator in Automotive Assembly—11.2 years.

Louis Migli, maintenance man in Bldg. 112 Cleaning—26.7 years.

Kasimir Pernerewski, T.R.M.O. operator in Screw Machine Tool—31 years' service.

Effective January 1, 1974

Alfred Busby, Electric Lab technician—28.6 years' service, Metals Div.

Martin J. Byrne, machinist in East Machine—33 years.

Jerry Cepelak, supervisor in Closure Tool & Machine—36 years.

Rita Chevrette, machine and bench operator in Kingsbury—31 years.

Arthur Choquet, tool and machine designer in Field Equipment Engineering—36 years.

Peter Dambraskas, foreman in New Milford Tube Mill—39 years.

Edward L. Derouin, toolmaker in Blank & Draw Tool Room—42 years.

Michael Dotoli, annealer in Wire Mill—44 years.

Vincenza Genova, miscellaneous machines operator in B & S and Davenport—23.3 years.

Manuel Maia, weigh-up man in Casting—35 years.

Lucy Pesino, press operator in 112-Cleaning—31.7 years.

Clinton Rasmussen, sergeant-guards in Security Dept.—36 years.

Elmore Robinson, TRMO-engine lathe in Gripper Eyelet Tool—23 years' service.

Louise Santoro, hopper feed dial press operator in Closing—41 years' service.

Agnes Sobienski, Grant spinner in Mfg. Packing—44 years.

Laurier Theriault, electrician in Plant Engineering Maintenance — 29 years' service.

Fred Wilke, toolsetter on slitting machines in Rolling Mill—23.8 years' service.

Peter Zilinskas eyelet machine operator in Gripper Eyelet—44 years' service.

\$337 To Harry Foss of Button Attaching Machines

Mr. Joseph Kailukaitis, Field Equipment Parts Coordinator, and Asst. Foreman Fred Troske listen with interest as Mr. Foss describes his suggested idea of re-working and resharping worn dies which were previously scrapped and thrown away. Now, with their re-use, cost of the dies has been reduced.

Other Suggestion Awards

- \$270—Herman Saucier, Forging
- \$72—Donald Margison, Rolling Mill
- \$50—Richard Renkun, Wire Mill
- \$35—Donald Margison, Rolling Mill
- \$30—Edward Jordan, Pipe Shop
- \$28—Victor Valantiejus, Repair
- \$25—Henry Swank, Vernatherm
- \$20—Mario Mucciacciaro
- \$20—Joseph Santoro, Lacquer
- \$10—Edward Gramigna, Lacquer

Girls' Club News

By Irene Owens

Hello, again! We want to thank one and all for your excellent cooperation and contributions to the Christmas baskets for the needy with toys and clothes.

We have received thank you notes from many of our retirees for their Christmas remembrances. Thank you, ladies, we're so happy that you were pleased.

Very shortly, or so it seems, time will be here for the election of Council members and officers. If any member wishes to be on the Council, her name should be given to a Council member, and she will be contacted. We need all the help we can get and new Council members with fresh ideas, and the willingness to actively serve on committees, are always in demand.

Meanwhile, plans are being made for our annual Card Party and Fashion Show to be held in March.

\$135 each to Margaret Andrew and Martha Smith

Putting their thoughts together, these two ladies of Purchasing submitted a suggestion of pre-printing information cards for use with outgoing purchase orders which results in saving of sorting and handling time.

Buyers Elbert Coley and Edward Goss heartily endorse the ideas of the young ladies.

\$2836 to William Borowy, Sewing Notions Division

Two suggestions, submitted by Mr. Borowy, netted an award of \$2836.

Mr. Borowy's suggested change of wire used for the Baby-Safe safety pin results in a saving of material costs. His second idea, which changed the process of finishing Gripper Plier handles, reduces the time required to plate the handles.

Division General Manager Joseph Stevens presents the award check, with Division Controller Paul Lapira an interested on-looker.
